Privacy and personal information is a big concern with customers.

Privacy and personal information is a big concern with customers. Adding customers to a government list is going to put a lot of customers off as well as aid the unlicensed guys that buy from the internet to avoid popping up on the radar. This deprives legit contractors of income and localities of the taxes that are generated from payroll and sales.

It's a big world out there. Don't be short sighted and believe that a registry is going to make all jobs get permits and install proper equipment. I believe it will drive the underground market even more and customers that want privacy to go there to avoid being on a government list.

Sincerely,

Russ Alway
