Docket Number: 24-OIR-03

I am asking the CEC to abandon this proposal in leu of a better program and/or the addition of enforcement personnel.

Being a small California contractor up here in the city of Chico in Butte county. My business has only 5 employees that already have a lot of duties to fill during a normal work day with little to no room to add more office work. The addition of the registry would increase administrative burdens, create added costs, risk confidential business information, and would not solve permit compliance. People who are not pulling permits can get their equipment from a large number of out of state internet retailers who will sell to anybody. Focus this energy and money on helping the California License Board find these people through aerial and land based observations. I am asking the CEC to abandon this proposal in leu of a better program and/or the addition of enforcement personnel.

Sincerely,

Charles Pugh Jr
