## **Concern over proposed data center**

To whom it may concern. I have deep concerns over this proposed data center. We would be living within 2 miles of the proposed center. My husband is a veteran and suffers from tinnitus courtesy of his time in the military, the constant noise coming from this facility will make living in our home, which we've owned here for 10 years, a source of constant stress and annoyance. The utility bills which are already very high have been proven to go higher near data centers. And, the most important issue of all, water. We are already taxed thin on our water. There needs to be an EIR done before this goes forward another step. Our community will be destroyed if our aquifer is depleted any more, our homes will be worthless, and we would have to relocate. These are not empty fears, this is happening all over the country in places with more water than the Mojave desert has. Please, as someone who loves her home, don't let this drive us out of the community we love.
