Misinformation on Application

It has been stated in town meetings that the calculations of toxic levels, and distances to schools and residents has been misstated by the developer. There is a school location within a few miles that wasn't discussed in their document, the distance to residences and livestock was miscalculated with respect to the closest residents to the proposed location. This weekend Acton had Santa Ana winds and a fire that required some residents to evacuate. Disregarding safety in the event of a battery fire and thermal runaway is disgusting. Their misrepresentation of the facts should call into question the developer's ability be truthful going forward. I urge you to vote no on the project based on a lack of skill and/or integrity of the developer. Thank you.
