City of Vacaville Disallows Lithium Ion Technology -Part 1

CEC Staff,

On March 10, 2026, the Vacaville City Council voted unanimously to approve a BESS Ordinance that disallows BESS within the city limits which utilize Lithium-ion battery technologies.

While the residents of Vacaville support battery storage for grid reliability, they cannot support technologies that carry known risks, especially knowing that there are battery alternatives that are safe.

The residents of Acton are of the same belief and therefore do not support the Prairie Song Reliability Project.

Like so many other communities in the state of California, we believe that battery energy storage projects that utilize lithium-ion technology such as LFP, which still carry risk for fire and toxic exposures, should never be sited in proximity to communities or within a Very High Fire Hazard Severity Zone.
