## **No to Inyokern Data Center**

Hi, I would like you to make sure no data center is built in Inyokern. The USA has plenty of data centers already and doesn't really need more to be competitive globally. A major issue with building the data center in Inyokern is draining resources in a desert climate. There is already a water shortage in this region due to this climate. Building a data center in Inyokern would be an environmental disaster: we would definitely be at risk of our taps running dry. Please, do the right thing and put the people over profit.
