Buying land in California

Hi Energy Ca I have found out that some my neighbors are from middle east and own most power plants in middle east and have better quality power plants and development of air quality and environment protection programs. I would like to be invited learn from them where they are by confidential access plus buy power plant and learn process make new energy and keep environment safe from big companies as in city of Richmond theirs been dozens of leaks spills power outages blackout and medical conditions from these power plants effecting bay area residents .
