Vaca Dixon Power Center BESS

Where do I start - just say NO to the Vaca Dixon Power Center BESS. Just like the Corby Project, this is on the WRONG type of land use. This is in a prime AG Land and close to a hospital and housing. This company is trying to work around Vacaville and Solano County regulations to go over our heads. Who will care about the pollutants that will happen when their Lithium Ion Batteries catch fire, not if, but WHEN. They always do. Vacaville and Solano County have a No Lithium Ion policy. You need to hold up to. Why are even being considered to go into Prime Ag Land? Just because it's convenient to the sub station. Please put them out in Industrial Areas, like the Lambie Industrial Park in Suisun City. Where the zoning is correct and these companies can all share in the expense of the tie into the sub station. Protect our water - by the way the water from her goes into the soil which goes to the wells of the homeowners and farms around the area. Plus there is a Level II Trauma Hospital less than a mile away and this is across Interstate 80 from the sub station, when there is a fire, the freeway will be closed which will affect over 100,000 on a business day. Imagine the truck delivering products to stores that will have to be rerouted when a fire happens. Please say no, or at least no to Lithium Ion batteries being used.
