Reject Item 8 to expand Magnolia plant gas production

Hello, my name is Claudia Funke, and I am a voting resident of Pasadena, CA. I am alarmed to learn that the CEC is considering expanding gas production at the Magnolia Plant in Burbank and amending air emissions limits there. Such an action endangers the health of California's citizens and is contrary to SB 100 and its goal for the state to have 100% clean energy by 2045. I am further enraged at the thought that taxpayer dollars (and, yes, I am a taxpayer!) would go to fund this through the DEBA program. Pasadena has the goal for its municipally owned power company to achieve 100% carbon-free electricity by 2030; we will all be happy when the Magnolia Plant is in our rear view mirror. California needs clean air and a clean energy future!
