## **Against Inyokern Data Center**

The state of CA and the IWV Ground Water Authority claim the entire Indian Wells Valley has a groundwater issue. The valley is in litigation trying to sort out water allocations. Continue to expand water usage without having an actual plan on how to serve CURRENT residents and business is already an issue. Adding a data center exacerbates those problems. Additionally, 40 diesel generators -- A full environmental impact and a serious look at how that affects a valley that already has air quality problems at certain times of the year is not beneficial to residents, especially those living close to the proposed data center. While it's a small valley with a lot of open land, the residents of the valley deserve the quality of life they chose - not supporting big city problems.
