AHA comments on mixed use and Phoenix-Las Vegas Destinations

We have started work on an Arizona hydrogen infrastructure. We appreciate California for leading the way. 1) In regard to opposition to light and heavy duty mixed refueling, the natural gas refueling for buses at Phoenix Sky Harbor Airport is inside a walled area. Two light duty dispensers were located outside the wall, easily accessible from the street. 2) Perhaps the CEC could encourage a few stations to bridge the gaps between LA and Phoenix and LA and Las Vegas by offering up to 100% of the cost.
Douglas Hawley, AHA Board Secretary
