Opposition

As a city of Ridgecrest resident, I strongly oppose this proposal for a small data center to be built in or near our city like Inyokern. We hardly have enough water to sustain our community as is, the proposed pipeline is also something I'm in opposition for as it'll cost millions in taxpayer dollars. This data center will do nothing to positively benefit our community and livelihoods here. It will have negative impacts on our town's water resources and natural animal habitats like coyotes and the desert tortoise.
