I LOVE the restructuring

The restructuring of the energy code is HUGE. I'm so excited. This needs to be implemented immediately. The current code is bespoke, confusing, and, frankly, super annoying compared to the other codes and standards. I've been working with T24 for almost 20 years now, and while it's improving, it's not enough. I'm tired of being the "odd duck", and want to be equal with the Plumbing Code, Mech Code, etc. It's long past time. Green Building is hard enough without having a confusing code and having to communicate how wacky it is to all of our project Teams. Please adopt the restructured code immediately. Thanks. Pete Kennedy. Senior Project Manager. Gilleran Energy Mangement.
