*Docket Number: 26-SPPE-01*

**No**

What is being done for mitigation of all problems associated with the subjects chosen,? They will deplete our water. What are they doing to make sure our water table doesn't deplete. What yearly or more frequent tests are being done to test environmental, sound, hazmat, traffic, etc problems that may arise? What about testing for sounds we can't hear but will have a constant long term effect? What transparency are they offering to ensure testing for anything, even things we aren't thinking of or aware of yet, and everything is being done. Now and into the future. All of this needs to be done by a neutral third party. Paid for by the company. Also, voting should be able to veto this at any time. What is the plan for waste, long term health of Inyokern citizens? What are they planning to do to improve the life of Inyokern citizens?
