Corby Project Vacaville, CA - Concerns

Please see my attached concerns regarding the proposed Corby BESS Facility Project in Vacaville, CA

Additional submitted attachment is included below.

I'm writing to voice my concern of the proposed Corby BESS Facility Project in Vacaville, CA. As we know this type of project carries a high risk to the safety of nearby homes, families, food sources, community and environment. We recently purchased a brand new home very close to one of the proposed site areas. This would bring our property values down to nothing. Not to mention, many new homes and neighborhoods are still being built, and if this project goes through, I'm sure those homes will not sell. From past data, battery fires burn for days and are not easily able to be put out. This is not safe and a hazard to the community and safety personnel. There is plenty of vacant land outside of the city limits and other safer alternatives to consider. I ask that you please listen to the concerned voices and residents of Vacaville, CA. who do not want this in our city or near our homes.
