## ERRATA

On December 29, 2025, the California Energy Commission (CEC) staff docketed a Staff Assessment, including a draft environmental impact report (EIR), for the Soda Mountain Solar Project (24-OPT-03; TN 268059).

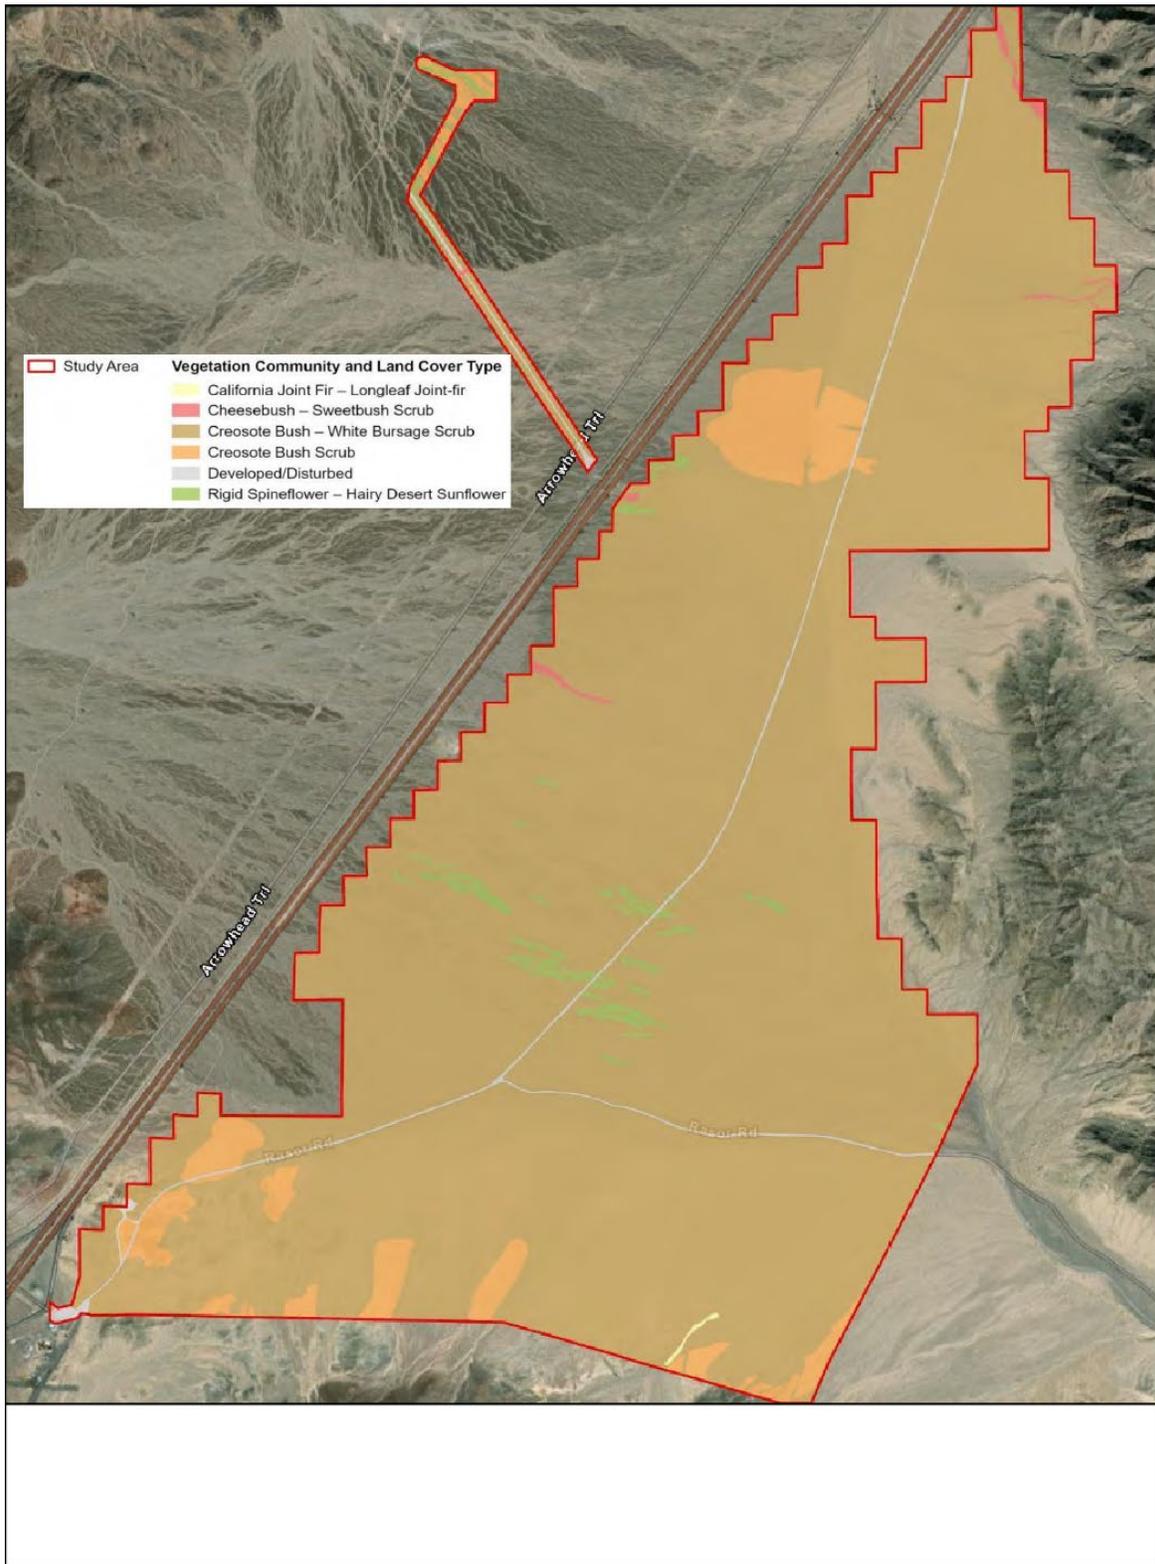

1. The changes set forth below to the Staff Assessment are necessary to correct typographical errors or for clarity. Deleted text is shown in ~~strikethrough~~ and new text is shown in **bold underline**.

Page 5.2-115 of **Section 5.2, Biological Resources** is revised as follows:

Construction of the project would not likely to affect habitat used by the Mojave fringetoe lizards, which is located south of Array 3. However, it could affect sandy areas east of Array 3 if storm flows are inadvertently diverted around the project (see **Figure 5.2-~~73-2~~**).

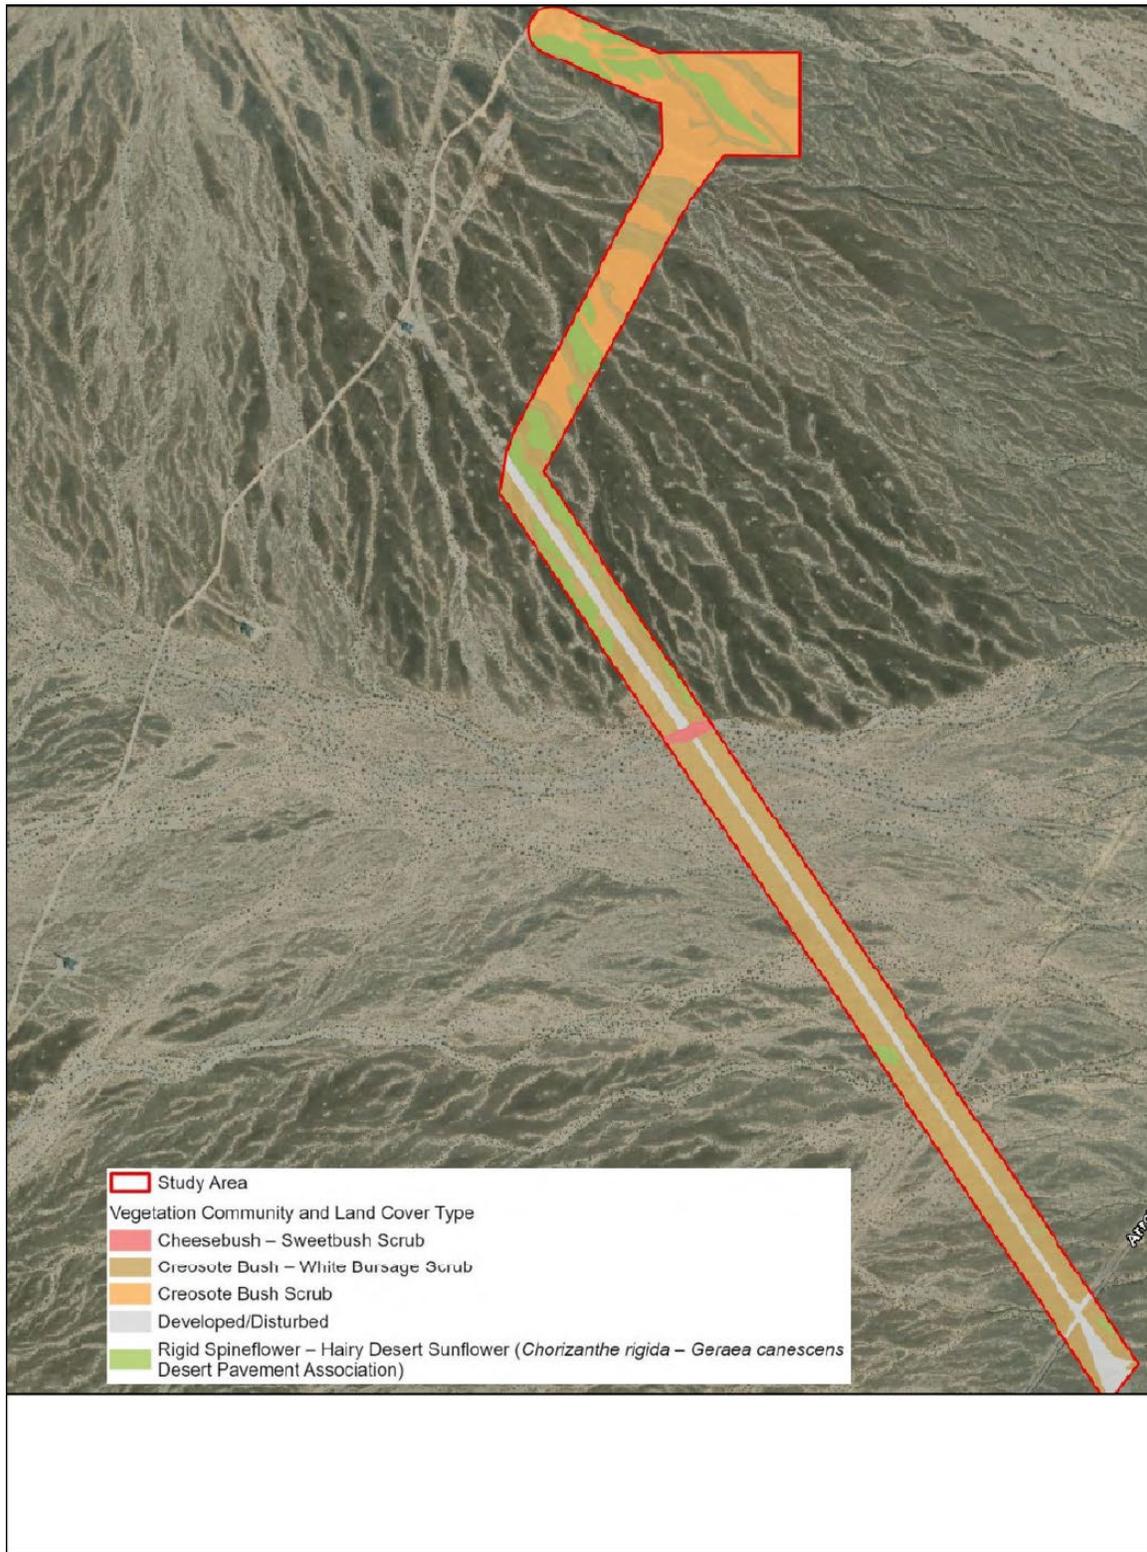

2. Due to an inadvertent omission, **Figure 5.2-1** to **Figure 5.2-7** were not included in the Biological Resources section in the docketed Staff Assessment. **Figures 5.2-1** through **5.2-6** are illustrative of the analysis presented in **Section 5.2, Biological Resources**. The figures provided herein are submitted to amplify and illustrate staff's analysis. Their inclusion does not alter the analysis, conclusions, impact determinations, or mitigation measures presented in the Staff Assessment and does not result in the identification of any new or more severe environmental impacts.
