No to Vaca-Dixon Power Center BESS Â (owned by Middle River Power)

I am writing this message to you as a native born Californian and a 35 year resident and citizen of Vacaville, California. Â I am hoping you will hear my voice. Â

We cannot afford anymore devastation from fires and chemical releases of any kind in California especially man made for the people, environment, animals, and farm land.

As we continue to hear open our eyes. We need to hear those words as these Battery Energy Storage System (BESS) will Plants continue to fail with consistent break downs. These Plants need to be far far away where no harm can be caused. They also need to be staffed by people here not across the United States stating they have hurricane proof buildings. Again open our eyes Mother Nature has its own agenda.

Other forms of electricity are needed, but safer sources. These lithium plants old and new technology are not safe. We need to consider safer sources rather than a quick fix by not considering the long term study and effect of all these units in our land and air.

So please do not approve this new application by Vaca-Dixon Power Center BESS Â (owned by Middle River Power). We the people of Vacaville and Solano County have worked very hard as local government and the people followed the due process respectfully by creating Solano County ordinances.

Everyday life is about prevention to reduce the harm we implement for living life.
