## **No data center should be built**

To whom it concerns,

As a resident of Inyokern the projected data center is an absolute outrage. Not only will it destroy natural habitats of the endangered desert tortoise and ground squirrels but it also destroys our small town. It would destroy our limited water supply. Noise from the facilities would not only ruin why we live out here but also pose a threat to our animals hearing and health. The waste from the facility would destroy ecosystems and put public health at risk. As a resident of inyokern who has already been taxed into financial hardship the data center would further cause financial hardships to residents who already pay way more property tax than we should. AI is also extremely hazardous to human mental health in using it and in the hazards that the facilities create where they are built. So stop taking our deserts and destroying them!
