Help Us Help Them

Vacaville has identified not one but THREE more rural sites for battery storage facilities, sites that God forbid the inevitable worse happens protects citizens better, protects hospitals better, protects the children better and protects our hospitals better. The biggest community benefit these corporations can give us is to work with us. We don't want it here and yet we still managed to find not one but THREE more appropriate sites. Please go compare the sites and then think of your own families. Help us, help builders to be better community partners. I don't think ANY community should have this forced on them but certainly not more than 3 sites forced on them like their lives, their children's lives and farming doesn't matter. Thank you for your consideration. We are not say NO, we are saying not there.
