## **Toxic**

I already suffer from health issues from environmental toxins; Lithium is not safe- it is very hot and cannot be extinguished once it catches on fire.. Then it will release toxic fumes into our air, this is a concern and a hazard to our neighborhoods. This potential lithium plant could cause our home and auto insurance costs to increase with a high-risk plant in our area. (I am an insurance agent).

Many persons in the area will begin to have additional health issues if a Lithium plant is allowed in Vacaville. We moved here 32 yrs ago as it was a safe clean place. Let's keep it that way. Our children and elderly and immune compromising citizens will be affected. Lithium is more toxic to environment then petroleum / gasoline engine vehicles. If San Francisco wants Lithium Batteries, then they should build these plants in their own neighborhoods. Don't force their agenda on us.

Thank You, Toni Barnett
