No to new submission by Vaca-Dixon Power Center Battery Energy Storage System(BESS), (owned by Middle River Power)

Please do not approve the newest submission for a Battery Energy Storage System Plant in Vacaville.

I continue to voice my concern for the placement of Battery Energy Storage System (BESS) Project. I am thankful to all of you who continue to listen and care about the voices of the people who live in Vacaville and Solano County.

These facilities have public health risks and environmental concerns due to their ability to catch fire in a process called thermal runaway. By limiting the locations of these facilities to more appropriate industrial zones in our county we are able to control the impacts of these risks.

I respectfully request that you do not approve this new submission by Vaca-Dixon Power Center BESS (owned by Middle River Power), it is a critical step in preserving the integrity of our county for future generations.
Thank you for your consideration of this matter.
