PUBLIC SUMMARY OF CONFIDENTIAL MATERIAL

Exhibit Q2 — Quality Assurance Personnel and Qualifications

California Energy Commission
Docket 25-BSTD-01
2025 Energy Code Compliance Provider Applications

Submitted By:
Golden State Registry (GSR)
National Energy Testing Institute, Inc.

Golden State Registry has submitted Exhibit Q2 as part of its Energy Code Compliance (ECC) Provider Application under Docket 25-BSTD-01.

Exhibit Q2 identifies the personnel responsible for administering and implementing the Golden State Registry Quality Assurance (QA) Program for the ECC program.

The exhibit provides information regarding the roles, responsibilities, and professional qualifications of the personnel responsible for:

- administering the QA program
- conducting documentation audits and field reviews
- investigating program complaints and inquiries
- overseeing compliance with ECC program requirements
- supporting enforcement actions when necessary

The exhibit also describes the independence and conflict-of-interest safeguards implemented by Golden State Registry to ensure that Quality Assurance personnel remain independent from field verification activities subject to QA review.

Because the exhibit identifies specific personnel and describes the internal staffing structure of the QA program, Golden State Registry has requested confidential treatment for the full document pursuant to Title 20 California Code of Regulations §§2501–2505.

This public summary is provided to describe the general nature of the document while protecting sensitive personnel and organizational information.
