Reject as inconsistent with SB 100 Climate goals

This proposal is a gross misuse of both taxpayer and ratepayer money. This gas plant, along with all the others, has to be retired before 2045 “ so CA can meet the SB 100 climate goals!

Spending \$54 million in capital costs plus millions more for the ever-increasing cost of natural gas is WRONG!

The CEC must reject this proposal as inconsistent with SB 100. Burbank ratepayers should instead be required to invest in renewables plus storage.
