Magnolia Plant Expansion

Against the proposed Magnolia Plant Expansion -
Against consumption of more polluting fossil fuels;
Add 100% clean energy instead of generation that will do the opposite;
Promote reduction in the levels of particulate matter and oxides of nitrogen;
Reduce health expenses due to burning of fossil fuels by eliminating these pollutants;
Extracting fossil fuels adds to the generation of particulate matter and oxides of nitrogen
then requires additional expenditures to close the extraction facilities;
Invest in clean energy facilities for the future!!
