Opposing the RB Inyokern Data Center

I'd like to voice my strong opposition to the building of a data center in Inyokern. Regardless of the amount of water or power that this project plans on using, the only acceptable amount of water and power that should be used by data centers is exactly 0. Building a water-dependent data center in the desert is environmentally irresponsible, not to mention any noise and/light pollution that will be generated by this project would be damaging to the community. Kern County can and will find other ways to bolster our economy. This is not the appropriate way forward.
