Docket Number: 24-BSTD-05

Project Title: 2025 Energy Code Compliance Initiatives

AIACA supports restructuring this effort to make the energy code more consistent with other California building codes. We also encourage the CEC to designate a specific person to lead focused, ongoing internal advocacy for simplification, clarity, and brevity. This ongoing effort should include both internal review and outreach to the broad array of stakeholders whose work intersects with the energy code, including, but not limited to, design professionals.
