## **NO NO NO! Not safe!**

I am a resident of Acton. BESS projects threaten our safety and health, and do not benefit local residents in any way. Lithium battery fires are toxic and nearly impossible to extinguish. A fire would cause major harm to waterways, our water table, etc. The power traveling in the transmission line is into LA City, not for Acton or surrounding areas. Most residents in this area live on A1 or A2 property. We have animals who also need to stay safe. This area is a major wildfire area.

Please locate BESS projects in remote areas, not near homes, farms and ranches. The projects are not safe, and are an eyesore. Put them somewhere else.
