RE: Support for RB Inyokern Data Center — Docket No. 26-SPPE-01

Dear Chair and Commissioners:

The Kern, Inyo, & Mono Counties Building & Construction Trades Council, representing more than 6,000 skilled construction trades members, is pleased to support the RB Inyokern Data Center Project currently before your Commission.

This project represents exactly the kind of development California needs: large-scale infrastructure built by a skilled union workforce that will generate good-paying jobs and substantial tax revenue for Kern County. These benefits are vital to the long-term economic strength of our region.

As a Building Trades Council, we support responsible economic development that creates strong local employment opportunities for our members while also expanding pathways into our apprenticeship programs for the next generation of workers. Projects like this help strengthen our communities and grow the middle class.

For these reasons, I respectfully urge the Commission to approve this SPPE application. The RB Inyokern Data Center Project will provide meaningful benefits for workers, Kern County, and California as a whole.

Respectfully,

Alissa Reed
Executive Secretary
Kern, Inyo, & Mono Counties Building & Construction Trades Council
