Inyokern Data Center

Why are we even proposing this to be built here. We have no water. The energy grid is strained. These data centers never provide any benefit to the communities they are built in. What ends up happening is the people end up subsidizing private business by paying higher water and electricity costs. This is going to kill Inyokern and Ridgecrest. Why should we be made to suffer with the increase in costs, increase in pollution from the generators, increase in heat, increase in sound pollution and increase in noise pollution?

I implore you do not build this here.
