NOTICE OF STAFF WEBINAR

RE: Non-energy Impacts OIIP Staff Webinar

**Revised Notice of Remote Staff Webinar on Integrating NEI
Metrics in Supply Modeling for the Non-Energy Impacts
Informational Proceeding****May 18, 2026**

9:00 a.m. – 12:00 p.m.

Remote Access Only

See Attendance Instructions.

The California Energy Commission (CEC) will host a staff webinar on proposed approaches for investigating opportunities to integrate non-energy impacts¹ (NEIs) in supply modeling. This workshop is part of CEC's Informational Proceeding on Non-Energy Impacts (Benefits and Social Costs). The proceeding is CEC's public process serving as a forum to determine methodologies to integrate into CEC planning processes and decision making. This webinar will seek public input on proposed metrics to be evaluated.

This is a virtual meeting with public access online or by phone through Zoom.

The public can participate in the webinar consistent with the attendance instructions below. The CEC aims to begin promptly at the start time posted and the end time is an estimate based on the proposed agenda. The webinar may end sooner or later than the posted end time.

Agenda

The webinar will include a technical discussion of a suite of proposed NEI metrics and approaches to be tested for incorporating the metrics in supply modeling.

A detailed schedule will be posted prior to the webinar at [Docket No. 24-OIIP-03](https://efiling.energy.ca.gov/Lists/DocketLog.aspx?docketnumber=24-OIIP-03) at <https://efiling.energy.ca.gov/Lists/DocketLog.aspx?docketnumber=24-OIIP-03>.

¹ Impacts include benefits and social costs.

Background

In response to a petition² filed February 5, 2024, by a group of sixteen petitioners (the Center for Biological Diversity et al.), the CEC adopted the NEI Order Instituting an Informational Proceeding (OIIP) in March 2024 under Docket No. 24-OIIP-03. The purpose of this OIIP is to initiate a transparent public process to serve as a forum to inform methodologies to integrate non-energy impacts (benefits and social costs) into CEC planning processes and decision making, including in electric system resource planning. Including non-energy benefits and social costs provides a more holistic understanding of the implications of investments and decisions.
