California Energy Commission  
715 P Street  
Sacramento, CA 95814

**RE: Support for the Potentia Viridi Battery Energy Storage System**

Dear Commissioners:

I am writing to express my support for the Potentia Viridi Battery Energy Storage System, proposed for eastern Alameda County within my district.

The Potentia Viridi project is appropriately sited in an area identified by Alameda County as suitable for energy infrastructure development. Eastern Alameda County benefits from significant wind and solar resources, particularly near the Altamont Pass. This project would enhance the region's ability to store locally generated renewable energy and deliver it when demand is highest, supporting overall grid reliability.

In addition, the project is expected to contribute to the local economy. Estimated property tax revenues exceeding \$50 million would support essential public services. The project's community benefits package also includes over \$1 million in contributions to local organizations serving residents throughout the Tri-Valley region.

Thank you for your consideration of this project. If you have any questions, please feel free to contact me directly by phone at (925) 551-6995 or by email at [David.Haubert@acgov.org](mailto:David.Haubert@acgov.org).

Sincerely,

**David G. Haubert**  
President, Alameda County Board of Supervisors  
First District
