<b>Submission Date:</b>	4/14/2026 12:31:30 PM
<b>Docketed Date:</b>	4/14/2026

**2025 Energy Code,  
California Code of Regulations, Title 24,  
Parts 1 and 6**

**Docket: 24-BSTD-03  
Approval: 26-040126**

**APPROVAL BY THE EXECUTIVE DIRECTOR OF  
UPDATED 2025 ENERGY CODE THIRD-PARTY COMPLIANCE SOFTWARE, ENERGYPRO 10.1**

The Warren-Alquist Act, Public Resources Code sections 25000 et seq., 25402.1(b), requires the California Energy Commission (CEC) to establish a process for certifying calculation methods for demonstrating compliance with the Energy Code, California Code of Regulations, Title 24, Parts 1 and 6.

As allowed by the 2025 Energy Code, California Code of Regulations (CCR), Title 24, Part 1, Chapter 10, Section 10-109(c)3, EnergySoft submitted an application on March 27, 2026, requesting the CEC approve EnergyPro 10.1 as an Alternative Calculation Method (ACM) to demonstrate performance compliance with the nonresidential, multifamily, and single-family residential requirements of the 2025 Energy Code.

On December 8, 2025, the CEC approved EnergyPro 10.0 as an ACM for demonstrating performance compliance with the nonresidential, multifamily, and single-family residential requirements of the 2025 Energy Code.

EnergyPro 10.1, an update to EnergyPro 10.0, incorporates the compliance manager from the updated California Building Energy Code Compliance (CBECC) version 2025.2.1 public domain compliance software.

When EnergyPro 10.0 was approved at the December 8, 2025, CEC Business Meeting, the CEC directed the Executive Director to take all actions reasonably necessary to “make the above-referenced software available and maintain the software in good form, including but not limited to reviewing and approving updates to third-party software consistent with bug fixes, correcting calculation and analytical errors, necessary ongoing software updates, user interface changes, and other minor updates.”

As specified by the 2025 Energy Code, Section 10-109(c)3, ACM applications must meet the requirements of Section 10-116(b) and provide documentation demonstrating that the candidate software meets the requirements, specifications, and criteria specified in Sections 10-109(c)1A, 10-109(c)1B, 10-109(c)1C, 10-109(c)1D and 10-109(c)1E, as appropriate.

CEC staff has reviewed the EnergyPro 10.1 ACM application submitted by EnergySoft, which is available in Docket [24-BSTD-03](#), and determined that it contains the documentation, building energy modeling functionality, and alignment with the current version of the 2025 ACM Reference Manuals as required by the above sections of the 2025 Energy Code.

The Executive Director hereby approves EnergyPro 10.1 as a third-party alternative calculation method compliance software for demonstrating performance compliance with the nonresidential, multifamily, and single-family residential requirements of the 2025 Energy Code.

Information for obtaining EnergyPro 10.1 will be posted on the CEC's [2025 Energy Code Compliance Software webpage](https://www.energy.ca.gov/programs-and-topics/programs/building-energy-efficiency-standards/2025-energy-code-compliance-software) for approved performance compliance programs at <https://www.energy.ca.gov/programs-and-topics/programs/building-energy-efficiency-standards/2025-energy-code-compliance-software>.
