Vaca Dixon Power Center

I am writing to oppose the Vaca Dixon Power Center or any battery energy storage center proposed in Solano County. These battery systems are known to be problematic with thermal runaway and have no way to put these fires out. The technology to extinguish these types of fires does not exist. This causes harm to our air and water wells. It's dangerous for our firefighters, and the power is not even sold to our communities to lower our power bills. Even if it was I would never advocate for these battery centers. This is proposed to be right next to my house in prime agricultural land, not even zoned for this type of project. I oppose prime agricultural land being taken up by a project like this. We have owned our family property for over 30 years and we do not want this kind of industrialization near our family property.
