Opposition to this project

To whom this may concern,

I am writing this comment as a show of opposition for this battery project.

The proposed location for this project is in prime agricultural areas which also neighbors large residential areas. Battery production, storage and repurposed uses lots and lots of energy and also releases extremely toxic chemical byproducts. This poses a massive threat not only to our agricultural land but also to our community residents.

This poses concerns for also our precious ecosystem and the lives and wellbeing of the people living here. Land that has been saturated with chemicals and toxins, is no longer fertile and suitable to grow our much needed crops. Not to mention, the risk of fire heightens in an already threatened community.

This project has long lasting, irreversible effects. This pushes farmers out of our community, protect our people and protect the community. Our community is begging for this not to happen. Please hear your community and stand up for us.
