RB Inyokern Data Center webpage RB Inyokern Data Center

Dear CEC Staff, Kern County Planning, and Supervisor Peters:

I am a Ridgecrest resident, working remotely from home, and am concerned about the proposed RB Inyokern Data Center near Inyokern.

I respectfully request a Full Environmental Impact Report because of:

• High water demand – a data center of this size can use hundreds of thousands of gallons per day for cooling in our critically overdrafted Indian Wells Valley Basin.

• Proximity to NAWS China Lake (only 6-7 miles away) and potential impacts on shared regional power and water resources.

• Noise from 24/7 Cooling systems and generator testing

• Power grid strain and other effects

• Also what about the Helium being mentioned as well

Please require dry cooling (or water-neutral technology) and strong mitigation measures.

Thank you.
