## EXECUTIVE SUMMARY

BSK Associates (BSK) has performed a Phase I Environmental Site Assessment (ESA) for an approximately 55.54-acre Subject Property on Kern County Assessor Parcel Numbers (APN): 084-010-43, 084-010-44, and a portion of 084-010-45 AND 084-010-48, in Inyokern, California (Subject Property, Figure 1). The Subject Property is currently unoccupied/vacant, and it is BSK's understanding that the intended use is a data center and Southern California Edison (SCE) substation.

This document has been prepared in general accordance with ASTM E1527-21 and as such, examines the Subject Property history and surrounding land uses. The purpose of this Phase I ESA was to examine historic land uses on and in the vicinity of the Subject Property in an effort to identify Recognized Environmental Conditions (RECs), Controlled RECs (CRECs), and Historic RECs (HRECs).

The Phase I study includes a comprehensive review of available private and regulatory records, Subject Property inspections, and interviews with those having specific knowledge of the Subject Property history. After conducting this review, BSK identified 3 RECs, 0 CRECs, 0 HRECs, and 0 Vapor Encroachment Concern (VEC) in connection with the Subject Property. BSK identified 6 RECs, 1 CREC, 0 HRECs, and 1 VEC in the vicinity of the Subject Property.

A detailed description of the Phase I process, property description and findings is included in this report as follows.

## 1. INTRODUCTION

BSK Associates (BSK) has performed a Phase I Environmental Site Assessment (ESA) for an approximately 55.54-acre Subject Property on Kern County Assessor Parcel Numbers (APN): 084-010-43, 084-010-44, and a portion of 084-010-45 AND 084-010-48, in Inyokern, California (Subject Property, Figure 1). The Subject Property is currently unoccupied/vacant, and it is BSK's understanding that the intended use is a data center and SCE substation.

### 1.1 Purpose

The purpose of this Phase I ESA was to examine historic land uses on and in the vicinity of the Subject Property in an effort to identify RECs, CRECs and HRECs.

The term Recognized Environmental Condition (REC) is defined as "the presence of hazardous substances or petroleum products in , on, or at the Subject Property due to a release to the environment; the likely presence of hazardous substances or petroleum products in, on, or at the Subject Property due to a release or likely release to the environment; or the presence of hazardous substances or petroleum products in, on, or at the Subject Property under conditions that pose a material threat of a future release to the environment." (ASTM E 1527-21, pp. 1).

A Controlled REC is defined as "a REC affecting the Subject Property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls." (ASTM E 1527-21, pp. 4)

A Historic REC (HREC) is "a previous release of hazardous substances or petroleum products affecting the Subject Property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the Subject Property to any controls." (ASTM E 1527-21, pp. 6)

### 1.2 Scope of Services

BSK conducted this ESA in accordance with the methods described in the American Society for Testing and Materials (ASTM) Standard E1527-21, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*. The scope of services provided for this ESA included:

- A general description of the property
- Review of the property's history using aerial photography, USGS topographic maps, directories, and other readily available information

- Review of the reasonably ascertainable regulatory information published by local, state, and federal agencies
- Subject Property reconnaissance
- Interviews with representatives of the current lessee of the property
- Preparation of this report

### 1.3 Non-Scope Issues

Non-scope issues are those conditions and concerns that are beyond the scope of services of this ESA and include, but are not limited to: asbestos containing materials, radon, lead-based paint, lead in drinking water, wetland delineation or identification, geologic hazards, regulatory compliance, cultural concerns, industrial hygiene, ecological resources, endangered species, indoor air quality, and high voltage power lines. Sampling and analytical testing of soil, groundwater, air, for such analytes including but not limited to radon gas, radioactive materials, urea-formaldehyde, mold, pesticides, polychlorinated biphenyls (PCBs), or polyfluoroalkyl substances (PFAS) are also considered non-scope issues. These issues are therefore not covered in this report. However, these issues are considered “business environmental risks” as defined in ASTM Standard E1527-21 (Sections 1, 1.4, and 3.2.11).

### 1.4 Significant Assumptions

No significant assumptions were made regarding this ESA.

### 1.5 Limitations

The findings presented in this report were based upon field observations during a Subject Property reconnaissance conducted on October 15, 2025, discussions with persons knowledgeable of the property, and review of historical data. Observations describe only the conditions present at the time of this investigation. The data reviewed and observations made are limited to accessible areas and available records searched during the course of this investigation. BSK cannot guarantee the completeness or accuracy of the regulatory agency records reviewed. Unless BSK otherwise expressly agrees in writing, no other party is entitled to rely upon the observations, research information, or conclusions presented in this report or in any other material obtained by BSK from the sources identified in this report. Additionally, in evaluating the property, BSK has relied in good faith upon information provided by the interview sources noted in the report with respect to existing property conditions, and the historic uses of the property. It must also be understood that changing circumstances in the property usage, proposed property usage, property zoning, and changes in the environmental status of the other nearby properties can alter the validity of conclusions and information contained in this report. Therefore, the data obtained are clear and accurate only to the degree implied by the sources and methods used.

Section 12.9 of ASTM Standard Practice E1527-21 states “Recommendations are not required by this practice. A user should consider whether recommendations for additional inquiries or other services are

desired.” While ASTM E1527-21 does not require recommendations, limited recommendations have been included to address identified RECs.

This ESA report provides neither certification nor guarantee that the property is free of hazardous-material and/or petroleum-product contamination or that there are no RECs associated with the property that potentially pose an environmental risk/liability or that the property is in compliance with current applicable federal, state, or local regulations.

Findings of this ESA may have a potential for negative impact on the value or suitability of the property for the purpose intended. BSK cannot assume liability for such negative impact. No warranties, expressed or implied, are made as to the findings or conclusions presented in this report. Sampling and analytical testing of soil, groundwater, air, radon gas, biological agents, and/or construction/building materials are non-scope issues and were not part of the scope of services for this ESA. This assessment did not include non-scope issues identified in Section 1.3 of this report.

### **1.6 Exceptions**

No significant exceptions or data gaps that would raise reasonable concerns regarding our opinions and conclusions in the report were made or noted.

### **1.7 Special Terms and Conditions**

There were no special terms or contractual conditions for this assessment.

### **1.8 User Reliance**

This report may be distributed and relied upon by the Client (Quad Knopf). Reliance on the information and conclusions in this report by any other person or entity is not authorized without the expressed written consent of BSK.

## 2. SUBJECT PROPERTY AND VICINITY DESCRIPTION

### 2.1 Subject Property Setting and Characteristics

The following sections describe the Subject Property setting and characteristics.

| Table 1<br>Subject Property Setting and Characteristics |                                                                                                                                                                                                         |
|---------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Site Location/Address                                   | Subject Property comprised of four vacant parcels: 084-010-43, 084-010-44, and a portion of 084-010-45 AND 084-010-48. The Subject Property is located along State Route 178 near Inyokern, California. |
| Assessor's Parcel Number                                | Subject Property comprised of four vacant parcels: 084-010-43, 084-010-44, and a portion of 084-010-45 AND 084-010-48                                                                                   |

| Nearest Major Intersection                              | CA-178 and CA 395 Hwy.                                                                                                                                                                                  |
| Nearest Major Highway                                   | CA-178 adjacent south                                                                                                                                                                                   |

### 2.2 Current Uses of Adjoining Properties

The following is based on observations by Mrs. Jill Vieira of BSK Associates during the Subject Property and vicinity reconnaissance on October 15, 2025. Table 2 summarizes the current use of properties immediately adjacent to the Subject Property.

| Table 2<br>Observed Adjacent Property Uses |                                                              |
|--------------------------------------------|--------------------------------------------------------------|
| Direction                                  | Adjoining Property Use                                       |
| North                                      | Vacant Land beyond which is a solar field                    |
| East                                       | Vacant Land beyond which is CA-395 Hwy.                      |
| West                                       | Brown Rd. beyond which is single family residential.         |
| South                                      | Gas station and hardware store, beyond which is vacant land. |

### 2.3 Physical Setting

The following sections describe the Geologic and Hydrologic conditions of the Subject Property. The topics summarized include General Geologic Conditions, Surface Soils and Hydrogeologic Conditions.

| Table 3<br>Physical Setting                                            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |                                                                                                                                                                                                                                                                    |

| Description                                                            | Geology: The Subject Property is located within the western tip of the Mojave Desert Geomorphic Province of California. The Mojave is a broad interior region of isolated mountain ranges separated by expanses of desert plains. It has an interior enclosed drainage and many playas. The Mojave province is wedged in a sharp angle between the Garlock Fault (southern boundary Sierra Nevada) and the San Andreas Fault, where it bends east from its northwest trend. The northern boundary of the Mojave is separated from the prominent Basin and Range by the eastern extension of the Garlock Fault. There are two important fault trends that control topography a prominent NW-SE trend and a secondary east-west trend (apparent alignment with Transverse Ranges is significant). | Norris, Robert M. and Webb, Robert W., Geology of California (Second Edition), 1990<br><br>California Geological Survey, 2010 Geological map of California ( <a href="https://maps.conservati on.ca.gov/cgs/gmc/">https://maps.conservati on.ca.gov/cgs/gmc/</a> ) |

|                                                                        | <p><b>Hydrogeology:</b> The Property is located within the Indian Wells Valley Groundwater Basin (6-054). The basin is a closed, internally drained basin bounded by outcrop of igneous and metamorphic basement rock complexes. The Sierra Nevada Range bounds the basin on the west, the Coso Range on the north, the Argus Range on the east, and the El Paso Mountains on the south. China Lake, a perennial lake, is situated in the central northeastern valley and is the primary natural groundwater discharge point.</p>        | <p>State of California Department of Water Resources (DWR), <a href="https://sgma.water.ca.gov/webgis/?appid=SGMADataViewer#boundaries">https://sgma.water.ca.gov/webgis/?appid=SGMADataViewer#boundaries</a> and <a href="https://water.ca.gov/-/media/DWR-Website/Web-Pages/Programs/Groundwater-Management/Bulletin-118/Files/2003-Basin-Descriptions/6_046_FremontValley.pdf">https://water.ca.gov/-/media/DWR-Website/Web-Pages/Programs/Groundwater-Management/Bulletin-118/Files/2003-Basin-Descriptions/6_046_FremontValley.pdf</a></p> |
| <i>Estimated Depth to First Occurrence of Ground water</i>             | <p>Based on groundwater monitoring for the nearby Beck Oil facility (approximately 2,200 feet south of the Subject Property), groundwater in some Inyokern Community Services District wells (located approximately 1,000-1,600 feet north of the that site and 600-1,200 feet south of the Subject Property) in March 2019 existed at an elevation of approximately 2,179 feet mean sea level (msl). Given an elevation of approximately 2,455 feet, groundwater existed at a depth of approximately 276 feet below ground surface.</p> | <p>California State Water Resources Control Board <a href="https://documents.geotracker.waterboards.ca.gov/esi/uploads/geo_report/8002862036/T0602999266.PDF">https://documents.geotracker.waterboards.ca.gov/esi/uploads/geo_report/8002862036/T0602999266.PDF</a></p>                                                                                                                                                                                                                                                                         |
| <i>Groundwater Basin</i>                                               | <p>The Subject Property lies in the Indian Wells Valley Groundwater Basin (6-054)</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                    | <p>California Department of Water Resources Bulletin 118 (<a href="https://data.cnra.ca.gov/dataset/ca-gw-basin-boundary-descriptions/resource/1e8223cf-2b08-42d4-9e28-486f4f856add">https://data.cnra.ca.gov/dataset/ca-gw-basin-boundary-descriptions/resource/1e8223cf-2b08-42d4-9e28-486f4f856add</a> )</p>                                                                                                                                                                                                                                 |
| <i>Hydrogeologic Gradient</i>                                          | <p>According to the Draft Base wide Investigation of Per- and Polyfluoroalkyl Substances report dated August 2019, shallow groundwater flow is generally to the northeast. For the purposes of this report, groundwater flow is assumed to flow to the northeast.</p>                                                                                                                                                                                                                                                                    | <p>California State Water Resources Control Board (<a href="https://documents.geotracker.waterboards.ca.gov/regulators/deliverable_documents/6091808497/Draft%20PFAS%20PAChina%20Lake%20-%20Part%201%20of%202.pdf">https://documents.geotracker.waterboards.ca.gov/regulators/deliverable_documents/6091808497/Draft%20PFAS%20PAChina%20Lake%20-%20Part%201%20of%202.pdf</a>)</p>                                                                                                                                                               |

## 2.4 Historical Topographic Maps

BSK reviewed available historical topographic maps obtained from EDR to gather information regarding the developmental history and land use of the Subject Property and immediate vicinity. Appendix A includes a copy of the Historical Topographic Map Report, dated October 8, 2025. Table 4 summarizes information obtained from the review of historical topographic maps. Since the historical topographic maps do not provide detail of structures or other features, no specific description is provided of the Subject Property and adjacent properties.

| Table 4<br>Review of Historical Topographic Maps |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
|--------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Year                                             | Property and Adjoining Property Observations                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| 1943                                             | A structure is visible along the western boundary of the Subject Property. Due to the age of the structure, it is common for termiticides and/or lead-based paint to be applied that qualify as an <b>on-Subject Property REC</b> . The town of Inyokern is visible to the west of the Subject Property. CA-178 is visible in its present-day location. CA-395 Hwy. is visible in the present-day location of Brown Rd. and parallel to a Southern Pacific rail line. The Southern Pacific rail line is adjacent west of the Subject Property. It is common for railroad users to dump materials off of the rail line, and rail line use is commonly associated with PCBs, heavy metals, and herbicides. Additionally, rail lines have the potential to have drains 3-5' beneath them, which could concentrate hazardous materials. This railroad qualifies as an <b>off-Subject Property REC</b> . Two oil tanks are depicted near the southwest corner of the Subject Property. These oil tanks qualify as <b>off-Subject Property RECs</b> . The Inyokern Airport is visible in its present-day location approximately 0.75 miles northwest of the Subject Property. An intermittent stream is visible approximately 0.75 miles to the northwest. The China Lake Naval Air Weapons Station boundary is visible approximately 0.25 miles to the east |
| 1947                                             | No significant changes from the 1943 topographic map.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| 1972                                             | The town of Inyokern has expanded to the west of the Subject Property. CA-395 is now in its present-day location to the east of the Subject Property. The China Lake Naval Air Weapons Station has expanded in the area adjacent north of the Subject Property. Due to the operations at the China Lake Naval Air Weapons Station, this area qualifies as an <b>off-Subject Property REC</b> . The oil tanks are no longer visible near the southwest corner of the Subject Property. No other significant changes from the 1947 topographic map.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| 2012                                             | The old railroad grade and Southern Pacific rail lines are no longer visible. On-ramp and off-ramps on CA-395 are now visible to the east of the Subject Property. No other significant changes from the 1972 topographic map.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| 2015                                             | No significant changes from the 2012 topographic map.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| 2018                                             | No significant changes from the 2015 topographic map.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| 2021                                             | No significant changes from the 2018 topographic map.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

## 2.5 Historical Aerial Photographs

BSK reviewed available historical aerial photographs obtained from EDR to gather information regarding the developmental history and land use of the Subject Property and vicinity. Appendix A includes a copy of EDR's Aerial Photo Decade Package, dated October 8, 2025. Table 5 summarizes information obtained from the review of the aerial photographs:

| Table 5<br>Review of Historical Aerial Photographs |                       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
|----------------------------------------------------|-----------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Year                                               | Observed Property Use | Property and Adjoining Property Observations ( <i>Scale: 1" = 500'</i> )                                                                                                                                                                                                                                                                                                                                                                                                     |
| 1948                                               | Vacant                | The Subject Property appears vacant. CA-178 is in its present-day location. The railroad is visible approximately 300 feet west of the Subject Property. As stated previously, this railroad qualifies as an <b>off-Subject Property REC</b> . Two oil tanks (assumed to be oil tanks based on the labeling on the topo maps) are visible between the railroad and the Subject Property. As stated previously, these oil tanks qualify as <b>off-Subject Property RECs</b> . |
| 1972                                               | Vacant                | The railroad and oil tanks appears to have been removed. The southern portion of the Subject Property along CA-178 appears to have been graded. CA-395 is visible in its present-day location. No other significant changes from the 1948 aerial photograph.                                                                                                                                                                                                                 |
| 1976                                               | Vacant                | The on-ramp and off-ramps for CA-395 are now visible. No significant changes from the 1972 aerial photograph.                                                                                                                                                                                                                                                                                                                                                                |
| 1985                                               | Vacant                | A dirt path is visible on the Subject Property. What appears to be standing water is visible along the southern boundary of the Subject Property. A building has been constructed on the south side of CA-178. A basin is visible approximately 400 feet northeast of the Subject Property. No other significant changes from the 1976 aerial photograph.                                                                                                                    |
| 1994                                               | Vacant                | No significant changes from the 1985 aerial photograph.                                                                                                                                                                                                                                                                                                                                                                                                                      |
| 2005                                               | Vacant                | The present-day Chevron is visible adjacent south of the Subject Property. The property south of CA-178 has expanded. No other significant changes from the 1994 aerial photograph.                                                                                                                                                                                                                                                                                          |
| 2010                                               | Vacant                | Vehicles are visible in the southwest corner of the Subject Property. No other significant changes from the 2005 aerial photograph.                                                                                                                                                                                                                                                                                                                                          |
| 2014                                               | Vacant                | No significant changes from the 2010 aerial photograph.                                                                                                                                                                                                                                                                                                                                                                                                                      |
| 2018                                               | Vacant                | No vehicles are visible in the southwest corner of the Subject Property. No other significant changes from the 2014 aerial photograph.                                                                                                                                                                                                                                                                                                                                       |
| 2022                                               | Vacant                | No significant changes from the 2018 aerial photograph.                                                                                                                                                                                                                                                                                                                                                                                                                      |

## 2.6 Historical Sanborn Fire Insurance Maps

According to EDR's Certified Sanborn® Map Report dated . Fire insurance maps covering the Subject Property were not found in their Sanborn Library. A copy of the Certified Sanborn® Map Report is included in Appendix A.

## 2.7 Historical Directories

BSK reviewed several directory reports provided by EDR to obtain information regarding former property occupants and to provide an indication of the property's former use. The Subject Property was searched in the available directory years including: 1976, 1980, 1985, 1990, 1992, 1995, 1996, 2000, 2005, 2010, 2014, 2017, and 2022. The Subject Property was not identified in the City Directory Report. The EDR-City Directory Image Report is dated October 14, 2025 and is included in Appendix A.

## **2.8 User-Provided Information**

As part of the All-Appropriate Inquiry (AAI) requirements required under ASTM E1527-21, Mr. Robbie Barker, the owner of the property, provided BSK with a completed user questionnaire dated October 6, 2025. Mr. Barker is not aware of any environmental conditions on the Subject Property. A copy of the questionnaire is included in Appendix B.

## **3. RECORDS REVIEW**

The purpose of the records review is to examine historic records concerning conditions on surrounding properties, including the Subject Property, which may represent a REC in relation to the Subject Property.

### **3.1 Standard Environmental Record Sources**

Federal, State, and local regulatory agencies maintain databases of businesses and properties that handle, store, and dispose of hazardous materials and/or wastes, and locations known to have had unauthorized releases of hazardous substances to soil and/or groundwater. These databases are available for review at the various regulatory agencies, or the information may be obtained from commercial data collection services. BSK Associates retained Environmental Data Resources (EDR) to perform the regulatory agency database search. The record search meets the government records search requirements of ASTM E 1527-21. EDR's findings are documented in the EDR-Radius Map™ Report, dated October 9, 2025 which is included in Appendix A.

Listed below are the facility listings identified on federal and state/tribal databases within the ASTM-required search distances from the approximate Subject Property boundaries. Database definition, descriptions, and the database search report are included in Appendix A.

| Table 6<br>Federal and State Database Search Results                                                                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                                           |          |

| <b>SEMS Archive</b>                                                                                                          | SEMS Archive refers to facilities that have been removed and archived from EPA's inventory of SEMS sites.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | 0.5                                       | 0        |
| <b>Resource Conservation and Recovery Act (RCRA) Corrective Action Report (CORRACTS)/ Treatment, Storage, Disposal (TSD)</b> | The EPA maintains a database of RCRA facilities associated with treatment, storage, and disposal (TSD) of hazardous waste that are undergoing "corrective action." A "corrective action" order is issued when there has been a release of hazardous waste or constituents into the environment from a RCRA facility.                                                                                                                                                                                                                                                                                 | 0.25                                      | 0        |
| <b>RCRA Non-CORRACTS/ TSD</b>                                                                                                | The RCRA Non-CORRACTS/TSD Database is a compilation by the USEPA of facilities which report storage, transportation, treatment, or disposal of hazardous waste. Unlike the RCRA CORRACTS/TSD database, the RCRA Non-CORRACTS/TSD database does not include RCRA facilities where corrective action is required.                                                                                                                                                                                                                                                                                      | 0.25                                      | 0        |
| <b>RCRA Generators</b>                                                                                                       | The RCRA Generators database, maintained by the EPA, lists facilities that generate hazardous waste as part of their normal business practices. Generators are listed as either large (LQG), small (SQG), or conditionally exempt (CESQG). LQG produce at least 1000 kg/month of non-acutely hazardous waste or 1 kg/month of acutely hazardous waste. SQG produce 100-1000 kg/month of non-acutely hazardous waste. CESQG are those that generate less than 100 kg/month of non-acutely hazardous waste.                                                                                            | Subject Property and adjoining properties | 1        |
| <b>IC / EC</b>                                                                                                               | A listing of sites with institutional and/or engineering controls in place. IC include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls. EC include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health. | 0.5                                       | 0        |
| <b>ERNS</b>                                                                                                                  | The Emergency Response Notification System (ERNS) is a listing compiled by the EPA on reported releases of petroleum and hazardous substances to the air, soil and/or water.                                                                                                                                                                                                                                                                                                                                                                                                                         | Subject Property                          | 0        |

| Table 6<br>Federal and State Database Search Results                  |                                                                                                                                                                                                                                                                                                                                            |                |          |

| <b>Underground Storage Tank (UST)/Above Ground Storage Tank (AST)</b> | State and/or Tribal database of registered storage tanks in the State of California which may include the owner and location of the tanks.                                                                                                                                                                                                 | 0.25           | 4        |
| <b>Voluntary Cleanup Program (VCP)</b>                                | State and/or Tribal facilities included as Voluntary Cleanup Program sites.                                                                                                                                                                                                                                                                | 0.5            | 0        |
| <b>Brownfields</b>                                                    | State and/or tribal listing of Brownfield properties addressed by Cooperative Agreement Recipients or Targeted Brownfields Assessments.                                                                                                                                                                                                    | 0.5            | 0        |

In addition to EDR, BSK reviewed the online databases for the following regulatory agencies to obtain reasonably ascertainable and practically reviewable documentation regarding RECs present at the property and adjacent facilities:

- State Water Resources Control Board (SWRCB), GeoTracker Website (<http://geotracker.waterboards.ca.gov/>)
- Department of Toxic Substances Control (DTSC), EnviroStor Website and Record Search (<http://www.envirostor.dtsc.ca.gov/public/>)
- California Environmental Protection Agency (CalEPA) Website (<https://siteportal.calepa.ca.gov/nsite/map/help>)
- California Geologic Energy Management Division (CalGEM) Database (<https://www.conservation.ca.gov/calgem/Pages/WellFinder.aspx>)
- U.S. Department of Transportation Pipeline and Hazardous Materials Safety Administration (PHMSA) Website ([www.npms.phmsa.dot.gov](http://www.npms.phmsa.dot.gov))

The Subject Property is not identified on the DTSC EnviroStor, SWRCB GeoTracker, CalEPA, CalGEM, PHMSA websites.

BSK submitted a public records request on October 8, 2025 to the Kern County Department of Public Health. On October 17, 2025, the County responded stating that the “potentially responsive departments have searched for your requested records and found no records responsive to this request.” A copy of the public records request is included in Appendix A.

The following table summarizes the Subject Property-specific information provided by the database and/or gathered by this office for identified facilities. Facilities are listed in order of proximity to the Subject Property. Additional discussion for selected facilities may follow the summary table. Acronyms and terms used in this report are described in Appendix A– Radius Map Report.

| Table 7<br>Listed Facilities                                                                                   |                                                        |                                                                                           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

| <b>Inyokern Chevron / Gateway Mkt. / AT&amp;T Mobility – China Lake / The Barn Inyokern</b><br>(6259 Hwy. 178) | Adjacent south / up-gradient                           | EDR Historic Auto, Historic UST, HAZNET, UST, CERS, CUPA Listings, SWEEPS UST, CA FID UST | This facility is documented as having a 12,000-gallon unleaded gasoline UST, an 8,000-gallon unleaded gasoline UST, a 10,000-gallon unleaded gasoline UST, a 6,000-gallon unleaded gasoline UST, and a 10,000-gallon diesel UST. This facility is also documented as a chemical storage facility. BSK did not see documentation of a release from this facility in the records reviewed, however, due to the distance and direction from the Subject Property, these USTs qualify as an <b>off-Subject Property REC.</b>                                                                                                                                                                                                                                                                                                                                                                                                               |
| <b>Naval Air Weapons Station – China Lake</b><br>(Adjacent North)                                              | Adjacent north / down-gradient                         | DOD                                                                                       | The Subject Property borders Naval Air Weapons Station – China Lake (China Lake NAWS). China Lake NAWS opened in 1943 as the Naval Ordnance Test Station at China Lake before expanded to support the Department of Defense and navy research, development, testing, and evaluation mission for air warfare systems. Since the mid-1980s, environmental investigations and restoration activities have been ongoing at China Lake NAWS with a total of 87 Installation Restoration Program Sites (IRPs) were identified. BSK did not see documentation of releases or groundwater impacts extending to the Subject Property in the records reviewed. According to the China Lake NAWS website, the nearest IRP is approximately 3.3 miles east of the Subject Property. However, due to the existence of hazardous materials and petroleum products on China Lake NAWS, this facility qualifies as an <b>off-Subject Property REC.</b> |

Confirmation soil samples showed TPH-diesel concentrations up to 22,100 mg/kg in the dispenser area and 9,750 mg/kg under Tank 1. Following site investigation activities, the SWRCB GeoTracker case was completed and closed in 2022. Due to the distance from the Subject Property, this release does not qualify as a REC. |

### 3.2 Previous Assessments

BSK was not provided a previous assessment for the Subject Property.

### 3.3 Subject Property Reconnaissance

In accordance with ASTM 1527-21, a Subject Property reconnaissance, which included an observation of the Subject Property and adjacent properties, was conducted by Ms. Jill Vieira of BSK on October 15, 2025. Subject Property photographs taken during this reconnaissance are included in Appendix C. The objective of the Subject Property reconnaissance was to observe Subject Property conditions and obtain information indicating the likelihood of identifying RECs, including hazardous substances and petroleum products, in connection with the Subject Property and/or adjacent properties (including soils, surface waters, and groundwater).

The Subject Property reconnaissance included observations of the Subject Property, the Subject Property's exterior periphery, and immediately adjacent properties. Immediately adjacent properties were observed from adjacent vantage points.

Table 8 provides a brief description of Subject Property observations encountered during the Subject Property reconnaissance. Please note, Table 8 does not include observations from the surrounding parcel, which includes the remainder of the facility (and consequently the same address).

| Table 8<br>Subject Property Observations                                                                                                         |          |              |                                       |
|--------------------------------------------------------------------------------------------------------------------------------------------------|----------|--------------|---------------------------------------|
| Observations or environmental conditions that may involve the use, storage, disposal or generation of hazardous substances or petroleum products | Observed | Not Observed | Description                           |
| Aboveground storage tank (AST)                                                                                                                   |          | X            |                                       |
| Air Emissions                                                                                                                                    |          | X            |                                       |
| Below grade vaults                                                                                                                               | X        |              | Underground utility cable. (Photo 30) |

| Wastewater Discharge                                                                                                                             |          | X            |                                                            |
| Water supplies (potable and process)                                                                                                             |          | X            |                                                            |
| Wells (irrigation, monitoring, or domestic)                                                                                                      |          | X            |                                                            |
| Wells (dry)                                                                                                                                      |          | X            |                                                            |
| Wells (Oil and Gas)                                                                                                                              |          | X            |                                                            |

It should be noted that the southwest corner of the Subject Property near the gas station was being used to store a car on a trailer during the Subject Property reconnaissance. There did not appear to be any spills or leakage around the trailered automobile.

### 3.4 Interviews

The Owner/Occupant Questionnaire was prepared by Mr. Robbie Barker, the owner of the Subject Property on October 6, 2025. According to Mr. Barker's responses, he is not aware of any environmental concerns on the Subject Property.

The completed questionnaire is included in Appendix D.

### 3.5 Migration and VES

Migration refers to the movement of hazardous substances or petroleum products in any form, including, for example, solid and liquid at the surface or subsurface, and vapor in the subsurface. A Vapor Encroachment Screen (VES) was conducted to comply with the requirements of ASTM E2600-10, "Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions." A VES is a high-level screening of available records to evaluate the likelihood of migration of volatile contaminants (generally excluding petroleum hydrocarbons from on-Subject Property sources) which may impact the Subject Property. The screening evaluates groundwater gradient, distance, migration pathways, barriers, and chemical specific characteristics to determine the likelihood of migration. A search of the available records was conducted by EDR as part of the screening evaluation. The VES identified the following Vapor Encroachment Concerns (VECs) in the vicinity of the Subject Property:

1. Kern County Roads Department (1533 2<sup>nd</sup> Street) – Petroleum Product Release

The VEC Screening Report is included in Appendix A.

#### 4 FINDINGS AND CONCLUSIONS

We have performed a Phase I ESA in general conformance with the scope and limitations of ASTM practice E 1527-21 for Kern County APNs: 084-010-43, 084-010-44, and a portion of 084-010-45 AND 084-010-48, in Inyokern, California. Any exceptions to, or deletions from, this practice are described in Section 1.6 of this report.

This assessment identified three (3) RECs in connection with the Subject Property. The RECs are as follows and are illustrated on Figure 2:

1. 1943 Topographic Map Structure – Potential Termiticide and/or Lead-based Paint
2. Asphalt road debris and concrete rubble – Potential Hazardous Materials
3. A small pile of tires

This assessment did not identify a CREC, HREC, or VEC in connection with the Subject Property.

This assessment identified six (6) RECs in the vicinity of the Subject Property. The RECs are as follows:

1. Railroad – Potential Petroleum Product and/or Hazardous Material Release
2. Former Oil Tanks in 1943 Topographic Map – Potential Petroleum Product Release
3. China Lake NAWS (Adjacent North) – Potential Petroleum Product and/or Hazardous Material Release
4. Inyokern Chevron / Gateway Mkt. / AT&T Mobility – China Lake / The Barn Inyokern (6259 Hwy. 178) – Potential Petroleum Product Release
5. Shell Service Station / Paul's Inyokern 76 / Suburban Propane – Inyokern / Texaco Service Station / Shawn's Auto Repair / Dry Lake Trucking Inc. (Hwy. 178 and Brown Rd.) – Potential Petroleum Product Release
6. Inyokern Market (1353 Brown Rd.) – Potential Petroleum Product Release

This assessment identified one (1) CREC in the vicinity of the Subject Property. The CREC is as follows:

1. Kern County Roads Department (1533 2nd St.) – Petroleum Product Release

This assessment did not identify a HREC in the vicinity of the Subject Property.

This assessment identified one (1) VEC in the vicinity of the Subject Property. The VEC is as follows:

1. Kern County Roads Department (1533 2<sup>nd</sup> Street) – Petroleum Product Release

## 5. RECOMMENDATIONS

Based on the intended use of the Subject Property as a data center, BSK recommends that the asphalt road debris, concrete rubble and small pile of tires be removed from the Subject Property and disposed of at appropriately permitted facilities and in accordance with local, State and federal laws and regulations. During the removal, BSK recommends observing the soil beneath the debris for evidence of contamination (i.e. staining, odor, etc.). If during future Subject Property development activities evidence of contamination is discovered, the signatories of this Report should be contacted immediately for further consultation. Excess soil should not be hauled off the Subject Property for reuse or disposal without adequate environmental evaluation. Based on the findings of this Phase I ESA, additional investigation (i.e. Phase II ESA) is not recommended.

## **7. ENVIRONMENTAL PROFESSIONAL STATEMENT AND SIGNATURES**

The signatories of this report declare that to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312. We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the property. We have developed and performed all appropriate inquiries in general conformance with the standards and practices set forth in 40 CFR Part 312. For copies of the resumes of said Environmental Professionals, please refer to Appendix E.

## EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 23), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

### EDR RECOVERED GOVERNMENT ARCHIVES

#### ***Exclusive Recovered Govt. Archives***

RGA LF..... Recovered Government Archive Solid Waste Facilities List  
RGA LUST..... Recovered Government Archive Leaking Underground Storage Tank

### SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

### STANDARD ENVIRONMENTAL RECORDS

#### ***Lists of Federal sites subject to CERCLA removals and CERCLA orders***

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 06/26/2025 has revealed that there is 1 SEMS site within approximately 0.5 miles of the target property.

#### ***Lists of Federal RCRA generators***

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or

## EXECUTIVE SUMMARY

dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 06/02/2025 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

### ***Lists of state and tribal leaking storage tanks***

LUST: Leaking Underground Storage Tank (LUST) Sites included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the LUST list, as provided by EDR, has revealed that there are 4 LUST sites within approximately 0.5 miles of the target property.

### ***Lists of state and tribal registered storage tanks***

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there are 6 UST sites within approximately 0.25 miles of the target property.

## EXECUTIVE SUMMARY

### **Local Lists of Registered Storage Tanks**

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 2 SWEEPS UST sites within approximately 0.25 miles of the target property.

### Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/02/2025 has revealed that there are 3 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

UST FINDER RELEASE: US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

A review of the UST FINDER RELEASE list, as provided by EDR, and dated 06/08/2023 has revealed that

## EXECUTIVE SUMMARY

there are 2 UST FINDER RELEASE sites within approximately 0.5 miles of the target property.

UST FINDER: EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories. UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

A review of the UST FINDER list, as provided by EDR, and dated 06/08/2023 has revealed that there are 2 UST FINDER sites within approximately 0.25 miles of the target property.

CUPA Listings: A listing of sites included in the county's Certified Unified Program Agency database. California's Secretary for Environmental Protection established the unified hazardous materials and hazardous waste regulatory program as required by chapter 6.11 of the California Health and Safety Code. The Unified Program consolidates the administration, permits, inspections, and enforcement activities.

A review of the CUPA Listings list, as provided by EDR, has revealed that there are 5 CUPA Listings

HIST CORTESE: The sites for the list are designated by the State Water Resource Control Board [LUST], the Integrated Waste Board [SWF/LS], and the Department of Toxic Substances Control [CALSITES]. This listing is no longer updated by the state agency.

A review of the HIST CORTESE list, as provided by EDR, and dated 04/01/2001 has revealed that there is 1 HIST CORTESE site within approximately 0.5 miles of the target property.

### EDR HIGH RISK HISTORICAL RECORDS

#### **EDR Exclusive Records**

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 2 EDR Hist Auto sites within approximately 0.125 miles of the target property.

## EXECUTIVE SUMMARY

There were no unmapped sites in this report.

# OVERVIEW MAP - 8134977.2S

 Target Property

 Sites at elevations higher than or equal to the target property

 Sites at elevations lower than the target property

 Manufactured Gas Plants

 National Priority List Sites

 Dept. Defense Sites

 Indian Reservations BIA

 Power transmission lines

 Special Flood Hazard Area (1%)

 0.2% Annual Chance Flood Hazard

 National Wetland Inventory

 State Wetlands

 Areas of Concern

This report includes Interactive Map Layers to display and/or hide map information. The legend includes only those icons for the default map view.

Environmental Interest/Information System:

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Site ID: 38509  
Site Name: INYOKERN MARKET  
Violation Date: 08-13-2018  
Citation: 23 CCR 16 2636(f)(5) - California Code of Regulations, Title 23,  
Chapter 16, Section(s) 2636(f)(5)

Violation Description: "Failure to meet one or more of the following monitoring requirements  
in lieu of the requirement to be tightness tested annually: The  
monitoring system maintains all product piping outside the dispenser  
to be fail-safe and shut down the pump when a leak is detected. The  
monitoring system shuts down the pump or stops flow when a leak is  
detected in the under dispenser containment (UDC)."

Violation Notes: Returned to compliance on 10/19/2018. The diesel satellite UDC failed  
to shut off flow at dispenser. As per tester, the controller is bad.  
Testing company will replace controller and retest then send retest

Violation Source: CERS,

Site ID: 38509  
Site Name: INYOKERN MARKET  
Violation Date: 08-29-2019  
Citation: 23 CCR 16 2712(b)(1)(F) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(F)  
Violation Description: "Failure to conduct secondary containment testing, or one or more of the following requirements: Perform the test of the secondary containment system upon installation, within six months of installation and every 36 months thereafter. Perform the test of a secondary containment component within 30 days of a repair or discontinuing vacuum, pressure or hydrostatic monitoring. Use a procedure that demonstrates the system works as well as at installation. Use applicable manufacturer guidelines, industry codes, engineering standard, or professional engineer approval. Performed by a certified service technician. Maintain records of secondary containment testing for 36 months."

Violation Notes: Returned to compliance on 08/29/2019. OBSERVATION: During the annual monitor certification of the UST system, it was determined that Inyokern Market failed to conduct their secondary containment testing (SB 989) no later than 36 months after the last test. The last test was done on June 8, 2016. The secondary containment test should have been conducted no later than June 8, 2019. CORRECTIVE ACTION: Inyokern Market scheduled the secondary containment test in concurrence with the annual monitor certification. Please send SB 989 test results to hazmatprogram@kerncounty.com

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

## STANDARD ENVIRONMENTAL RECORDS

### *Lists of Federal NPL (Superfund) sites*

#### NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

#### Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

|                                         |                                        |

|                                         | Data Release Frequency: Quarterly      |

#### NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Data Release Frequency: No Update Planned

### ***Lists of Federal Delisted NPL sites***

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 06/26/2025

### ***Lists of Federal sites subject to CERCLA removals and CERCLA orders***

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 05/05/2025  
Date Data Arrived at EDR: 06/20/2025  
Date Made Active in Reports: 08/27/2025  
Number of Days to Update: 68

Last EDR Contact: 09/23/2025  
Next Scheduled EDR Contact: 01/05/2026  
Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 06/26/2025  
Date Data Arrived at EDR: 07/01/2025  
Date Made Active in Reports: 07/17/2025

Data Release Frequency: Quarterly

### ***Lists of Federal CERCLA sites with NFRAP***

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

|                                         |                                        |

### ***Lists of Federal RCRA TSD facilities***

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

|                                         |                                         |

### ***Lists of Federal RCRA generators***

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

|                                         |                                         |

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

|                                         |                                         |
|-----------------------------------------|-----------------------------------------|

### RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

#### US INST CONTROLS: Institutional Controls Sites List

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

|                                         |                                         |

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## ***Federal ERNS list***

ERNS: Emergency Response Notification System

Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

Date of Government Version: 06/10/2025

Date Data Arrived at EDR: 06/12/2025

Date Made Active in Reports: 06/16/2025

Number of Days to Update: 4

Source: National Response Center, United States Coast Guard

Telephone: 202-267-2180

Last EDR Contact: 10/01/2025

Next Scheduled EDR Contact: 12/29/2025

Data Release Frequency: Quarterly

## ***Lists of state- and tribal (Superfund) equivalent sites***

RESPONSE: State Response Sites

Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity.

These confirmed release sites are generally high-priority and high potential risk.

Date of Government Version: 07/17/2025

Date Data Arrived at EDR: 07/17/2025

Date Made Active in Reports: 10/08/2025

Number of Days to Update: 83

Source: Department of Toxic Substances Control

Telephone: 916-323-3400

Last EDR Contact: 07/17/2025

Next Scheduled EDR Contact: 11/03/2025

Data Release Frequency: Quarterly

## ***Lists of state- and tribal hazardous waste facilities***

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

Date of Government Version: 07/17/2025

Date Data Arrived at EDR: 07/17/2025

Date Made Active in Reports: 10/08/2025

Number of Days to Update: 83

Source: Department of Toxic Substances Control

Telephone: 916-323-3400

Last EDR Contact: 07/17/2025

Next Scheduled EDR Contact: 11/03/2025

Data Release Frequency: Quarterly

## ***Lists of state and tribal landfills and solid waste disposal facilities***

SWF/LF (SWIS): Solid Waste Information System

Active, Closed and Inactive Landfills. SWF/LF records typically contain an inventory of solid waste disposal facilities or landfills. These may be active or inactive facilities or open dumps that failed to meet RCRA Section 4004 criteria for solid waste landfills or disposal sites.

Date of Government Version: 05/05/2025

Date Data Arrived at EDR: 05/06/2025

Date Made Active in Reports: 07/28/2025

Number of Days to Update: 83

Source: Department of Resources Recycling and Recovery

Telephone: 916-341-6320

Last EDR Contact: 07/31/2025

Next Scheduled EDR Contact: 11/17/2025

Data Release Frequency: Quarterly

## ***Lists of state and tribal leaking storage tanks***

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### LUST REG 4: Underground Storage Tank Leak List

Los Angeles, Ventura counties. For more current information, please refer to the State Water Resources Control Board's LUST database.

Date of Government Version: 09/07/2004  
Date Data Arrived at EDR: 09/07/2004  
Date Made Active in Reports: 10/12/2004  
Number of Days to Update: 35

Source: California Regional Water Quality Control Board Los Angeles Region (4)

## **ADDITIONAL ENVIRONMENTAL RECORDS**

### ***Local Brownfield lists***

### **US BROWNFIELDS: A Listing of Brownfields Sites**

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## *Local Lists of Landfill / Solid Waste Disposal Sites*

### WMUDS/SWAT: Waste Management Unit Database

Waste Management Unit Database System. WMUDS is used by the State Water Resources Control Board staff and the Regional Water Quality Control Boards for program tracking and inventory of waste management units. WMUDS is composed of the following databases: Facility Information, Scheduled Inspections Information, Waste Management Unit Information, SWAT Program Information, SWAT Report Summary Information, SWAT Report Summary Data, Chapter 15 (formerly Subchapter 15) Information, Chapter 15 Monitoring Parameters, TPCA Program Information, RCRA Program Information, Closure Information, and Interested Parties Information.

Date of Government Version: 04/01/2000

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### IHS OPEN DUMPS: Open Dumps on Indian Land

A listing of all open dumps located on Indian Land in the United States.

Date of Government Version: 02/07/2024

Date Data Arrived at EDR: 11/13/2024

Date Made Active in Reports: 11/19/2024

Number of Days to Update: 6

Source: Department of Health & Human Services, Indian Health Service

Telephone: 301-443-1452

Last EDR Contact: 07/17/2025

Next Scheduled EDR Contact: 11/03/2025

Data Release Frequency: Varies

### Local Lists of Hazardous waste / Contaminated Sites

#### US HIST CDL: National Clandestine Laboratory Register

A listing of clandestine drug lab locations that have been removed from the DEAs National Clandestine Laboratory Register.

Date of Government Version: 04/04/2025

Date Data Arrived at EDR: 06/02/2025

Date Made Active in Reports: 08/12/2025

Number of Days to Update: 71

Source: Drug Enforcement Administration

Telephone: 202-307-1000

Last EDR Contact: 08/21/2025

Next Scheduled EDR Contact: 12/01/2025

Data Release Frequency: No Update Planned

#### HIST CAL-SITES: Calsites Database

The Calsites database contains potential or confirmed hazardous substance release properties. In 1996, California EPA reevaluated and significantly reduced the number of sites in the Calsites database. No longer updated by the state agency. It has been replaced by ENVIROSTOR.

Date of Government Version: 08/08/2005

Date Data Arrived at EDR: 08/03/2006

Date Made Active in Reports: 08/24/2006

Number of Days to Update: 21

Source: Department of Toxic Substance Control

Telephone: 916-323-3400

Last EDR Contact: 02/23/2009

Next Scheduled EDR Contact: 05/25/2009

Data Release Frequency: No Update Planned

#### SCH: School Property Evaluation Program

This category contains proposed and existing school sites that are being evaluated by DTSC for possible hazardous materials contamination. In some cases, these properties may be listed in the CalSites category depending on the level of threat to public health and safety or the environment they pose.

Date of Government Version: 07/17/2025

Date Data Arrived at EDR: 07/17/2025

Date Made Active in Reports: 10/08/2025

Number of Days to Update: 83

Source: Department of Toxic Substances Control

Telephone: 916-323-3400

Next Scheduled EDR Contact: 04/27/2009  
Data Release Frequency: No Update Planned

### US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 04/04/2025  
Date Data Arrived at EDR: 06/02/2025  
Date Made Active in Reports: 08/12/2025

Next Scheduled EDR Contact: 10/27/2025  
Data Release Frequency: Quarterly

### Local Land Records

#### LIENS: Environmental Liens Listing

A listing of property locations with environmental liens for California where DTSC is a lien holder.

Date of Government Version: 05/30/2025  
Date Data Arrived at EDR: 05/30/2025  
Date Made Active in Reports: 08/18/2025  
Number of Days to Update: 80

Source: Department of Toxic Substances Control  
Telephone: 916-323-3400  
Last EDR Contact: 08/19/2025  
Next Scheduled EDR Contact: 12/08/2025  
Data Release Frequency: Varies

#### LIENS 2: CERCLA Lien Information

A Federal CERCLA ('Superfund') lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of these sites and properties.

Date of Government Version: 06/26/2025  
Date Data Arrived at EDR: 07/01/2025  
Date Made Active in Reports: 07/17/2025  
Number of Days to Update: 16

Telephone: 202-564-6023  
Last EDR Contact: 10/01/2025  
Next Scheduled EDR Contact: 01/05/2026  
Data Release Frequency: Semi-Annually

#### DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Date of Government Version: 05/23/2025  
Date Data Arrived at EDR: 05/23/2025

### Other Ascertainable Records

#### RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### EPA WATCH LIST: EPA Watch List

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

Date of Government Version: 08/30/2013  
Date Data Arrived at EDR: 03/21/2014

### 2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

Date of Government Version: 09/30/2017

Data Release Frequency: Annually

### SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

### RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

### RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

### HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

|                                         |                                           |

Data Release Frequency: Varies

### UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

### US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

### ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### PFAS TSCA: PFAS Manufacture and Imports Information

EPA issued the Chemical Data Reporting (CDR) Rule under the Toxic Substances Control Act (TSCA) and requires chemical manufacturers and facilities that manufacture or import chemical substances to report data to EPA. EPA publishes non-confidential business information (non-CBI) and includes descriptive information about each site, corporate parent, production volume, other manufacturing information, and processing and use information.

### PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST\_HANDLING\_INSTR), Non-hazardous waste description (NON\_HAZ\_WASTE\_DESCRIPTION), DOT printed information (DOT\_PRINTED\_INFORMATION), Waste line handling instructions (WASTE\_LINE\_HANDLING\_INSTR), Waste residue comments (WASTE\_RESIDUE\_COMMENTS).

### PFAS ATSDR: PFAS Contamination Site Location Listing

PFAS contamination site locations from the Department of Health & Human Services, Center for Disease Control & Prevention. ATSDR is involved at a number of PFAS-related sites, either directly or through assisting state and federal partners. As of now, most sites are related to drinking water contamination connected with PFAS production facilities or fire training areas where aqueous film-forming firefighting foam (AFFF) was regularly used.

### PFAS WQP: Ambient Environmental Sampling for PFAS

The Water Quality Portal (WQP) is a part of a modernized repository storing ambient sampling data for all environmental media and tissue samples. A wide range of federal, state, tribal and local governments, academic and non-governmental organizations and individuals submit project details and sampling results to this public repository. The information is commonly used for research and assessments of environmental quality.

### PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

### PFAS ECHO: Facilities in Industries that May Be Handling PFAS Listing

Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

### PFAS ECHO FIRE TRAIN: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilities name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

### PFAS PT 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration's document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

### UST FINDER RELEASE: UST Finder Releases Database

US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

### UST FINDER: UST Finder Database

EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories. UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

### CHROME PLATING: Chrome Plating Facilities Listing

This listing represents chrome plating facilities the California State Water Resources Control Board staff identified as possibly being a source of Per- and polyfluoroalkyl substance (PFAS) contamination. Sites and locations were identified by staff with the Division of Water Quality in the California State Water Board. Data was collected from the CA Air Resources Board 2013 and 2018 - Cr VI emission survey, CA Emission Inventory, CA HAZ Waste discharge database and by reviewing storm water permits. Former chrome plating sites are also included that are open site investigation or remediation cases with the Regional Water Quality Control Boards and the Department of Toxic Substances Control.

Next Scheduled EDR Contact: 01/12/2026  
Data Release Frequency: Quarterly

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### HWTS: Hazardous Waste Tracking System

DTSC maintains the Hazardous Waste Tracking System that stores ID number information since the early 1980s and manifest data since 1993. The system collects both manifest copies from the generator and destination facility.

Date of Government Version: 06/26/2025  
Date Data Arrived at EDR: 07/02/2025  
Date Made Active in Reports: 08/18/2025  
Number of Days to Update: 47

Source: Department of Toxic Substances Control  
Telephone: 916-324-2444  
Last EDR Contact: 09/23/2025  
Next Scheduled EDR Contact: 01/12/2026  
Data Release Frequency: Varies

### HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

Date of Government Version: 12/31/2024  
Date Data Arrived at EDR: 06/30/2025  
Date Made Active in Reports: 08/18/2025

### WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

Date of Government Version: 02/11/2021

### WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

### CERS: CalEPA Regulated Site Portal Data

The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

### EDR HIGH RISK HISTORICAL RECORDS

#### ***EDR Exclusive Records***

#### **EDR MGP: EDR Proprietary Manufactured Gas Plants**

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

### EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

### EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

### OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

#### CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 05/04/2025  
Date Data Arrived at EDR: 05/06/2025  
Date Made Active in Reports: 07/21/2025  
Number of Days to Update: 76

**Sensitive Receptors:** There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

### AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

### Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

### Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

### Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

### Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

### Daycare Centers: Licensed Facilities

Source: Department of Social Services

Telephone: 916-657-4041

**Flood Zone Data:** This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

**NWI:** National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

### TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

### TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General North

### SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

### FEMA FLOOD ZONE

| <u>Flood Plain Panel at Target Property</u> | <u>FEMA Source Type</u> |
|---------------------------------------------|-------------------------|
| 06029C1018E                                 | FEMA FIRM Flood data    |
| <u>Additional Panels in search area:</u>    | <u>FEMA Source Type</u> |
| 06029C1015E                                 | FEMA FIRM Flood data    |
| 06029C1020E                                 | FEMA FIRM Flood data    |

### NATIONAL WETLAND INVENTORY

| <u>NWI Quad at Target Property</u> | <u>NWI Electronic Data Coverage</u>            |
|------------------------------------|------------------------------------------------|
| INYOKERN                           | YES - refer to the Overview Map and Detail Map |

### HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

#### ***Site-Specific Hydrogeological Data\*:***

|                |            |
|----------------|------------|
| Search Radius: | 1.25 miles |
| Status:        | Not found  |

### AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

| <u>MAP ID</u> | <u>LOCATION FROM TP</u> | <u>GENERAL DIRECTION GROUNDWATER FLOW</u> |
|---------------|-------------------------|-------------------------------------------|
| Not Reported  |                         |                                           |

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

### GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

#### ROCK STRATIGRAPHIC UNIT

Era: Cenozoic  
System: Quaternary  
Series: Quaternary  
Code: Q (decoded above as Era, System & Series)

#### GEOLOGIC AGE IDENTIFICATION

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

### DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: CAJON

Soil Surface Texture: loamy sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Somewhat excessive. Soils have high hydraulic conductivity and low water holding capacity. Depth to water table is more than 6 feet.

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: MODERATE

Depth to Bedrock Min: > 60 inches

Depth to Bedrock Max: > 60 inches

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: fine sandy loam  
loam  
loamy fine sand  
coarse sand  
gravelly - fine sand  
sandy loam  
loamy coarse sand  
coarse sandy loam

Surficial Soil Types: fine sandy loam

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

loam  
loamy fine sand  
coarse sand  
gravelly - fine sand  
sandy loam  
loamy coarse sand  
coarse sandy loam

Shallow Soil Types: loamy sand  
sandy loam  
sandy clay loam  
clay loam  
loam  
gravelly - sandy loam

Deeper Soil Types: silt loam  
loamy fine sand  
very gravelly - loamy sand  
sandy loam

### LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

## TOPOGRAPHIC INFORMATION

### USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

### Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

## HYDROLOGIC INFORMATION

**Flood Zone Data:** This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

**NWI:** National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

### State Wetlands Data: Wetland Inventory

Source: Department of Fish and Wildlife

Telephone: 916-445-0411

## HYDROGEOLOGIC INFORMATION

### AQUIFLOW<sup>R</sup> Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

## GEOLOGIC INFORMATION

### Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

### STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

### SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

## LOCAL / REGIONAL WATER AGENCY RECORDS

### FEDERAL WATER WELLS

#### PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

#### PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

#### USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

## OTHER STATE DATABASE INFORMATION

### Groundwater Ambient Monitoring & Assessment Program

State Water Resources Control Board

Telephone: 916-341-5577

The GAMA Program is California's comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Health Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

### Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

### California Drinking Water Quality Database

Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

### Geothermal Wells Listing

Department of Conservation

Telephone: 916-445-9686

Geothermal well means a well constructed to extract or return water to the ground after it has been used for heating or cooling purposes. Geothermal wells in California (except for wells on federal leases which are administered by the Bureau of Land Management) are permitted, drilled, operated, and permanently sealed and closed (plugged and abandoned) under requirements and procedures administered by the Geothermal Section of the Department of Conservation's Geologic Energy Management Division (CalGEM, formerly DOGGR).

### California Oil and Gas Well Locations

Source: Dept of Conservation, Geologic Energy Management Division

Telephone: 916-323-1779

Oil and Gas well locations in the state.

## PHYSICAL SETTING SOURCE RECORDS SEARCHED

### California Earthquake Fault Lines

Source: California Division of Mines and Geology

The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

### RADON

#### State Database: CA Radon

Source: Department of Public Health

Telephone: 916-210-8558

Radon Database for California

#### Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

#### EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

### OTHER

Airport Landing Facilities: Private and public use landing facilities

Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater

Source: Department of Commerce, National Oceanic and Atmospheric Administration

California Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines, prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by BSK & Associates were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting [www.edrnet.com/sanborn](http://www.edrnet.com/sanborn).

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

## Certified Sanborn Results:

### UNMAAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

Sanborn® Library search results

Certification #: A61B-4570-858F

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- ☒ Library of Congress
- ☒ University Publications of America
- ☒ EDR Private Collection

*The Sanborn Library LLC Since 1866™*

### Limited Permission To Make Copies

BSK & Associates (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

## EXECUTIVE SUMMARY

### DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available business directory data at approximately five year intervals.

### RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

### RESEARCH SUMMARY

### Environmental Interest/Information System:

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

The Click here to access additional FINDS: detail in the EDR Site Report. database contains <http://www.edrnet.com/srf2/FinalSiteReport.aspx?ID=4n84mPnEf85t2f6mkXPc79BqEfUf7o3Mg5QLtf02BnfBo6tE6EyK.UXW07x9cBH7q66UYB85qRjBZhQqUl49LO7yho8c4HbnUZ8WU2eCm8LPt8UJEbZf4D3ZH5GdtjV2lffoi6ea2vQkE0XxYBf4cyV7394aNBaqxt7CDfjVUjl4NfnzC8qb3D9mTPPp32zZEEsfDdAE055ytUu3u5fUG62u5zqkhBX.U6KGc2e70bBq.B0vqvZ9K8fueUJQ9cG7Z8oTl1CbMPsgKm487Q9.LSku3qfAw0Y.4qHnaM8WU3damwYPMJ2wTETlfrY3B.5sqtGG2F6fPP6ud44rk0bXbd5cecYy78h4TmBpiqgi93wUfUsUtg9937XuohL8M6MB5gwd6E3QR0Lb64obfRa0Ee2> additional records for this site. | Violation Description: | "Failure to meet one or more of the following monitoring requirements in lieu of the requirement to be tightness tested annually: The monitoring system maintains all product piping outside the dispenser to be fail-safe and shut down the pump when a leak is detected. The monitoring system shuts down the pump or stops flow when a leak is detected in the under dispenser containment (UDC)."                                                                                                                                                             |
| Violation Notes:       | Returned to compliance on 10/19/2018. The diesel satellite UDC failed to shut off flow at dispenser. As per tester, the controller is bad. Testing company will replace controller and retest then send retest results to hazmatprogram@kerncounty.com                                                                                                                                                                                                                                                                                                            |

| Violation Description: | Failure to have an approved UST Monitoring Plan.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| Violation Notes:       | Returned to compliance on 06/16/2020. OBSERVATION: According to the CERS UST monitoring page, the UDC's are equipped with beaudreu standalone sensors. During the annual monitor certification of Inyokern UST system, it was determined that the UDC's are actually equipped with 001 veeder root sensors. The serial sensor number listed on the sensors is 392455 330212-001. CORRECTIVE ACTION: Log in to CERS to update the UDC's as they are monitored by the Veeder Root (392455 330212-01) sensors. Submit the UST element once all corrections are made. |

MAP FINDINGS

**INYOKERN MARKET, 1353 BROWN RD, INYOKERN, CA 93527 (Continued)**

Violation Description: Failure to comply with one or more of the following: Failure to install or maintain a liquid-tight spill bucket. Have a minimum capacity of five gallons. Have a functional drain valve or other method for the removal of liquid from the spill bucket/spill container. Be resistant to galvanic corrosion.

Violation Notes: Returned to compliance on 08/14/2017. Observed the diesel spill bucket to fail to hold at least 5 gallons. Adapter cleaned and repaired and spill bucket re-tested. Corrected on-site.

Violation Division: Kern County Env Health Services Department

Violation Program: UST

Violation Source: CERS,

Site ID: 38509

Site Name: INYOKERN MARKET

Violation Date: 08-10-2022

Citation: HSC 6.7 25293 - California Health and Safety Code, Chapter 6.7, Section(s) 25293

Violation Description: Failure to maintain UST records in sufficient detail to enable the UPA to determine whether the UST systems are in compliance.

Violation Notes: Returned to compliance on 03/27/2025. Observation: Daily alarm logs for TLS-350 Veeder-Root alarm panel were not available at the time of inspection. Corrective Action: Maintain daily alarm log for TLS-350 Veeder-Root alarm panel. Send August 2022 and September 2022 daily alarm log to Kern County Environmental Health Division. Attn: Christian Iwuchukwu (Email: iwuchukwu@kerncounty.com; Fax: 661-862-8701).

| Violation Description: | Failure to obtain an Identification Number prior to treating, storing, disposing of, transporting or offering for transportation any hazardous waste.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| Violation Notes:       | Returned to compliance on 12/11/2019. OBSERVATION: Failure to obtain an EPA number as this facility reports to store hazardous waste. CORRECTIVE ACTION: Contact the Department of Toxic Substances Control (DTSC) to obtain an EPA id number. Once an EPA ID number has been assigned, log into CERS to report the EPA number.                                                                                                                                                                                                                                                                                                                                                                         |

| Violation Description: | "Failure to conduct secondary containment testing, or one or more of the following requirements: Perform the test of the secondary containment system upon installation, within six months of installation and every 36 months thereafter. Perform the test of a secondary containment component within 30 days of a repair or discontinuing vacuum, pressure or hydrostatic monitoring. Use a procedure that demonstrates the system works as well as at installation. Use applicable manufacturer guidelines, industry codes, engineering standard, or professional engineer approval. Performed by a certified service technician. Maintain records of secondary containment testing for 36 months." |
| Violation Notes:       | Returned to compliance on 08/29/2019. OBSERVATION: During the annual monitor certification of the UST system, it was determined that Inyokern Market failed to conduct their secondary containment testing (SB 989) no later than 36 months after the last test. The last test was done on June 8, 2016. The secondary containment test should have been conducted no later than June 8, 2019. CORRECTIVE ACTION: Inyokern Market scheduled the secondary containment test in concurrence with the annual monitor certification. Please send SB 989 test results to hazmatprogram@kerncounty.com                                                                                                        |

| Eval Notes:        | Please read through the inspection report as you will find violation(s) that were issued at the time of the inspection. In the report you will find that I have provided instructions on how to return to compliance. You will have thirty (30) days from the date the violation(s) were cited to come into full compliance. Once all violations have been completed, sign the last page of this inspection report to confirm full compliance has been met and send it to me via email at shamoone@kerncounty.com Should you have any questions, please don't hesitate to contact me |

 Eval Notes:

Please read through the inspection report as you will find violation(s) that were issued at the time of the inspection. In the report you will find that I have provided instructions on how to return to compliance. You will have thirty (30) days from the date the violation(s) were cited to come into full compliance. Once all violations have been completed, sign the last page of this inspection report to confirm full compliance has been met and send it to me via email at [shamoone@kerncounty.com](mailto:shamoone@kerncounty.com) Should you have any questions, please don't hesitate to contact me

### Worksheet:

Impact on Target Property: VEC Exists

### HIST UST: Local Lists of Registered Storage Tanks

Name: INYOKERN ROAD YARD  
 Address: SECOND STREET  
 City,State,Zip: INYOKERN, CA 93527  
 File Number: 00024bc9  
 URL: <https://documents.geotracker.waterboards.ca.gov/ustpdfs/pdf/00024bc9.pdf>  
 Region: STATE  
 Facility ID: 00000018005  
 Facility Type: Other  
 Other Type: GARAGE  
 Contact Name: O. DOTY  
 Telephone: 8058612159  
 Owner Name: KERN COUNTY PUBLIC WORKS-ROADS  
 Owner Address: 1600 NORRIS ROAD  
 Owner City,St,Zip: BAKERSFIELD, CA 93308  
 Total Tanks: 0002  
 Tank Num: 001  
 Container Num: 1  
 Year Installed: Not Reported  
 Tank Capacity: 00001000  
 Tank Used for: PRODUCT  
 Type of Fuel: UNLEADED  
 Container Construction Thickness: Not Reported  
 Leak Detection: Stock Inventor

MAP FINDINGS

Request

We are preparing a Phase I Environmental Site Assessment for Kern County APNs 084-010-45, 084-010-44, 084-010-43, and 084-010-48 and would like to formally request any documents related to petroleum products and/or hazardous materials for the Site. We are interested in any records related to environmental closure reports, spill reports, cleanup reports, environmental assessments, remediation records, UST records, AST records, etc. Additionally, we would like to request any building department records for the Site.

## APPENDIX B

**Phase I Environmental Site Assessment Client Questionnaire**  
**ASTM 1527-21: All Appropriate Inquiries**

Property Location:  
APN#:

- 1) Are you aware of any environmental cleanup liens against the *property* that are filed or recorded under federal, tribal, state, or local law?

I am not aware of any environmental cleanup liens against the property.

- 2) Are you aware of any *Activity and Land Use Limitations* (AULs) such as *engineering controls*, land use restrictions, or *institutional controls* that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state, or local law?

I am not aware of any activity and land use limitations or institutional controls filed against the property.

- 3) As the *user* of this ESA do you have any specialized knowledge or experience related to the *property* or nearby properties? For example, are you involved in the same line of business as the current or former *occupants* of the *property* or an adjoining *property* so that you would have specialized knowledge of the chemicals and processes used by this type of business?

No. I have no specialized knowledge of the previous owner's experience on the site. I am unaware of any chemicals or other processes being used on the site.

- 4) Does the purchase price being paid for this *property* reasonably reflect the fair market value of the *property*? If you conclude that there is a difference, have you considered whether the lower price is because contamination is known or believed to be present at the *property*?

Yes. Property reasonably reflects the fair market value.

5) Are you aware of commonly known or *reasonably ascertainable* information about the *property* that would help the *environmental professional* to identify conditions indicative of releases or threatened releases? For example, as the *user*:

a) Do you know the past uses of the *property*?

No knowledge of past uses on the property. It is undeveloped land.

b) Do you know of specific chemicals that are present or once were present at the *property*?

No knowledge of past uses on the property.

c) Do you know of spills or other chemical releases that have taken place at the *property*?

No knowledge of spills.

d) Do you know of any environmental cleanups that have taken place at the *property*?

No knowledge of cleanups of property.

6) As the *user* of this *ESA*, based on your knowledge and experience related to the *property* are there any *obvious* indicators that point to the presence or likely presence of contamination at the *property*?

No knowledge or indication of contamination on the property.

## Glossary of Terms:

Activity and Land Use Limitations: legal or physical restrictions or limitations on the use of, or access to, a site or facility; (1) to reduce or eliminate potential exposure to *hazardous substances* or *petroleum products* in the soil or groundwater on the *property*, or (2) to prevent activities that could interfere with the effectiveness of a response action, in order to ensure maintenance of a condition of no significant risk to the public health or the environment. These legal or physical restrictions, which may include institutional or *engineering controls*, are intended to prevent adverse impacts to individuals or populations which may be exposed to *hazardous substances* and *petroleum products* in the soil or groundwater on the *property*.

All Appropriate Inquiry: that inquiry constituting “all appropriate inquiry into the previous ownership and uses of the property consistent with commercial or customary practice” as defined in CERCLA, 42 U.S.C. §9601 (35)(B), that will qualify a party to a *commercial real estate transaction* for one of threshold criteria for satisfying the LLPs to CERCLA liability (42 U.S.C. §9601 (35)(A) & (B), §9607(b)(3), §9607(q); and §9607(r)), assuming compliance with other elements of the defense.

Commercial Real Estate: any real *property* except a dwelling or *property* with no more than four dwelling units exclusively for residential use (except that a dwelling or *property* with no more than four dwelling units exclusively for residential use is included in this term when it has a commercial function, as in the building of such dwellings for profit). This term includes but is not limited to undeveloped real property and real property used for industrial, retail, office, agricultural, other commercial, medical, or educational purposes; *property* used for residential purposes that has more than four residential dwelling units for residential use when it has a commercial function, as in the building of such dwellings for profit.

Commercial Real Estate Transaction: a transfer of title to or possession of real *property* or the receipt of a security interest in real *property*, except that it does not include transfer of title to or possession of real *property* or the receipt of a security interest in real *property* with respect to an individual dwelling or building fewer than five dwelling units, nor does it include the purchase of a lot or lots to construct a dwelling for occupancy by a purchaser, but a *commercial real estate* transaction does include real *property* purchased or leased by persons or entities in the business of building or developing dwelling units.

Engineering Controls: physical modifications to a site or facility (for example: capping, slurry walls, or point of use water treatment) to reduce or eliminate the potential for exposure to *hazardous substances* or *petroleum products* in the soil or groundwater on the property. Engineering controls are a type of activity and use limitation (AUL).

Environmental Professional: a person meeting the education, training, and experience requirements as set forth in 40 CFR §312.10(b). The person may be an independent contractor or an employee of the *user*.

Environmental Site Assessment (ESA): the process by which a person or entity seeks to determine if a particular parcel of real *property* (including improvements) is subject to *recognized environmental conditions*. At the option of the *user*, an ESA may include more inquiry than that constituting *all appropriate inquiry* or, if the *user* is not concerned about qualifying for the *LLPs*, less inquiry than that constituting *all appropriate inquiry*. An ESA is both different from and less rigorous than an environmental compliance audit.

Hazardous Substance: a substance defined as a hazardous substance pursuant to CERCLA 42 U.S.C. §9601(14), as interpreted by EPA regulations and the courts: “(A) any substance designated pursuant to section 1321(b)(2)(A) of Title 33, (B) any element, compound, mixture, solution, or substance designated pursuant to section 9602 of this title, (C) any *hazardous waste* having the characteristics identified under or listed pursuant to section 3001 of the Resource Conservation and Recovery Act of 1976 (RCRA), as amended, (42 U.S.C. §6921), (but not including any waste the regulation of which under RCRA(42 U.S.C. §§6901 *et. seq.*) has been suspended by Act of Congress), (D) any toxic pollutant listed under section 1317(a) of Title 33, (E) any hazardous air pollutant listed under section 112 of the Clean Air Act (42 U.S.C. 7412), and (F) any imminently hazardous chemical substance or mixture with respect to which the Administrator (of EPA) has taken action pursuant to section 2606 of Title 15. This term does not include petroleum, including crude oil or any fraction thereof which is not otherwise specifically listed or

designated as a hazardous substance under subparagraphs (A) through (F) of this paragraph, and the term does not include natural gas, natural gas liquids, liquefied natural gas, or synthetic gas usable for fuel (or mixtures of natural gas and such synthetic gas).

Hazardous Waste: any hazardous waste having the characteristics identified under or listed pursuant to section 3001 of RCRA, as amended, (42 U.S.C. §6921) (but not including any waste the regulation of which under RCRA (42 U.S.C. §§6901-6992k) has been suspended by Act of Congress). RCRA is sometimes also identified as the Solid Waste Disposal Act. RCRA defines a hazardous waste, at 42 U.S.C. §6903, as : “a solid waste, or combination of solid wastes, which because of its quantity, concentration, or physical, chemical, or infectious characteristics may – (A) cause, or increase in serious irreversible, or incapacitating reversible, illness; or (B) pose a substantial present or potential hazard to human health or the environment when improperly treated, stored, transported, or disposed of, or otherwise managed.”

Institutional Controls: a legal or administrative restriction (for example, deed restrictions,” restrictive covenants, easement or zoning) on the use of, or access to, a site or facility to (1) reduce or eliminate potential exposure to *hazardous substances* or *petroleum products* in the soil or ground water on the *property*, or (2) to prevent activities that could interfere with the effectiveness of a response action, in order to ensure maintenance of a condition of no significant risk to public health or the environment.

Occupants: those tenants, subtenants, or other persons or entities using the *property* or a portion of the *property*.

Owner: generally the fee owner of record of the property.

Petroleum Products: those substances included within the meaning of the petroleum exclusion to CERCLA, 42 U.S.C. §9601(14), as interpreted by the courts and EPA, that is: petroleum, including crude oil or any fraction thereof which is not otherwise specifically listed or designated as a *hazardous substance* under Subparagraphs (A) through (F) of 42 U.S.C. §9601(14), natural gas, natural gas liquids, liquefied natural gas, and synthetic gas usable for fuel (or mixtures of natural gas and such synthetic gas).

Property: the real *property* that is the subject of the *environmental site assessment* described in this practice. Real *property* includes buildings and other fixtures and improvements located on the *property* and affixed to the land.

Reasonable Ascertainable: information that is (1) *publicly available*, (2) obtainable from its source within reasonable time and cost constraints, and (3) *practically reviewable*.

Recognized Environmental Conditions (RECs): the presence or likely presence of any *hazardous substances* or *petroleum products* on a *property* under conditions that indicate an existing release, a past release, or a material threat of a release of any *hazardous substances* or *petroleum products* into structures on the property or into the ground, groundwater, or surface water of the property. The term includes hazardous substances or petroleum products even under conditions in compliance with the laws. The term is not intended to include de minimis conditions that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be de minimis are not RECs.

User: the party seeking to use Practice E 1527 to complete an environmental site assessment of the property. A *user* may include, without limitation, a potential purchaser of the *property*, a potential tenant of the *property*, an owner of the *property*, a lender, or a *property* manager.

## APPENDIX D

Environmental Due Diligence  
Owner/Occupant Questionnaire

*Please complete a response to each question to the best of your knowledge.*

1. Information about the person completing the questionnaire form:

Name: [Robbie Barker](#)

Date: [10/6/2025](#)

- Telephone Number: [760-264-5760](#)
- Email: [rbarker@vwconstructionservices.com](mailto:rbarker@vwconstructionservices.com)
- Address: [PO Box 907, Trona, CA 93592](#)
- What is your relationship to the site? [Owner](#)
- What year did your first-hand knowledge of the site begin? [2025](#)

2. Site Address and/or APN Number(s):

- Data center: [084-010-43, -44 and -45 and](#)
- SCI POI: [APN 084-010-48 \(SCE POI Only\)](#)

3. Size of the site in acres: [approximately 50 acres](#)

4. Site Ownership and Usage:

- Site owner: [R&L Capital, Inc.](#)
- Site occupants and site use(s): [NA - undeveloped land](#)
- When was the Site first occupied? [NA - undeveloped land](#)
- What is the Site history and current use? [- undeveloped land](#)
- Previous site owners and occupants: [Unknown / undeveloped land](#)
- Date(s) of property transfers/lease: [No leased land](#)

5. Site Features and Conditions:

- Did the site ever have or currently have the following? (Please circle or highlight)

Underground storage fuel tanks - [No](#)

Above-ground storage tanks - [No](#)

Ponds, pits or lagoons - [No](#)

Septic tank - [No](#)

Water wells or disposal wells - [No](#)

Wash rack area - [No](#)

Storm drains- [No](#)

Electric transformers - [No](#)

Stationary hydraulic lifts - [No](#)

Fill material or imported soil - [No](#)

Pipelines - [No](#)

Rail line or rail spurs - [No](#)

Environmental Due Diligence  
Owner/Occupant Questionnaire

*Please complete a response to each question to the best of your knowledge.*

Stained soils or sheen on water - **No**

Use of pesticides - **No**

Other:

If so, please describe the nature of any releases including any hazardous substances.

**None that are known.**

6. To your knowledge are you aware of the following past or present conditions, if so please describe:

- Previous site activities or operations including manufacturing, dry cleaning, vehicle repair, photo-processing, junkyard or waste storage, recycling facility, painting facility or pest control facility, or other industrial or commercial operations that may store or dispose of waste:

**NA - Undisturbed land**

- Previous environmental assessments or investigations, if so when?

**None known of at this time**

- Materials that contained lead-based paint or asbestos or surveys conducted to determine the presence of these materials:

**None known of at this time. There are no structures on site.**

- Waste generation or disposal on site and types of hazardous substances or petroleum:

**None known of at this time**

- Environmental liens against the property, if so please describe:

**None known of at this time**

- Notice of violations for environmental concerns from a regulatory agency:

**None known of at this time**

- Other Information: **None**

7. Utilities: Please describe the name of service providers for the following:

- Water supply - **TBD**
- Gas and electricity: **PGE / SCE**
- Heating oil: **NA**

Environmental Due Diligence  
Owner/Occupant Questionnaire

*Please complete a response to each question to the best of your knowledge.*

- Sanitary sewer disposal: [On site septic system](#)
- Garbage disposal: [Inyo County Waste Management / Waste Management](#)
- Industrial wastewater disposal: [NA](#)
- Storm water disposal: [on site retention basin\(s\)](#)

## APPENDIX E

## Kevin Grove – Environmental Branch Manager

### Professional Background:

Mr. Grove graduated from the University of California, Davis in March 2013. His academic background includes a Bachelor of Science in Environmental Policy Analysis and Planning. Following graduation and an internship with Yolo County Transportation District, Mr. Grove accepted a full-time staff planner position with BSK.

Mr. Grove has managed Phase I Environmental Site Assessments (ESA), Phase II ESAs, aerially deposited lead surveys, paint-stripe sampling and analysis, compost facility permitting, and Waste Discharge Requirement (WDR) facility permitting,. Additionally, Mr. Grove has interpreted aerial photographs, prepared GIS Figures, and conducted a 1600 Permit Vegetation Inventory, Ordinary High-Water Mark and Wetland Delineation Surveys. He prepares California Environmental Quality Act documentation, including Environmental Impact Reports for proposed projects. His work includes conducting special studies, section writing reference development, and quality assurance.

### Relevant Experience:

#### Phase I Environmental Site Assessments

**Numerous Sites** – Conducted and provided technical oversight for over 30 Phase I Environmental Site Assessment (ESA) sites for banks, lenders, developers, schools, transportation projects, and public agencies throughout California.

**EPA Brownfields Assessment Grant, Oroville, California** – Kevin performed five Phase I ESAs as part of an Environmental Protection Agency (EPA) Brownfields Grant. In addition to the Phase I ESAs, Mr. Grove conducted the brownfields inventory for the area identified as IU2, south of Oroville's downtown area. Approximately 60 properties were identified from databases, site reconnaissance, and properties of interest to the City and community members. Kevin created a database linking the key information to data obtained through EDR, site photographs and created an interactive base map. Sites were screened against criteria and ranked in order of priority.

**EPA Brownfields Assessment Grant, Rancho Cordova, California** – Kevin performed six Phase I ESAs as part of an EPA Brownfields Assessment Grant. In addition to the Phase I ESAs, Mr. Grove conducted the Brownfields petroleum inventory for the area identified as Folsom Boulevard Planning Area. Approximately 44 properties were identified from databases, site reconnaissance, and property of interest to the City.

### Qualifications

#### Registrations / Certificates:

#### Education:

BS, Environmental Policy  
Analysis & Planning,  
University of California,  
Davis 2013

#### Experience:

**BSK Associates**, Staff  
Planner-October 2013 to  
Current

**Yolo County  
Transportation District**,  
Transportation Planning  
Intern-June 2013 to  
October 2013

## Kevin Grove – Environmental Branch Manager

---

Kevin created a database linking the key information to data obtained through outside vendors, site photographs, etc., and created an interactive base map. Sites were screened against criteria and ranked in order of priority.

### **Aerially Deposited Lead and Paint-Stripe Surveys**

**Kern County Public Works Roadway Improvement Projects** – Mr. Grove managed numerous aerially deposited lead (ADL) and paint-stripe surveys throughout Kern County. Mr. Grove successfully coordinated encroachment permits, traffic control subcontractors, scheduling with County officials, sampling procedures, laboratory analysis, data review, and reporting.

### **Site Assessment**

**Lafayette Elementary School Addition (Former Lafayette Public Library), Lafayette, California** – Mr. Grove performed the Phase I ESA and helped prepare a Preliminary Endangerment Assessment (PEA) for the addition to this elementary school. The scope of work included an ESA in accordance with California Education Code Sections 17210 and 17213.1 which also included evaluation for radon, naturally occurring asbestos (NOA) and mercury. Based on the results of the ESA, a PEA was required to address possible migration of dry-cleaning chemicals in groundwater from a nearby site and sampling of the near-surface soils for lead, termiticides and other pesticides. Following the PEA, Mr. Grove assisted with the preparation and implementation of a Removal Action plan of affected soil at the Site.

**Kilgore Property – Proposed Entertainment Center, EPA Brownfields Phase II ESA, City of Rancho Cordova, California** – Using GIS, Kevin created all site maps and figures for the project area. Kevin assisted with the ecological screening evaluation to determine the potential presence of endangered species on site. Kevin also conducted inventory, documentation, and graphical representation of all soil samples from the project. Kevin assisted with the writing of the Quality Assurance Project Plan (QAPP).

**Utility Pole Storage, Phase I/II ESA, Oroville, California** – Mr. Grove prepared a Phase I ESA for a utility pole storage facility. The poles were stored in a former lumber yard with wood treatment processes. Following the Phase I ESA, Mr. Grove prepared a Phase II ESA to evaluate the impact to soil and chemical related to the wood treatment processes.

**City of Winters, PG&E Training Center, Phase II ESA, Yolo County, California** – Phase II ESA was completed for the McIish Property, which is the future location of the PG&E Training Center. Kevin created site maps and figures for the project area using GIS software. These maps included monitoring well locations and ground water flow direction.

**Numerous Solar Facilities, California** – Mr. Grove prepared numerous Phase I and Limited Phase II ESAs for solar facilities throughout California. The limited Phase II ESAs included soil sampling, geophysical surveys, underground utility locating, and soil vapor sampling.

### **CEQA / NEPA Services**

***Grapevine Shopping Center Project, Kern County, California*** – Kevin assisted with the Environmental Impact Report for the construction of an approximately 45-acre shopping center located in Delano, California. The proposed project includes a movie theater, regional shopping center, multiple fast food restaurants and quality restaurants.

***Los Banos Landfill-Clean Closure Project, Initial Study/Mitigated Negative Declaration (IS/MND), Los Banos, California*** – Mr. Grove prepared an IS/MND for the Old Los Banos Landfill – Clean Closure Project. The project included the removal of waste and cover soils from the inactive City of Los Banos Landfill. Under the project, the removed waste was then transported to Bill Wright Landfill in Los Banos, or Kettleman Hills Landfill in Kettleman City, depending upon the waste profile.

***Livermore Composting Facility, IS/MND, Livermore, California*** – Kevin prepared an IS/MND for a new composting facility in Livermore, California, per the California Environmental Quality Act (CEQA). Mr. Grove distributed the CEQA document to the appropriate agencies, responded to public comments, and provided information to the lead agency for their decision.

***Big Sandy Rancheria Expansion, NEPA Environmental Assessment, Fresno County, California*** – Mr. Grove prepared a Bureau of Indian Affairs (BIA) approved environmental assessment (EA) for the expansion of Big Sandy Rancheria in Auberry, California. The expansion included 32 homes, a community garden, a baseball diamond, a community park, and a maintenance building on 71 acres of undeveloped trust land. In addition to the above infrastructure, the project included the construction of access roads, supporting power infrastructure, phone lines, and a consolidated community septic system. This project was performed under the National Environmental Policy Act (NEPA).

***Putah Creek Channel Restoration, NEPA Environmental Assessment, Winters, California*** – Kevin prepared a United States Army Corps of Engineers (USACE) approved EA for the Putah Creek Channel Restoration in Winters, California. The EA covered three distinct project areas for a combined area of 98 acres and 14,400 linear feet of Putah Creek. Mr. Grove prepared a variety of permits for the project, including a Biological Assessment, Clean Water Act 401 permit and certification, a USACE Nationwide Permit, a USACE Pre-Construction Notification, a Section 7 consultation under the Endangered Species Act with the US Fish and Wildlife Service (USFWS) and USACE, a USFWS 1600 streambed alteration agreement, a construction stormwater pollution prevention plan (SWPPP), a workers environmental awareness plan (WEAP) and a wetland delineation. Mr. Grove also facilitated a cultural resources study under the State Historic Preservation Office (SHPO) regulations.

***Walnut Park Project – Winters, California*** – Mr. Grove prepared a variety of permits for the proposed park, including a Biological Assessment, Clean Water Act 401 permit and certification, a US Army Corps of Engineers (USACE) Nationwide Permit, a USACE Pre-Construction Notification, a Section 7 consultation under the Endangered Species Act with the US Fish and Wildlife Service and USACE, a construction stormwater pollution prevention plan (SWPPP), a workers environmental awareness plan (WEAP) and a wetland delineation. The project received all environmental clearance permits and was completed in 2018.

**Heather Farm Park, Walnut Creek, California** – Mr. Grove oversaw the biological and cultural investigations for the project prior to construction. He oversaw the enforcement of required mitigation measures, including an initial habitat assessment, burrowing owl survey, nesting bird survey, and cultural survey. Following these mitigation measures, environmental clearance was granted, and construction was able to commence on the project.

### CEQA / NEPA Special Studies

#### **Air Modeling and Reporting**

- CalEEMod
- Caline4
- CT-EMFAC 5

#### **Noise Modeling**

- Federal Highway Administrations (FHWA) Traffic Noise Model TNM 2.5
- FHWA Roadway Construction Noise Model RCNM

### Biological Resources

**Walnut Park Project, Yolo County, California** – Prepared as part of a team the Biological Assessment for the construction of an approximately 5-acre park. The project includes playfields, benches and ancillary play structures.

**Putah Creek Restoration Projects, Yolo and Solano County, California** – Mr. Grove conducted as part of a team the 1600 Permit, Vegetation Inventory Surveys, mapped various species of trees using GPS locations, tree diameters, and aerial photograph interpretations.

Mr. Grove as part of a team also conducted Ordinary High-Water Mark and Wetland Delineation surveys using centimeter accuracy GPS equipment.

**Pleasants Dixon Main Drain/V-Drain Enlargement Project – Burrowing Owl Protocol Survey, Dixon, CA** – Mr. Grove assisted with a burrowing owl survey to determine the potential presence of burrowing owls on the project site.

**Pleasants Creek Bank Stabilization Project – Breeding Bird Survey, Vacaville, CA** – Mr. Grove assisted with a breeding bird survey to determine the potential presence of breeding birds on the project site.

### Asbestos-Containing Building Material and Lead-Based Paint Surveys

**Numerous Projects, California** – Mr. Grove managed numerous projects that required asbestos-containing building material and lead-based paint surveys throughout California. Mr. Grove was responsible for coordinating with subcontractors who would perform the sampling and analysis and provide abatement specifications. Mr. Grove reported the findings of these surveys to clients in addition to other site investigation activities.

### **Stormwater Pollution Prevention Plans (SWPPP)**

**Numerous Projects, California** – Mr. Grove aided QSDs with the preparation and implementation of multiple SWPPP reports. Projects included but were not limited to stream channel restoration, athletic field construction, and park construction. He is trained for on-site water sampling, BMP inspection, and monitoring. He also has experience with the SMARTS online permitting process for Risk Levels 1, 2 and “exempt” projects.

### **Spill, Prevention, Control, and Countermeasure (SPCC) Plans**

**Multiple Projects, California and Nevada** – Mr. Grove conducted multiple SPCC site inspections to document the inventory and location of hazardous materials at aggregate facilities throughout northern California and Nevada. Mr. Grove provided technical oversight of the SPCC plans during their implementation at each respective Site. Kevin has also prepared training materials for workers at the facilities where the SPCC is implemented.

### **Compost Facility Permitting**

**Multiple Projects, California** – Mr. Grove has prepared numerous Technical Reports as required under the State Water Resources Control Board (SWRCB) General Waste Discharge Requirements for Composting Operations. These reports include general site descriptions, site maps, operation details, climatology data, geologic setting, hydrogeologic setting, design information, and monitoring information. These Technical Reports allowed each compost facility to receive coverage under the Compost General Order. In addition, Mr. Grove has assisted with the monitoring required under this General Order and the annual reporting.

### **Professional Affiliations:**

American Public Works Association

## Robert “Tony” Martin, PG – Principal Geologist

### Professional Background:

Mr. Martin began his career as a geologist in 1987. His academic background includes a Bachelor's, and Post-Baccalaureate studies in Geology at California State University at Fresno. Additionally, Mr. Martin has taken dozens of continuing education classes in hazardous materials, geology, groundwater, environmental chemistry/engineering/law, management and leadership from various colleges across the US. He has been an officer in numerous professional and community-based organizations; and managed professional/technical staff of over 250 people. He has negotiated and coordinated with local, state and federal oversight agencies in the southwestern U.S., and presented to the public at a variety of public participation meetings. Mr. Martin's technical expertise includes environmental consulting, project management and expert witness services for multi-disciplined projects, site assessment, remediation, water resource and CEQA / NEPA related services for transportation, energy, industrial, water, solid waste and Brownfields projects.

### Relevant Experience:

#### Phase I Environmental Site Assessments

**Numerous Sites**-Conducted and provided technical oversight for hundreds of Phase I Environmental Site Assessment (ESA) sites for banks, lenders, developers, schools, public agencies, and Fortune 500 companies throughout the western United States. Many of the ESAs were used to provide information for the hazardous materials sections of Environmental Impact Reports (EIRs).

**Stockton Highway 99 Corridor ISA**-Mr. Martin managed, conducted and provided technical oversight for a Caltrans Initial Site Assessment (ISA). The corridor was over 7 miles in length and extended from the interchange with SR-4 to Hammer Lane in Stockton, California. This corridor through an older, industrialized area of town had approximately 9 sets of on-/off-ramps onto this 4-lane highway. The project involved widening the freeway to six lanes, improving sight lines, adding acceleration and deceleration lanes, reducing the number of ramps, and bringing the remaining interchanges up to more modern-day standards.

The project evolved into several Preliminary Site Investigations (PSIs) and Detailed Site Investigations (DSIs) for the areas of concern which included underground storage tanks, ponds, equipment storage yards, wash racks and smaller salvage yards. The PSI also included an Aerially Deposited Lead (ADL) study.

### Qualifications

#### Registrations / Certificates:

Geologist (P.G.)  
CA – No. 6768, 1998  
Geologist (R.G.)  
OR – No. G2817, 2022  
Geologist (L.G.)  
WA – No.22020436, 2022  
Responsible Managing Employee (RME), California  
- C57 #467252  
2/13/2003 to 9/2/2011  
- C57 #490942  
2/6/2018 to Present  
HAZWOPPER trained  
per 40CFR1910.120

#### Education:

Fundamentals of Professional Practice, ASFE, 2000  
Numerous continuing education courses in hazardous materials, geology, environmental law, management and leadership.  
Post-Baccalaureate Studies in Geology, California State University Fresno, 1986-1987  
B.A., Geology, California State University Fresno, 1986

#### Experience:

BSK Associates- 2013 to Present  
Terracon- 2011 to 2013  
Kleinfelder- 1994 to 2011  
Krazan- 1987 to 1993

## Robert Tony Martin PG – Principal Geologist

***Stanislaus County Measure L Sidewalks/Street Improvement Project, Stanislaus County, California***-Mr. Martin managed the entire project (geotechnical and hazardous materials services), conducted and provided technical oversight for a Caltrans Initial Site Assessment (ISA) and an Aerially Deposited Lead (ADL) Study. The project included 4 separate areas throughout the County. All of the areas were in or near very old residential areas. Two of the areas also covered some industrial areas. The geotechnical investigation and the ADL Study were each summarized into one report. Whereas, the ISAs were done as four separate reports.

***Bradshaw/Sheldon Intersection Improvement Project, Elk Grove, California***-Mr. Martin managed the entire project (geotechnical and hazardous materials services) and provided technical oversight for an Aerially Deposited Lead (ADL) Study. The project consisted of replacing the existing bridge at the Sheldon Road and Bradshaw Road intersection with a precast reinforced concrete box culvert (RCBC). The existing bridge was constructed in 1940 and widened in 1970 and was supported on shallow foundations. The RCBC was approximately 260 feet long (oriented northeast to southwest), 35 feet wide (three segments of 10-feet clear width), and approximately 6 feet clear height. The new intersection design consisted of a roundabout and approximately 600 feet of roadway realignment in each direction to accommodate the new intersection. Portions of the Laguna Creek were rerouted near the intersection. This necessitated filling in portions of the existing creek on the northeast side of the intersection and excavating new portions of creek on the southwest and northeast side of the intersection.

***Numerous Transportation Sites***-Mr. Martin managed, conducted and provided technical oversight for many Phase I Environmental Site Assessment (ESA) for transportation projects. For California transportation projects, the work was done to satisfy the Caltrans Initial Site Assessment (ISA) guidelines, as well as the current American Society of Testing Materials (ASTM) standard and the USEPA All Appropriate Inquiry (AAI) requirements. Some of the projects evolved into Preliminary Site Investigations (PSIs) and Detailed Site Investigations (DSIs) for the areas of concern which included underground storage tanks, ponds, equipment storage yards, wash racks and smaller salvage yards. Additionally, Aerially Deposited Lead (ADL) Studies were frequently conducted. Some of the projects included portions of SR 180 in southern Fresno, State Route 4 (“Crosstown Freeway”) in Stockton, several interchanges along I-5 through San Joaquin County and in Southern California, a small portion of State Route 120 in Escalon, the Jack Tone / SR99 Interchange in Ripon, and portions of the I-710 Gap Project east of Los Angeles. Many of the ESAs were also used to provide information for the hazardous materials sections of Environmental Impact Reports (EIRs). The assessments were done in conjunction with the Caltrans design teams or for local self-help agencies.

***Dougherty Valley High School Expansion Project, San Ramon, California***-Conducted portions of, and provided technical oversight for, a Phase I Environmental Site Assessment for a large addition project at an existing high school. The site was given a letter of no further action by the State of Toxic Substances Control without any Preliminary Endangerment Assessment (PEA) services being required.

## Robert Tony Martin PG – Principal Geologist

***Proposed Sand Lane Elementary School, Manteca, California***-Conducted portions of, and provided technical oversight for, a Phase I Environmental Site Assessment (ESA), for a proposed elementary school. That ESA was used as the basis for the hazardous materials section of an Environmental Impact Report (EIR). Also, completed the geology and groundwater sections for that EIR.

***Lafayette Elementary School Addition (Former Lafayette Public Library), Lafayette, California***-Mr. Martin was the project manager and provided technical oversight of a Phase I Environmental Site Assessment (ESA), a Preliminary Endangerment Assessment (PEA), a Supplemental Site Investigation, a Remedial Action Workplan, remedial activities, and a Remedial Action Report for the addition to this elementary school. The scope of work included an ESA in accordance with California Education Code Sections 17210 and 17213.1 which included evaluation for radon, naturally occurring asbestos (NOA) and mercury. Based on the results of the ESA, a PEA was required to address possible migration of dry cleaning chemicals in groundwater from a nearby site and sampling of the near-surface soils for lead, termiticides and other pesticides. Termiticides were found to be present immediately surrounding the building which required cleanup. The cleanup was handled most economically and expeditiously by digging up the shallow soils and disposing of the soil offsite. However, there were challenges such as protecting some adjacent large trees whose wellbeing had to be preserved during digging near their roots.

***Bristow Middle School Theater, Brentwood, California***-Mr. Martin was the project manager (for part of the project) and provided technical oversight of a Phase I Environmental Site Assessment (ESA), a Preliminary Endangerment Assessment (PEA), for the addition to this middle school. The addition was most recently part of a City park, but at one time was part of an old oilfield. The scope of work included an ESA in accordance with California Education Code Sections 17210 and 17213.1. Based on the results of the ESA which included some limited environmental sampling for residual ag chemicals, a geotechnical investigation and geohazards investigation, a PEA was required to address vertical and lateral extent of residual organochlorine pesticides. This PEA is still underway.

***Multiple Wineries, Napa Valley, Lodi, Ripon, Woodbridge and Manteca, California***- Mr. Martin managed and/or provided technical oversight for Phase I Environmental Site Assessments for property sale/refinance for numerous properties within Northern California.

***Confidential Agricultural Chemical Facility, Sacramento Valley, California***-Conducted portions of, and provided technical oversight for, a Phase I Environmental Site Assessment for an agricultural chemical facility which was in an industrial area with other agricultural chemical facilities nearby. Recognized Environmental Concerns (RECs) and Historical RECs were identified, and subsequent Phase II Environmental Site Assessments were performed.

### **Site Assessment / Phase II Environmental Site Assessments**

***Multiple Transportation Projects in California***-Mr. Martin managed, conducted or provided technical oversight for the hazardous materials investigation (RI/FS, or Caltrans PSI / DSI) for many transportation projects including the State Route 120 (SR 120) relocation project through the City of Escalon, the Jack Tone

## Robert Tony Martin PG – Principal Geologist

/ SR 99 interchange in Ripon, many investigations along the SR 99 Improvement Project through Stockton, numerous interchanges along I-5 throughout California, portions of the I-710 Gap Project east of Los Angeles, and the SR 4 extension through San Joaquin County. . The projects each included the assessment of multiple properties including hazardous waste sites, bulk oil distributors, fuel stations, garages, naturally occurring asbestos (NOA) and numerous other potential environmental concerns. Many of these projects were done for the local self-help agency, or the design teams for said agencies or Caltrans. All received Caltrans and/or FHA funding. The findings were also sometimes included in the Environmental Impact Reports for the projects.

***Lemoore Naval Air Station, Lemoore, California***-Mr. Martin provided technical interpretation/oversight, regulatory agency negotiation, and project management services for a site assessment and mitigative measures related to a release of approximately 6,600 gallons of fuel to shallow groundwater that occurred on the base over approximately 2 days. The release produced vapor intrusion into a building that caused immediate evacuation of the facility on the base.

***Travis Air Force Base, Fairfield, California***-Provided technical interpretation, regulatory agency negotiation, and project management services for numerous environmental (RI/FS) projects on the base. The work included the investigation of Ramps 400 / 500 during a time of heightened military alert status.

***Fresno Yosemite International Airport (FAT), Fresno, California***- Managed and technically oversaw a Preliminary Site Investigation (PSI) for Per- and Polyfluoroalkyl Substances (PFAS) for the Fresno Yosemite International Airport. The airport is a joint civil-military airport that is owned and operated by the City of Fresno. In addition to providing commercial air services, FYI is home base to the California Air National Guard 144th Fighter Wing, the California Army National Guard Aviation Classification Repair Activity Depot (AVCRAD), and the US Forest Service (USFS) / California Department of Forestry (CDF) Air Attack Base. The airport was originally founded as Hammer Airfield in June 1942 and was used as a training facility by the United States Army Air Forces during World War II. After the end of World War II, commercial air service began in 1948. The investigation of the 13 potential release areas included the advancement of 41 shallow borings, the installation of 4 temporary groundwater monitoring wells (maximum depth of 140 feet), the installation of 2 permanent groundwater monitoring wells (maximum depth of 150 feet), the collection and chemical analysis of subsurface soil and groundwater samples, data analysis, and preparation of a report of findings. The investigation is currently still underway.

***Stockton Metropolitan Airport (SCK), Stockton, California***- Mr. Martin managed and technically oversaw a Preliminary Site Investigation (PSI) for Per- and Polyfluoroalkyl Substances (PFAS) for the Stockton Metropolitan Airport. The work addressed included the advancement of twenty (20) shallow borings, the installation of six (6) temporary groundwater monitoring wells, collection and chemical analysis of subsurface soil samples and groundwater, data analysis, and preparation of a report of findings for the 3 potential release areas on the airport. The workplan for the next phase of the investigation is currently still underway.

## Robert Tony Martin PG – Principal Geologist

***Numerous Underground Storage Tank Sites, California***-Managed all phases of over 200 underground fuel storage tank removal sampling projects throughout California for Chevron USA, Shell Oil Company, ARCO, Mobil Oil Company and many other clients. Many of these projects required follow-up investigations (RI/FS) and remediation.

***Shuttered Industrial Facility, Colusa County, California***- Mr. Martin managed and provided technical oversight for an RI/FS of a shuttered industrial facility that had 1,1-DCA, 1,1-DCE, PCE, TCE, 1,4-Dioxane, metals, Cr+6, and fuels in soil and shallow groundwater beneath the site. The last of the RI/FS and sensitive receptor survey is being completed at this time, and interim remedial measures are being undertaken pending conception and approval of a Remedial Action Plan.

***Proposed M4 Elementary School, Fresno, California***-Provided technical oversight of a Preliminary Endangerment Assessment (PEA) and conducted, managed and provided technical oversight of a cleanup for a large proposed elementary school. The site had underground fuel storage tanks, improperly abandoned domestic wells, asbestos and lead based paints in existing residences, and pesticides (predominantly termiticides) in the shallow soils. This cleanup was conducted while protecting an adjacent middle school and residences from exposure resulting from the cleanup. All phases of the work managed by Mr. Martin were also conducted at or below budgets.

***Confidential Former Dry Cleaner Site, Eastern San Francisco Bay Area, California***-Mr. Martin managed, provided technical oversight and provided expert witness-related services for a former dry cleaner with soil and groundwater contamination. Groundwater was present beneath the site at a depth of approximately 25 feet below the surface in a two-zone unconfined aquifer. The site is surrounded by three or more UST sites with comingled plumes. Mr. Martin and his project team investigated the dual zone aquifer with numerous monitoring wells ranging in depth from 40 to 100 feet below the ground surface over an area of approximately 6 square blocks. Additionally, vapor encroachment of perchloroethylene (PCE) and related compounds was investigated, and risk assessed. Indoor air for commercial and residential properties were sampled and evaluated. A feasibility study (FS) was submitted which recommended a combined technology of in-situ chemical reduction and enhanced microbial degradation. Also, the FS proposed passive subslab vapor venting once a building is constructed. A remedial action plan (RAP) and notice of intent (NOI) was submitted and approved. Remediation is pending.

***Major Oil Company Bulk Plant, Tulare County, California***-Managed and/or provided internal oversight for all phases of an RI/FS project which involved the installation of approximately seventeen temporary groundwater monitoring wells, over one dozen permanent monitoring wells, quarterly monitoring, aquifer testing, and remedial system evaluation for a site with up to one foot of free-phase product involving one or more of the following petroleum products: gasoline, diesel, mineral spirits, kerosene, and weed oil. The plume was later noted to extend to approximately 1/2 of a mile from the project site towards a National Priorities List site within an aquifer of extremely high transmissivity.

## Robert Tony Martin PG – Principal Geologist

**Major Oil Company Bulk Plant, Kern County, California**-Managed and provided oversight for all phases of an RI/FS project which involved the installation of approximately eighteen exploratory soil borings at an oil company bulk plant. Investigation was continued to a depth of approximately 150 feet below ground surface and groundwater was present at that time at over 210 feet below the ground surface. The contaminants of concern were both gas and diesel. Site closure was obtained for the client without any active remediation.

**Kozy Shack Pudding Plant, Turlock, California**-Mr. Martin conducted and managed a Phase II Environmental Site Assessment of this food processing facility which included a magnetometer, electromagnetometer and ground penetrating radar survey of suspected UST locations and soil and groundwater sampling.

**Large Box Retailer Development Site, Kern County, California**-Provided project management and overall project oversight for site assessment of a retail development where a portion of the property had been previously used for the storage of vacuum truck tank bottoms and other solids and semi-solids derived from oilfield operations in the area. The solids covered a large area of the property but was found to be limited in their vertical extent (upper 25 feet).

**Retail Distribution Center, Merced, California**-Provided project management and overall project oversight for an RI/FS project which included the installation of approximately six groundwater monitoring wells, the excavation of approximately 1,500 cubic yards of diesel fuel contaminated soil, the quarterly monitoring of said groundwater monitoring wells, and the construction of a surface impoundment for the bioremediation of the diesel-impacted soil which took 6 weeks to degrade concentrations of TPH-D from several thousand parts per million to less than 20 parts per million.

**North Fork Ranger Station, Madera County, California**-Managed and provided oversight for various phases of several projects at the North Fork Ranger Station. Those projects included, but were not limited to, site assessments (RI/FS) of 12 underground storage tank sites, a Pesticide Storage Building site assessment, miscellaneous herbicide spill locations, an aeration project, a diesel bioremediation project, and risk assessments. Some of the field assessment was done in Level B and Level C PPE.

**Pipeline Leak Site, Avila Beach, California**-Managed the emergency initial site investigation (RI/FS) services for this pipeline leak site. The pipeline carried semi-refined crude oil/diesel fuel/unleaded gasoline from an offshore handling facility to a bulk handling facility located on the city's main street. Investigative techniques included a detailed soil vapor contaminant assessment, the advancement of soil borings, and the sampling of groundwater using a Hydropunch and numerous monitoring wells. The aquifer was tested, and tidal fluctuations and groundwater gradient were monitored using dataloggers. The study area covered approximately 6 to 12 square blocks. The emergency investigative services included discrete nighttime services during spring break. Mitigative activities conducted for this pipeline leakage has reportedly totaled over \$100 million.

## Robert Tony Martin PG – Principal Geologist

**Former Chrome Plating Facility, Fresno County, California-**Managed and provided technical oversight of an investigation under State of California Department of Toxics Substances Control (DTSC) regulatory oversight of a facility with near surface soil contaminated by cadmium, cyanide and lead. Soil vapor beneath portions of the site was impacted by PCE, TCE and other volatile organics. Groundwater contains PCE, TCE, Cyanide, Cr+6, and other metals. The site is near a few residential structures and a school and is still under investigation at this time.

**Potential Pipeline Leak Site, Tracy, California-**Provided senior level review and quality control for a future industrial site which was developed on a site which had a crude oil pipeline that was to be relocated. Investigative techniques included soil sampling and an infrared aerial survey of the pipeline to note temperature gradients which might have been indicative of backfilled excavations and/or leakage.

**Confidential Agricultural Chemical Burial Site, Fresno County, California-** Mr. Martin provided project management and overall technical oversight for a project which included review of another consultants Phase I ESA, developed an approach for a Phase II ESA, and implementation of the Phase II. During those site assessment activities, approximately 3 dozen drums containing agricultural chemicals as well as miscellaneous farm/home refuse were discovered. Upon its discovery Mr. Martin's team oversaw the excavation, overpacking and disposal of the drums containing chemicals, investigation of the burial area for information as to who buried the materials and when, overexcavation of contaminated soil and confirmation sampling. Later, Mr. Martin provided expert witness and percipient witness testimony in the cost recovery litigation for the discovery. That litigation was successful.

**Tire Fire Site, Fresno, California-** Mr. Martin managed and provided technical oversight of a bank owned site that had a large tire fire. The tires smoldered for months leaving a fine ash high in semi-volatiles and metals. A biodegradable polymer fixent was sprayed over the ash to limit airborne dust from impacting nearby residents and to inhibit leaching. Additionally, site security measures were implemented to prevent trespassing. Later the ash (with polymer) was removed and hauled to a hazardous waste disposal facility and confirmation testing was done to confirm the adequacy of excavation.

**Quitclaimed Pipeline Easement, Gustine, California-**Managed this project which involved third-party observation and review of a crude oil cleanup performed by an oil company in a large farm complex. The cleanup involved the excavation and disposal of over 100,000 cubic yards of contaminated soil by the oil company. Successfully provided expert witness support to the farming operation's litigation team.

**Confidential Agricultural Facility, San Joaquin County, California-**Managed, interpreted, provided technical oversight and supplied technical support and expert witness services to a litigation team for a defendant who was being sued by an adjacent property owner due to high groundwater conditions and elevated nitrates in the shallow perched groundwater. Additionally, worked to optimize water use, implement best management practices related to water and fertilizer use and provide subsurface assessment of the vadose zone, perched aquifer and deep unconfined aquifer on the subject site and adjacent properties. Ongoing monitoring required by the State of California RWQCB was also conducted. This project is still ongoing.

## Robert Tony Martin PG – Principal Geologist

***Confidential Agricultural Facility, Kern County, California***-Managed, interpreted, provided technical oversight and supplied technical support to a litigation team for a property owner with agricultural chemicals in soil of a chemical mixing area of a large farm complex. Work was conducted in Level C PPE.

***Confidential Oil Field, Los Angeles County, California***-Managed and provided technical oversight of ongoing methane monitoring of both abandoned and active wells in accordance with local community, county, and State of California Division of Oil, Gas, and Geothermal Resources (DOGGR) standards and regulations.

***Confidential Residential and Park Development Site, Former Pipeline Leak Location, Tracy, California***-Managed, interpreted, provided technical oversight and supplied technical support and expert witness services to a litigation team for a residential development on a site which had a historic pipeline that carried crude oil and semi-refined product. Investigative techniques included soil and groundwater sampling, working cooperatively with the oil company and their consultant to develop a soil management plan for any future discovered contamination, work with the developer's counsel to draft disclosure language to future home buyers and work as an expert witness with the developer's counsel for cost recovery.

***PG&E Maintenance Facility, Fresno, California***-Managed, interpreted, provided technical oversight to a prime consulting firm for a RI/FS of PCBs in shallow soil. Fieldwork was conducted in Level C PPE.

***Confidential Residential Development Site, Former Pipeline Leak Location, Santa Nella, California***-Managed this project which involved third-party observation and review of a crude oil cleanup performed by an oil company on a large residential development.

The cleanup involved the excavation and disposal of millions of cubic yards of contaminated soil by the Oil Company, dewatering and treatment of groundwater, additional site assessment in the pipeline ROW, risk assessment and formulation of a soil management plan. Mr. Martin also worked with the developer's counsel on cost recovery, which to date has been settled out of court.

### **Water Supply**

***Confidential Property, Central Coast, California*** – A permit for surface water diversion and use was filed with the State of California Water Resources Control Board (SWRCB) in 1989 for this Central Coast site. The use of the water was to be for fire protection, stock watering, irrigation and domestic use. The permit was approved in 1996. A site inspection was conducted by the SWRCB in 2007. The site was noted to be out of compliance with the approved permit. Upon realizing they were out of compliance, BSK was contracted to get the project back on track so that the water rights would not be lost. Mr. Martin managed and provided technical oversight for the licensing project. As part of the project, Mr. Martin oversaw the review, data analysis and summary of approximately seven years of back-data that had gone unreported. He specified a variety of measuring devices for the diversion, the onsite water storage ponds and another onsite water source. He reviewed contractor submittals during a retrofit project for the measuring devices. Generally

## Robert Tony Martin PG – Principal Geologist

speaking, the site has a “Permit for Diversion and Water Use”. After issuance, the applicant was required to do ongoing submissions while the “project” was being completed. Now that the project is completed, the permit is awaiting licensing by the SWRCB.

### **Wastewater / Waste Discharge Requirements (WDRs)**

***City of Auburn Wastewater Treatment Plant, Auburn, California*** – Mr. Martin managed and provided technical oversight of WDR ground and surface water monitoring for a municipal wastewater treatment plant whose effluent is discharged to a surface water body. Additionally, Mr. Martin cooperatively worked with two other firms to identify problems with the treatment system that allowed high coliform bacteria concentrations to make it into groundwater and the plant effluent. This was long term work that was performed over a period of about a decade.

***Multiple Wineries, Napa Valley, Lodi, Ripon, Woodbridge and Manteca, California***- Mr. Martin managed and/or provided technical oversight for Waste Discharge Requirement (WDR) monitoring of groundwater, wastewater, land application areas, etc., design of land application areas and a variety of other related services. On many of these projects services were provided for 10-15 years or more.

***Rosedale Spreading Basin WDRs, Kern County, California***- Mr. Martin managed and/or provided technical oversight for Waste Discharge Requirement (WDR) monitoring of groundwater and a variety of other related services.

***Pacific Coast Producers, Woodland and Oroville, California***- Mr. Martin managed and provided technical oversight of the production of a Sampling and Analysis Plan (SAP), and ongoing groundwater monitoring for these facilities. The Woodland facility is reportedly one of the world’s largest retail tomato canning facilities. The Oroville facility cans peaches, pears, fruit cocktails as well as some salsas.

***California Natural Products, Lathrop, California***- Mr. Martin managed and provided technical oversight negotiations with the State of California Central Valley Regional Water Quality Control Board, Waste Discharge Requirement (WDR) monitoring of groundwater, wastewater, land application areas, etc., production of a Sampling and Analysis Plan (SAP), and assisted with an Operations and Maintenance Plan (O&M Plan) and a variety of other related services for this facility that processes rice and soy into food products such as rice syrup, rice syrup solids, rice milk, a variety of soy food products, teas, and soups.

### **Remediation & Compliance**

***Crude Oil Soil Contamination Site, Sunset Midway Oil Field, Kern County, California***-Managed and provided technical oversight of an RI/FS/remediation project in which a total of 23,700 cubic yards of crude oil-contaminated soil were excavated from numerous areas of a future retail site from depths of up to 35 feet. All the crude oil-affected soils were placed in four specially-designed containment cells constructed on site in the future parking areas. Excavation activities at the site also included the removal of approximately 15,000 cubic yards of unaffected soil. Mr. Martin’s involvement also included

## Robert Tony Martin PG – Principal Geologist

negotiations with the national retail client, the State of California Division of Oil, Gas, and Geothermal Resources, the State of California Regional Water Quality Control Board, the local municipality, and attorneys and civil engineers for all parties. Coordination of excavation surveying and analytical laboratory subcontractors was also accomplished. Total cost of the mitigative measures, limited investigation, confirmatory sampling, and regulatory negotiations was approximately 1/3 of the next lowest consultant's estimate. Total cost of the services performed was approximately \$600,000. Mr. Martin's approach for this project saved millions of dollars in development costs. Because of the success of the project, a local redevelopment agency contracted Mr. Martin's firm for similar services on their adjacent property involving 1,000 cubic yards of crude oil-affected soils to be excavated from a stream channel and drainage diversions, placing those soils in containment cells on their property.

***Southern California Edison Pole Treatment Facility, Visalia, California***-QA/QC and project management oversight for a wooden utility pole treatment facility in which more than 250,000 gallons of creosote and 900,000 gallons of diesel with pentachlorophenol were used for pole treatment. This site was listed on the USEPA National Priorities List (NPL). Over 7 groundwater excavation wells have been installed within the 2-aquifer system as part of the RI/FS. Over one billion gallons of water have been extracted and treated using carbon absorption and/or u.v./ozone remedial treatment. Numerous pilot tests, soil vapor extraction tests, and bioventing tests were also performed on site. Additionally, site history research, treatment system operation and maintenance, and miscellaneous disposal-related activities were performed.

***Los Vaqueros Project, Contra Costa, California***-Managed and wrote portions of a Construction Activity Stormwater Pollution Prevention Plan for the Vasco Road Realignment (12 miles). The area of the relocation included hazardous materials concerns, up to 100-foot deep cuts and fills, and endangered species concerns. Additionally, managed, and was involved in the design, construction, operation and maintenance of a water treatment system for a dewatering effluent which contained free-phase crude oil and other refined and semi-refined petroleum products. The system was designed in four working days, permitted through the State of California RWQCB in one working day, and constructed in eleven days. The system was designed to treat in excess of 600 gallons/minute and was manned around the clock for approximately 3 months due to safety, security, and property-related issues. To avoid flooding the excavation, the treatment system could not be shut off, even for system maintenance. Over 17 million gallons of water were treated. Mr. Martin also assisted the Contra Costa Water District with technical support for mediation.

The quick service provided to the District saved the District over \$500,000/day in delay costs. The District was able to recover approximately 98 percent of all costs claimed. This project earned Mr. Martin and his project team the "President's Award" for best overall project within Kleinfelder that year.

## Robert Tony Martin PG – Principal Geologist

***Numerous Post-Incident Locomotive Horn Testing, Multiple Locations, California-*** Mr. Martin, managed and/or performed numerous locomotive horn tests following accidents for one major and a couple of minor railroads in support of the legal teams' accident investigations. Testing was done in accordance with 49CFR.

***Former Disco Facility, Stockton, California-***Managed the design, permitting, construction and first 2 years of operation/maintenance/monitoring for a project in which Mr. Martin and his project team evaluated a plume of TPH and 1,2 DCA groundwater contamination. The contamination originated from a former fueling facility and migrated approximately 400-500 feet offsite, traversing beneath a major highway and to within 100 feet of an elementary school. In addition to its sizeable length, the plume was over 140 feet deep, had migrated 100 feet vertically into groundwater, and was in two separate hydraulic zones. The client had previously attempted to control the plume and remediate the site over the course of 11 years with little success. Under pressure from regulators, the client was asked to develop a new approach subject to their review and approval. Mr. Martin and his project team developed an innovative strategy involving aggressive deep air sparging and high vacuum SVE to remediate the source area and capillary fringe contamination. For the fugitive offsite plume that comprised primarily 1,2 DCA, we constructed and are currently operating and maintaining a remote ozone sparge curtain. The curtain comprises five triple-nested wells that inject air mixed with ozone to oxidize dissolved contamination as it traverses the curtain. The essence of this approach was to eliminate the source area contamination while controlling migration of the offsite plume, as opposed to a more costly approach of trying to remediate the entire plume at once. We outlined our approach to the regulators, which was approved without reservation. We utilized horizontal direction drilling (HDD) to place a 2-inch casing through which individual lines of tubing were run to supply the remediation wells. Also, run through the casing were electrical lines to individually activate solenoids at each wellhead, thus allowing enormous control and flexibility in optimizing operation of the curtain and the 15 sparge points it entails. The system is still in operation and results are exceeding expectations. The solvent concentration at the leading edge of the fugitive plume has dropped by over 75% to nearly non-detectable levels. The petroleum concentrations in the source area have dropped by an average of approximately 80%.

### **Brownfields**

***Brownfields Hazardous Materials and Petroleum Community-Wide Site Assessment Grants, Rancho Cordova, California-***Mr. Martin managed and provided technical oversight of the portfolio of projects for the City of Rancho Cordova's two (Community Wide Site Assessment-Petroleum and Community Wide Site Assessment-Hazardous Materials) Brownfields grants. That work included community outreach, a grant area planning project (which included grant area research, and field reconnaissance), Phase I Environmental Site Assessments, Sampling and Analysis Plans, geophysical surveys, Phase II Environmental Site Assessments, etc.), and even a planning level study with a GIS deliverable. This work was conducted from 2011 to 2017.

## Robert Tony Martin PG – Principal Geologist

***Purity Oil Recyclers, Superfund Site, Fresno County, California***-Involved with potentially responsible party group (PRPs) in the management of field activities such as groundwater sampling (RI/FS), remedial system design, regulatory agency negotiations, etc. The site is listed on the USEPA National Priorities List (NPL). The estimated remediation cost for this project was later estimated to exceed over \$100,000,000.

***Brownfields Hazardous Materials and Petroleum Community-Wide Site Assessment Grants, Oroville, California***-Mr. Martin managed and provided technical oversight of the portfolio of projects for the City of Oroville's two Brownfields grants. That work has to-date included community outreach, a property screening and prioritization evaluation, Phase I Environmental Site Assessments, and Phase II Environmental Site Assessments, etc. This work is currently ongoing.

***Former Spreckels Sugar Plant 2, Manteca, California***-Managed all aspects of a Phase I / II Environmental Site Assessment for the Former Spreckels Sugar Plant No. 2. The site has been the location of a former beet sugar processing plant since 1916. The property continues to be redeveloped as a 362 acre mixed-use development called "Spreckels Park."

Because of a pending property sale, the entire project was conducted on a fast-track basis. Initially, Mr. Martin and his project team started the project by conducting a Phase I Environmental Site Assessment (ESA) in accordance with ASTM Standard E 1527-94. The ESA included but was not limited to a search of environmental databases and lists, a very thorough site reconnaissance, evaluation of the manufacturing process, evaluation of aerial photographs, numerous personal interviews, a review of Spreckels Development's files dating back to approximately 1915, a review of regulatory agency files, etc. Based on the assessment, twenty-seven recommendations were made for further investigation or mitigation.

A Phase II Environmental Site Assessment (RI/FS) was conducted to address the 27 recommendations in the ESA. Members of the Development Committee asked that all environmental concerns known to the project team be investigated, including rumors. During the "fast-track project," a total of approximately 1,000 soil samples and approximately 40 discrete groundwater samples were collected from approximately 500 borings and surface sample locations for lithological logging purposes, field screening and for potential chemical analysis. Approximately 600 of the samples obtained were analyzed for selected constituents. Groundwater samples were also obtained from 11 existing groundwater monitoring and production wells on site. Additionally, twenty-two (22) groundwater-monitoring wells were installed on the property; all of which were later sampled for chemical analysis. Building material samples were also analyzed for lead-based paints and asbestos. Soil-gas probes were installed in select areas. Geophysical techniques (magnetometer, electromagnetometer and ground penetrating radar) were used to search for buried debris throughout areas of concern. In the areas identified by geophysical methods, exploratory trenching was used for confirmation purposes. The data accumulated during the field and laboratory studies were summarized and evaluated. Statistical and Risk Assessment approaches were also utilized. The results of the Phase II assessments were detailed in approximately 40 different reports which were submitted to the Client, and subsequently to the appropriate regulatory agencies for review. Regulatory closure was requested for many of the areas investigated. Mitigation measures were proposed for a few other concerns.

## Robert Tony Martin PG – Principal Geologist

Mr. Martin also represented the client in the regulatory closure process for existing on-site wastewater ponds, disposal areas and other portions of the property. The ponds on site were under a pre-existing Waste Discharge Requirements (WDRs) and a Monitoring and Reporting Program (MRP)> The ponds on site consisted of three “mud ponds” which contained the sediment that was rinsed off the sugar beets as they entered the process, A group of five “lime ponds” and three “wastewater ponds”. During the processing of the sugar beets the beets are sliced/diced and boiled to extract the sugar. As part of the process lime is added to the solution to remove impurities. Once used, the lime solution is the consistency of a thick milkshake. The spent lime solution was pumped to these ponds and allowed to sit for years to get the lime to dry. The five lime ponds were cycled so that ponds were in various stages of dewatering. The pond with the least water content would then be excavated and sent by conveyor to a rotary kiln where the organic impurities were burned out of the lime and the lime was reused. Approximately 200,000 cubic yards of spent lime was on site in the lime ponds. The lime was tested to show it was not hazardous. Mr. Martin then negotiated with the Central Valley Regional Water Quality Control (CVRWQCB) staff that the spent lime was not even a waste as it was being dried, impurities removed, and then reused on site. Together with a senior geotechnical engineer, Mr. Martin showed that the blending of the spent lime with the silts and clays in the mud ponds was a valid reuse of the materials to stabilize the fine grained soil and not application of a waste to the land. It was also shown through a series of leachability tests that the mix was unlikely to impact groundwater quality. Nevertheless, the mixed material was only used under industrial areas of the redevelopment where it was going to be paved to further inhibit leaching. This approach saved the developer tens of millions of dollars and avoided killing the project.

***Stockton Downtown Redevelopment and Brownfields Sites, Stockton, California***-Provided technical support to an EPA contractor for the former McCormick & Baxter Creosoting Co. Superfund site. Managed and provided technical oversight of a Phase I / Phase II Environmental Site Assessment of the Delta View Apartments on the south shore of the Stockton Waterfront. Managed and provided technical oversight for a portion of the City of Stockton Brownfields site. This site was the winner of a 2002 EPA Region IX Phoenix Award. Also, managed and provided technical oversight for the evaluation of two alternative baseball stadium sites as a portion of the Environmental Impact Reports for the Stockton Mudville Nine (A – Affiliate of the Oakland A’s). Eventually, the North Shore Alternative was selected, and that site went on to be the 2008 winner of the EPA Region IX Phoenix Award.

Later provided technical oversight for the evaluation of several properties around the new EDD site on the south end of the channel for the City of Stockton Redevelopment Agency. Many of these projects included cleanup, third-party review of other consultants’ work, and legal team support in cost recovery.

## Robert Tony Martin PG – Principal Geologist

### Solid Waste

**Sierra Conservation Center, Jamestown, California**-Managed and provided technical oversight for several years for groundwater and vadose zone monitoring at this Central California Prison Landfill.

**Rice Road Landfill, Fresno, California**-Managed and provided technical oversight for groundwater and landfill gas monitoring at this site.

**Florin-Perkins Landfill, Sacramento, California**-Mr. Martin was the project manager and provided third party technical oversight for construction quality assurance for the landfill cap of three large waste cells. The 3-foot-thick low-permeability soil cap consisted of foundation, engineered, and vegetative layers. Also assisted in some erosion mitigation and landfill gas waste characterization.

### Committees and Commissions:

- City of Fresno Little Hoover Commission, Fresno, California (Water Division, Sewer Division and Wastewater Treatment Facility)
- Sacramento Chapter, American Public Works Association, Board Member and Chapter Officer, 2011 to 2017. Past President and Committee Chair 2017 to Present.
- San Joaquin Engineer's Council, Chair and longtime board member, 2012 to 2020

### Awards:

- Stan Wilkening Member of the Year, Sacramento Chapter of the American Public Works Association, 2010
- President's Award for Outstanding Project, Los Vaqueros Water Conveyance Pipeline, Kleinfelder, 1996
- Interdisciplinary Award, Disco Remediation Site, Kleinfelder, 2003
- Co-author, "Fast-Track Water Treatment, Los Vaqueros Water Conveyance Pipeline Project, Byron, California", Technical Papers of the 12th Annual Environmental Management and Technology Conference West, Zenobia and Martin, (HazMat '96 West)
- Co-author, "Emergency Construction, Operation and Maintenance of a 600 gpm Dewatering Treatment System", Technical Seminar, Zenobia, Martin and Paulson, April 1996
- Co-author, "Removal of MTBE and other Oxygenates in Groundwater using Emerging Technologies", Technical Seminar, Jenkins and Martin, Denver, Colorado, February 2003
