## **Opposing Vacaville Lithium Ion Battery Projects**

I reside in the Brighton Landing neighborhood with my family which includes two young children under the ages of 5. We are not originally from Vacaville, but found job opportunities and a great place to raise our family here. I feel deeply concerned for our safety with the proposed plans for lithium battery project locations so close to our neighborhood and others in Vacaville. This poses significant threats with major concerns of fire hazards, toxic fumes, and potential contamination of soil and groundwater. There are no benefits of this project for our community not even any long term job opportunities. The safety and health risks are of the utmost importance but there is also the concern of noise pollution and lowering the values of our homes. There are safer battery options that exist, and I am agreeable for such alternatives. Public safety needs to come first, the residents of Vacaville will absolutely be negatively impacted by this plan and I urge you to consider our health and safety over profits.
