## **Horrible**

Building such infrastructure will only serve to harm the communities around it. Light pollution, sound pollution, and intensive water usage (water usage which has been something regularly dismissed by the government of ridgecrest and inyokern regarding solar panels, and pistachio trees) will all negatively effect the inhabitants, environment, and ecosystem of the surrounding areas. This will ultimately serve corporate interests and that of putting money in the pockets of local government that in no way will serve the public. My grandparents live in inyokern and the idea of them having to live a few miles from such a place drives me mad
