To: California Energy Commission (CEC)

Re: Item #8 Magnolia Power Plant Gas Expansion

My name is Mitch L'Angelle. I want to express my concern over the proposed expansion of gas capacity at Magnolia Power Plant. California bill SB 100 has a goal to reach 100% clean energy by 2045. This expansion goes against that goal. Another California bill SB 887 says the state needs to substantially reduce reliance on gas plants. This proposal goes against this mandate.

This gas expansion project would allow using taxpayer dollars to expand fossil fuel infrastructure. I don't want my tax dollars being wasted on a project that will be obsolete in a 100% clean energy state by 2045.

The burning of a fossil fuel, such as natural gas, adds nitrogen oxide and carbon monoxide pollution to our already polluted South Coast Air Basin. Increasing pollution from power plants should be something this Commission works to decrease, not add more to.

I strongly urge the CEC to reject the petition to expand gas capacity at the Magnolia Power Plant to keep California in line with its goal of 100% clean energy by 2045. To not use taxpayer dollars to expand fossil fuel use. To not increase the health hazards of increased air pollution from the burning of fossil fuels.

Thank you.
