## **Vacaville needs to uphold the value of its agricultural landscape**

This agenda posed by the state and energy commission is vile. Circumventing local government and capitalizing on the misinformed people of lesser populated cities outside of the greater metropolitan areas. We value our landscape and community. This project is a gross misuse of power and the battery storage issue is a half measure. I am in the secure power industry for one the largest electrical companies on the world. Batteries are an ineffective half measure. Once built the costs of replacing batteries over life cycles on this capacity would be horrible for the environment and makes no sense in the long term scheme I. Battery systems leave customers on the hook for costs of upkeep. Replacement and liability from issues such as thermal runaway. Unless we create a new fire department solely trained to prevent and extinguish Li-ion fires, we should not allow any projects of this magnitude. We don't want it here. My family has lived off Kilkenny road for decades. My family has been here for over 100 years. We are Vacaville and we vehemently oppose Corby.
