Oppose Location, Land Use and battery type

Hello,

As a resident of Vacaville for over 15 years, this project raises many concerns. The area proposed should stay designated agricultural land. The type of battery proposed is one that poses the most hazards to air quality and safety of residents. There are safer battery options out there that are feasible along with locations that are considered industrial and better suited for these types of projects. The fact this project has superseded our local government proves without a reasonable doubt this company's interest is not in favor of the safety for residents but in the best interest of the company to make a quick buck.

We ask that you please oppose this project to ensure the safety of California residents that live in Vacaville.

Respectfully Concerned Citizen,

Tonya Y Espionza
