Public Comment “ 2026”2027 Clean Transportation Program Investment Plan Update

AVEUNTURE Electric Motorcar supports continued prioritization of medium- and heavy-duty zero-emission infrastructure, particularly deployment strategies aligned with real-world freight operations.

Current fleet data demonstrates that electric truck adoption is no longer limited by vehicle capability, but by the availability of infrastructure that reflects actual route behavior, dwell times, and logistics patterns.

Investments that prioritize corridor-based deployment, return-to-base operations, and high-utilization environments will accelerate adoption and improve system reliability.

We encourage continued focus on scalable, high-capacity infrastructure solutions that support near-term deployment while enabling long-term system optimization.

Thank you for your leadership in advancing California’s clean transportation goals.

Respectfully submitted,
Mark Walker
Chief Executive Officer
AVENUTURE Electric Motocar
