PROJECT TITLE: Magnolia Power Project

Docket: 01-AFC-06C

TECHNICAL AREA(s): Air Quality

☒ **Telephone**

☒ **Email**

☐ **Meeting Location:**

NAME(s): Wenjun Qian, Program and
Project Supervisor, CEC

DATE: 11/14/2025

TIME:

WITH: Shannon Lee, Senior Air Quality Engineering Manager, South Coast Air Quality Management District

SUBJECT: *Magnolia Power Plant Upgrade Project*

COMMENTS: I [Wenjun Qian] called Ms. Lee at South Coast Air Quality Management District (SCAQMD) on November 14, 2025. I asked Ms. Lee to provide a brief statement summarizing SCAQMD's engineering analysis of the proposed upgrades at the Magnolia Power Plant and explain how emission reduction credits (ERCs) work. The email from Ms. Lee was a follow-up to the earlier phone conversation.

Good afternoon Wenjun,

Thank you for speaking with me earlier today. As we discussed, I have prepared a short statement on the project and what emission reduction credits (ERCs) are.

South Coast AQMD has reviewed the proposed Magnolia Power Plant upgrade project and verified compliance with all applicable South Coast AQMD rules and regulations and State and Federal requirements. Additionally, the facility has provided sufficient Emission Reduction Credits (ERC) to offset emission increases for the project. ERCs are created by a modification to lower emissions or shutting down equipment in our basin. These credits can then be used by other facilities to offset their own emission increases. In addition, this project has undergone our own public participation period which included U.S. EPA's review and approval by CEC. No comments were received from U.S. EPA or any members of the public.

Thank you.

Shannon Lee, P.E.
