No BESS in Very High Fire Hazard Severity Zones

This project should not be placed in Acton because it is in a Very High Fire Hazard Severity Zone. Coval is putting an entire community at risk. LA County fire department does not have the resources to put out a BESS fire of this size. Coval argues the project will be cheaper to build due to its proximity to Vincent power station. Going the least expensive route will overburden the Acton community. A major fire at the site can bring down the power station, burn local residences and affect access to the LA basin since it's too close to the 14 Freeway and Angeles Forest Highway. I urge the CEC not to approve this project in Acton.
