Docket Number: 01-AFC-06C

Reject Expansion of Magnolia Power Plant

Re: Item #8

Dear Commissioners,

Please don't approve the expansion of gas capacity at the Magnolia power plant, and the raising of limits on emissions of carbon monoxide, nitrogen oxide, and volatile organic compounds. This Burbank community is already heavily impacted by air pollution, in the 98th percentile for pollution burden.

Approving this application would fly in the face of California's climate goals to move from fossil fuel sourced energy to renewable energy. It would fly in the face of economic and environmental justice for burdened communities.

Please exercise your duty as Commissioners and reject this wrongheaded petition.

Sincerely,

Rhea Kuhlman, Co-chair

Climate Justice Group
