You are requesting that the District not take enforcement action because the Non-Compliance Event is the result of an "Upset / Breakdown" Event under District Rule 404. A breakdown condition means an unforeseeable failure or malfunction of 1) any air pollution control equipment or related operating equipment which causes a violation of any emission limitations or restriction prescribed by the District Rules and Regulations, or by State law, or 2) any in-stack continuous monitoring equipment, where such failure or malfunction: (1) is not the result of neglect or disregard of any air pollution control law or rule or regulation; (2) is not intentional or the result of negligence; (3) is not the result of improper maintenance; (4) does not constitute a nuisance; (5) is not a recurrent breakdown of the same equipment. You have the burden of providing sufficient information to demonstrate that the Upset / Breakdown was an unforeseeable equipment failure or malfunction that meets the above listed criteria. This checklist must be completed and returned to the District with either the Part 1 or Part II Non-Compliance Event Notification form to attest to your having made this determination. Submission of a request for shielding from enforcement action does not by itself confer such a shield. If breakdown or emission exceedance is identified, the possibility exists that the District after consideration of the information provided, the timeliness and completeness of the submittals, and a comparison to other like breakdowns, may ultimately determine that the Non-Compliance Event was not the result of a legitimate Upset / Breakdown event and may elect to take enforcement action. Action to return to compliance should be accomplished as expeditiously as possible. Thus, you are advised to: (1) assure that the breakdown meets the criteria for an unforeseeable failure or malfunction; (2) minimize emissions resulting from the event to the maximum degree possible; and (3) assure that the required failure and malfunction information and information on the corrective actions taken is provided to the District in a complete and timely manner.

Subject: Non-Compliance Event Notification #2026-003 PART II

Bruce,

This memo provides supplemental details to the Non-Compliance Event Notification #2026-003.

The event occurred during a test run conducted for commissioning CT1 after a major overhaul, under short-term variance 25-03.

To commission the combustion turbine, the OEM, Siemens, must operate the turbine at Sync Idle for an extended duration to tune the turbine's combustion parameters and monitor vibrations. The data collected during this time is necessary for the long-term, safe operation of the equipment. Operating the turbine at full speed, with no generation load, the turbine creates an excess of CO mass accumulation.

Incident Summary:

- **Fuel Flow Start:** 06:45 (CEMS Time)
- **Full Load Achieved:** Approximately 07:40 (CEMS Time)
- **Event:** CT1 Commissioning resulting in exceedance of CO LbPerHr, under variance 25-03

Emissions Impact:

The startup of CT1 spanned two separate clock hours, which resulted in CO LBS accumulation in excess of our permit condition of 89.5 LBS, for each of the clock hours as shown on the attached data sheets.

Follow-Up Actions:

Commissioning is ongoing, with additional startups required.

AQ-40

AQ-40 The Project owner shall comply with the applicable requirements for quality assurance testing and maintenance of the continuous emission monitor equipment in accordance with the procedures and guidance specified in 40 CFR Part 60, Appendix F.

Verification: The Project owner shall include all CEMS quality assurance test failures that required corrective action as part of the Quarterly Air Quality Report required by the Condition of Certification AQ-SC6

No linearity tests were performed on CT1 and CT2 during Q1 2026 because the units were in outage and operated fewer than 168 hours during the reporting quarter. Last completed linearity Q3 2025.
