Put it somewhere else!

We do not want, nor do we need this in our backyard. We live only a few miles from it, on a quiet, dark at night, peaceful property on a well. This will affect my water, noise pollution, light pollution, and completely invade my peaceful way of life. The people of Inyokern are quiet, we keep to ourselves, one of the perks of owning land, if we are negatively affected and this interrupts the way of life we chose to be out here, we will step up to deal with the problem in any way possible. Furthermore, why not put it in trona? The plant closed, they could use the jobs.
