Opposed to Data Center

I am strongly opposed to the proposed data centers for Inyokern, CA. The proximity to residential, businesses and the elementary school is dangerous. Our small community does not deserve to be swept aside because people with power and money think our lives do not matter. The track record of data centers across this county is abysmal. Forcing up electric bills, assault on water systems, and noise, water and soil pollution have all been reported over and over again.
