Prairie song

Hello.. I live in Acton and have for 38 years. I know you have no idea what effects this project would have on us, because you don't live here. This is a rural community. We have farm animals, domestic animals and a large population of wildlife here. The majority of us are on private wells for our homes. It would take just one fire at this project, and the runoff would poison our watertable and could make our wells unusable. No water in our homes for drinking, bathing, animals etc. We are in a high fire danger area. We can't even get fire insurance, and you want to put in a project with lithium batteries? Not a good idea really. Please consider our community. No one that lives here thinks this is a good or viable idea. There are literally thousands upon thousands of acres in the desert that are uninhabitable that would be better suited for this project. Acton is saying No, Not in Acton. Thank you.
