EXECUTIVE SUMMARY

TRC Environmental Corporation, Inc. (TRC) was retained by Middle River Power, LLC (also known as “Middle River Power”, “Client” or “User”) to perform a Phase I Environmental Site Assessment (ESA) of an approximately 10-acre agricultural property located near Interstate 80 and Kilkenny Road in Vacaville, California (herein referred to as the “subject property”). TRC conducted the ESA in connection with the Client’s planned business transaction involving the subject property in accordance with TRC’s proposal dated May 16, 2025. The Phase I ESA described in this report was performed in accordance with the scope and limitations of the ASTM Practice E 1527-21 *Standard Practice for ESAs: Phase I ESA Process* (ASTM E 1527-21). Limiting conditions and/or deviations from the ASTM standard are described in Sections 1.3 and 7.1 of this report.

Overview

The subject property consists of agricultural orchard (prunes). Three electronic billboards are evenly spaced along the subject property’s northwestern boundary. No buildings or structures are located on the subject property. Along the subject property’s northwestern boundary is an unpaved access road which provides access to the adjacent Solano Irrigation District ditch. No visual evidence of hazardous materials release was observed during TRC’s visit to the subject property.

History

The subject property has been in agricultural use (orchard) from at least the late 1930s to the present day. Sometime in approximately the mid-2000’s, three billboards were installed along the subject property’s northwestern boundary. No historical onsite or offsite historical sources of concern were identified.

Regulatory Review

The subject property is not listed in a contamination or chemical spill database, nor is the subject property listed in an environmental compliance and hazardous-waste generation-related database. No offsite sources of concern were identified in the environmental databases that were reviewed for this assessment.

Findings

This assessment has revealed no evidence of recognized environmental conditions (RECs), controlled RECs (CRECs), or historical RECs (HRECs) in connection with the subject property and no additional assessment is recommended.

This Executive Summary is part of this complete report; any findings, opinions, or conclusions in this Executive Summary are made in context with the complete report. TRC recommends that the User read the entire report for supporting information related to findings, opinions, and conclusions.

Legal Notice

This report has been prepared for Middle River Power. This document was prepared by TRC solely for the benefit of the Client and the User. With regard to third-party recipients of this document, neither TRC, nor the Client, nor the User, nor any of their respective parents, affiliates, or subsidiaries, nor any person acting on their behalf: (a) makes any warranty, expressed or implied, with respect to the use of any information or methods disclosed in this document; or (b) assumes any liability with respect to the use of any information or methods disclosed in this document. Any third-party recipient of this document, by its acceptance or use of this document, releases TRC, the Client, the User, and their parents, affiliates, and subsidiaries from any liability for direct, indirect, economic, incidental, consequential, or special loss or damage whether arising in contract, warranty, express or implied, tort, or otherwise, and irrespective of fault, negligence, and strict liability.

1.0 INTRODUCTION

TRC Environmental Corporation, Inc. (TRC) has prepared this Phase I Environmental Site Assessment (ESA) for Middle River Power, LLC (also known as “Middle River Power”, “Client” or “User”). This report was prepared for and may be relied upon by Client for the purposes set forth herein; it may not be relied on by any party other than the Client. TRC will consider authorization for third-party reliance on this report if requested by the Client.

1.1 Purpose and Scope of Services

This Phase I ESA was performed for the industrial property located at an approximately 9.5-acre agricultural property located near Interstate 80 and Kilkenny Road in Vacaville, California (hereinafter the “subject property”). A site location map is included as **Figure 1**. This Phase I ESA was prepared by TRC in accordance with the ASTM E 1527-21 *Standard Practice for ESA: Phase I ESA Process* (ASTM E 1527-21) and is intended for the sole use of Middle River Power as described in TRC’s proposal dated May 16, 2025.

The purpose of this assessment is to identify *Recognized Environmental Conditions* (RECs) at the subject property, as defined by the ASTM E 1527-21 standard. The completion of this Phase I ESA report may be used to satisfy one of the requirements for the User to qualify for the *innocent landowner, contiguous property owner, or bona fide prospective purchaser* liability protections pursuant to the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA), thereby constituting *all appropriate inquiries into the previous ownership and uses of the property consistent with good commercial or customary practice* as defined by 42 U.S.C. §9601(35)(B) of CERCLA. The scope of services for this assessment included the following tasks:

- A visit to the subject property and a reconnaissance of the vicinity in which the subject property is located.
- A description of the subject property and the physical setting of where the subject is located.
- A historical review of the subject property and area in which the subject property is located.
- Interviews with owners, operators, and/or occupants of the subject property, and/or local officials.
- A review of environmental databases and regulatory agency records for both the subject property and area in which the subject property is located.
- A review of previous environmental reports/documentation, as applicable.
- A review of environmental liens and/or activity use limitations (AULs), if provided or authorized to obtain by the User.
- The preparation of a report documenting the findings, opinions, and conclusions of the assessment.

1.2 Additional Services

Items outside the scope of the ASTM E 1527-21 standard and **not** evaluated as part of this assessment include but are not limited to the following topics:

- Lead-based paint
- Wetlands
- Lead-in drinking water
- Cultural and historic resources
- Industrial hygiene
- Radon
- Substances not defined as hazardous substances or petroleum
- Asbestos-containing material
- Health and safety
- Ecological resources
- Endangered species
- Indoor air quality unrelated to releases of hazardous substances or petroleum products into the environment
- Biological agents
- Environmental compliance

1.3 Deviations to ASTM E 1527-21 Standard

No significant deviations or deletions to the ASTM standard were made during this assessment.

1.4 Critical Viability Dates

The critical viability dates for this assessment are summarized below:

- **Interviews** – No interviews were conducted as part of this assessment.
- **Regulatory Records Review** – A regulatory review of the subject property and nearby properties was initiated on May 23, 2025.
- **Site Visit** - A visit to the subject property and an area reconnaissance of the surrounding area was conducted on May 22, 2025.
- **Environmental Declaration** - The Environmental Professional (EP) signed the environmental declaration for this report on August 21, 2025.
- **Report Viability Expiration Date** – The 180-day viability date of this report is February 21, 2025. This date is based on the earliest date outlined above.

To qualify for one of the threshold criteria for satisfying the LLPs to CERCLA liability, the all appropriate inquiries components listed above must be conducted or updated within 180 days of and prior to the date of acquisition of the subject property, and all other components of all appropriate inquiries must be conducted within one year prior to the date of acquisition of the subject property. The date of the report generally does not represent the date the individual components of all appropriate inquiries were completed and should not be used when evaluating compliance with the 180-day or 1-year all appropriate inquiries requirement.

2.0 SUBJECT PROPERTY DESCRIPTION

2.1 Location

The subject property is located at 5498 Kilkenny Road, Vacaville, California, 95687 in a rural area. The assessor parcel number (APN) for the subject property is 0133060060. **Figure 1** illustrates the area that this subject property is located, and **Figure 2** shows the approximate property boundary, key features of the subject property, and abutting properties.

2.2 Improvements

A summary of the improvements that have been made to the subject property is provided below.

Table 2.1 – Improvement Summary

Feature	Description
Buildings	No buildings are located on the subject property.
Back-up fuel source(s)	No backup fuel systems are present at the subject property.
Construction date(s)	N/A
Electricity supplier(s)	Electricity is not supplied to most of the subject property.
Exterior areas	In general, the exterior of the subject property consists of agricultural land.
Heating/cooling system fuel source(s)	No heating or cooling systems are located at the subject property.
Large equipment	No large equipment is located on the subject property.
Potable water supply	The subject property is not connected to a potable water supply. Irrigation water is supplied by the Solano Irrigation District.
Roads/rail lines	No onsite roads or rail lines are located at the subject property.
Sewage disposal system(s)	The subject property is not connected to a municipal sewage disposal system.
Storm water system	The subject property is unpaved. Based on TRC visit, it appears that stormwater during rain events either percolates into the pervious surfaces or follows topography and drains via overland flow to the surrounding area. A storm drain is in the western corner of the subject property.
<u>Notes:</u>	
N/A – Not applicable	

2.3 Current Use(s)

The subject property is used as agricultural land/orchard (French prunes). Three electronic billboards are evenly spaced along the subject property's northwestern boundary. Currently, approximately 9.4 acres of the subject property is used as an agricultural orchard; an additional approximately 0.15 acres have utilities consisting of a fire hydrant, electrical meter, and storm drain. No buildings or structures are located on the subject property. An unpaved access road that provides access to the adjacent Solano Irrigation District ditch runs along the northwestern boundary of the subject property.

2.4 Owner and Operator Information

The subject property has been owned by Gary Thiara and his partners since 2012. No information regarding the previous owners of the subject property was identified during this assessment. Information regarding the history of the subject property is provided in Section 4.0.

2.5 Physical Setting

The subject property is on the edge of the Bay Area and the Central Valley of California in a primary agricultural area. An irrigation canal is located approximately 40 feet parallel to the northeast boundary of the subject property.

According to the USGS 2021 7.5-minute topographic map for Allendale, California (refer to **Figure 1**) and verified via Google Earth, the subject property is at an elevation of approximately 85 feet above mean sea level (msl) with a slight local topographic slope to the east southeast. The topographic slope observed during the site visit (See Section 5.0) was generally flat with a slight slope to the southeast. Based on the local topography, the assumed direction of shallow groundwater flow is to the southeast.

No site-specific lithology, geology, or hydrologic information was identified during this assessment. However, according to EDR, the dominant soil composition in the vicinity of the subject property is as follows:

- **Hydric Status:** Not hydric
- **Soil Surface Texture:** Sandy loam
- **Soil Component Name:** San Ysidro
- **Deeper Soil Types:** Loam

Please refer to the Geospatial Physical Setting Source Summary of the EDR report presented in **Appendix A** for further information regarding the soil composition in the vicinity of the subject property.

2.6 Flooding

According to the Federal Emergency Management Agency (FEMA) Flood Map Service Center, the subject property is not in a flood zone.

3.0 USER PROVIDED INFORMATION

According to the ASTM E 1527-21 standard, certain tasks that may help identify the presence of RECs associated with the subject property are generally conducted by the Phase I ESA User. These tasks include providing or authorizing the *environmental professional* to obtain recorded land title records for EIs or AULs; providing specialized knowledge related to RECs at the subject property (e.g., information about previous ownership or environmental litigation); providing commonly known or *reasonably ascertainable* information within the local community about the *property* that is material to RECs in connection with the *property*; and informing the *environmental professional* if, as believed by the User, the purchase price of the *property* is lower than the fair market value due to contamination.

3.1 Title and Judicial Records for Environmental Liens or AULs

The User was not aware of any environmental liens or AULs associated with the subject property. In addition, no EV and AUL were identified during TRC's historical and regulatory research.

3.2 Specialized Knowledge

The User did not have any specialized knowledge related to RECs at the subject property.

3.3 Property Value Reduction Issues

The User was not aware of valuation reduction issues associated with the subject property.

3.4 Commonly Known or Reasonably Ascertainable Information

The User did not have any commonly known or reasonably ascertainable information associated with the subject property.

3.5 Reason for Conducting Phase I ESA

TRC understands the User requires a Phase I ESA for a business transaction involving the subject property.

4.0 RECORDS REVIEW

4.1 Historical Review

Historical information regarding the subject property and local area is based on TRC's review and analysis of historical aerial photographs, topographic maps, city directories, and an environmental database report provided by EDR. According to EDR, historical fire insurance map coverage is not available for the subject property. Internet searches were conducted to acquire additional historical information of both the subject property and local area. The historical research documentation utilized for this assessment is included in **Appendix B** and the sources of information used in the compilation of this report are listed in Section 8.0.

4.1.1 *Subject Property History*

Historical research indicates that the subject property has been in agricultural use from at least 1937 up to the present day. Based on the historical agricultural use of the subject property residual concentrations of organo-chlorine pesticides (OCPs) may be present in shallow soil of the subject property, as is common throughout much of the agricultural regions of California. Based on the proposed use of the subject property as energy storage facility, the potential presence of residual concentrations of OCPs in the shallow on-site soils does not present a significant environmental concern or a REC at the subject property, in TRC opinion. No visual evidence of large-scale herbicide or pesticide storage (i.e., above ground storage tanks, chemical storage sheds, etc.), was noted in the historical aerial photographs that were reviewed for this assessment.

By the mid-2000s, three billboards along the subject property's northwestern boundary were developed. The current property owner purchased the subject property in 2012, and the property consisted of grazing land at the time of the purchase. No historical onsite or offsite historical sources of concern were identified.

4.1.2 *Area and Adjoining History*

Historical research indicates that the adjoining properties to the north was developed with a road and a substation by the 1930s and agricultural land in all other directions. By the 1950s few residences and commercial/industrial shops were developed and continued sporadic development to current day. No historical offsite sources of concern were identified.

4.2 Database Report and Environmental Record Review

In accordance with the scope of work and ASTM Standard E-1527-21, a search of various governmental databases was conducted by EDR. The site-specific environmental database report was reviewed to evaluate if soil and/or groundwater from an on-site and/or off-site source of concern has the potential to impact the subject property. The database abbreviations are provided in the site-specific environmental database report, a copy of is included in **Appendix A**.

4.2.1 *Subject Property*

The subject property is not listed in EDR report.

4.2.2 *Adjoining and Surrounding Property Record Review*

When reviewing the EDR report, TRC considered the following factors to assess the potential for contamination from the adjoining and/or surrounding properties to impact the subject property:

1. Whether the property is upgradient or downgradient of the subject property related to potential groundwater migration based on the local topography, and the assumed (or known) groundwater depth and shallow groundwater flow direction.
2. Whether the property is upgradient or downgradient of the subject property related to potential vapor migration based on readily available information pursuant to the ASTM E 1527-21 standard including soil and geological characteristics; contaminant characteristics; contaminated plume migration data; and significant conduits that might provide preferential

pathways for vapor migration such as major utility corridors, sanitary sewers, storm sewers, and significant natural conduits such as Karst terrain (vapor migration may also be influenced by the age and design of infrastructure features associated with these conduits);

3. Regulatory case status (i.e., whether the state environmental agency or applicable regulatory authority has issued a No Further Action (NFA) letter or other similar closure document).
4. Type of release (soil only, groundwater, etc.).
5. Depth to groundwater.
6. Type of database (contamination versus compliance only) and whether the presence of contamination is known.
7. Type of contaminant and volume of the release.
8. The distance between the listed property and the subject property.

Based on this evaluation, TRC limited the review of additional environmental records to the properties listed below based on the potential for soil, soil vapor, or groundwater contamination be migrating to the subject property.

4.2.2.1 Adjoining Properties

No adjoining properties were listed in the environmental database report.

Based on TRC's review of the environmental database report and additional regulatory research it is TRC's opinion that a vapor encroachment condition (VEC) due to an adjoining property can be ruled out.

4.2.2.2 Surrounding Properties

According to the EDR report, five facilities were identified within their respective ASTM and/or EDR search distances from the subject property. Based on TRC's review of these database listings, none of these surrounding properties are expected to present a REC to the subject property based on their distance (over 250 feet away), regulatory status (e.g., regulatory closure has been issued, no significant and ongoing compliance-related violations were issued), media impacted (e.g., soil only), and/or topographical position from the subject property (e.g., downgradient or cross-gradient). In addition, TRC's review of the EDR report and regulatory research indicates that that a VEC due to surrounding property can be ruled out.

4.3 Previous Reports

A Phase I ESA of the subject property was prepared by KC Engineering Company (KEC) in November 2004. At the time of this report, the subject property consisted of agricultural fields and cattle pastures. KEC identified the potential for residual concentrations of insecticides, pesticides, or herbicides to be present on the subject property. No other previous reports were provided for TRC's review.

4.4 Other Environmental Record Sources

Per the ASTM standard, local or additional state records were reviewed to enhance and supplement the federal and state records reviewed and discussed earlier in this report. These additional records include state agency lists of waste disposal facilities; Brownfield properties; hazardous waste/contaminated facilities; registered storage tanks; records of emergency release reports; and records of contaminated public wells. Local, County, and State sources were contacted to obtain this information. Information from these sources is discussed throughout this report as applicable and summarized below.

Table 4.1 - Other Environmental Record Sources

Regulatory Agency/ Department	Available Information
California Environmental Protection Agency (CalEPA)	TRC reviewed the CalEPA databases on June 11, 2025, for records pertaining to spills, hazardous materials, USTs, ASTs, notices of violation (NOVs), environmental cleanups, or remedial activities related to the subject property. The subject property was not listed in the CalEPA database.
California Geologic Energy Management Division (CalGEM)	TRC reviewed the CalGEM database on June 11, 2025, for records pertaining to oil and gas exploration and production activities at the subject property. The subject property was not listed in the CalGEM database.
Department of Toxic Substances Control (DTSC)	TRC reviewed the EnviroStor database on June 11, 2025, for records pertaining environmental cleanups and remediation that may have occurred at the subject property. The subject property was not listed in EnviroStor.
Geotracker	TRC reviewed the California Regional Water Quality Control Boards Geotracker database on June 11, 2025, for records pertaining to spills, hazardous materials releases, environmental cleanups, or remedial activities related to the subject property. The subject property was not listed in Geotracker.
Solano County Environmental Health	TRC reviewed the county website on June 11, 2025. No relevant records were identified.
US EPA – Enforcement and Compliance History Online (ECHO)	TRC reviewed the ECHO database on June 11, 2025, for records pertaining to environmental compliance. No significant historical compliance violations or ongoing complicate-related violations were noted.
US EPA - Envirofacts	TRC reviewed this database on June 11, 2025. Information pertaining to historical hazardous waste generation was listed. No contamination or environmental release information was listed.

5.0 SITE RECONNAISSANCE

5.1 Methodology

Ms. Andrea Weckle with TRC's San Francisco office visited the subject property on May 22, 2025, for the purpose of identifying potential RECs, CRECs, HRECs, and DMCs. Ms. Weckle was unaccompanied during her visit. Weather during the visit consisted of clear skies and temperatures in the low 80s. Representative photographs taken during the site visit are provided in **Appendix C**.

5.2 Limiting Conditions

As noted above, TRC was unaccompanied during our visit. Given the undeveloped nature of the subject property and its long-term history of agricultural use, TRC does not consider this to be a significant limiting condition. No other limiting conditions were encountered during the site visit.

5.3 Interior and Exterior Observations

Unless otherwise noted, the items listed in the table below appeared in good condition with no visual evidence of staining, deterioration, or a discharge of hazardous materials; and there are no records of a release in these areas. Items where further description is warranted are discussed in the sections following the table.

Table 5.1 - Interior and Exterior Observations

Item	Observed/ Not Observed	Description
Abandoned wells	Not Observed	
Aboveground storage tanks (ASTs) and associated piping	Not Observed	(see Section 5.2.5)
Air emissions	Not Observed	
Chemical drums and containers (≥5 gallons)	Not Observed	(see Section 5.2.1)
Chemical staining	Not Observed	
Clarifiers/Oil water separator (OWS)	Not Observed	
Dry wells	Not Observed	
Hazardous substances	Not Observed	(see Section 5.2.1)
Hazardous waste	Not Observed	(see Section 5.2.2)
Solid and liquid wastes including municipal wastes	Not Observed	(see Section 5.2.3)
Drains	Observed	A storm drain in the western corner of subject property was observed during the site visit.
Historic fill or other fill material	Not Observed	
Injection wells	Not Observed	
Irrigation wells	Not Observed	No irrigation wells were observed; however, irrigation pumps were observed in the western and northern portions of the subject property.
Odors	Not Observed	
Pits, ponds, and lagoons	Not Observed	

Table 5.1 - Interior and Exterior Observations

Item	Observed/ Not Observed	Description
Pools of liquid, including surface water bodies and sumps (handling hazardous substances or substances likely to be hazardous only)	Not Observed	
Polychlorinated biphenyls (PCBs)	Not Observed	
Potable water wells	Not Observed	
Septic systems	Not Observed	
Solid waste including municipal wastes	Not Observed	(see Section 5.2.3)
Stressed vegetation	Not Observed	
Sumps	Not Observed	
Underground storage tanks (USTs) and associated piping	Not Observed	(see Section 5.2.4)
Wastewater (including storm water or other discharge into a drain, ditch, underground injection system, or stream on or adjacent to the Site)	Not Observed	

5.3.1 ASTs

No visual evidence of an AST was observed during the site visit. According to the historical sources, no ASTs were located at the subject property. In addition, the subject property was not listed in an AST-related database (see Section 4.2.1).

5.3.2 Hazardous Substances

A hazardous materials inventory was not provided for TRC’s review as part of this assessment. No hazardous materials, including herbicides, fertilizers, or pesticides were observed during TRCs visit.

5.3.3 Hazardous Waste

No hazardous waste was observed during TRCs visit.

5.3.4 Solid Waste

Solid waste typical of roadways, including paper wrappers, drink bottles, and partial car bumper were observed during TRCs visit.

5.3.5 Per- and Polyfluoroalkyl Substances (PFAS)

Based on TRC’s regulatory research and review of the EDR report (Section 4.0) and Environmental Working Group’s (EWG) interactive map TRC did not identify a PFAS-impacted groundwater plume that was located potentially upgradient or located in the immediate vicinity (within 500 feet) of the subject property. No fire stations, airports, or other potential sources of PFAs was identified during TRC’s review of Google Earth and a reconnaissance of the surrounding neighborhood that occurred after TRC’s site visit.

5.3.6 USTs

No visual evidence (vent pipes, fill ports, etc.) of a UST was observed during the site visit. In addition, the subject property was not listed in a UST-related database (see Section 4.2.1).

5.4 Adjoining and Surrounding Properties Reconnaissance

5.4.1 Adjoining Properties

During the site visit, TRC viewed the adjoining properties from the subject property and publicly accessible areas (e.g., public roadways, etc.). A summary of our observation is provided on the following page.

Table 5.2 - Adjoining Properties

Direction from Subject Property	Current Land Use Description
North	The subject property is bordered to the north by Solano Irrigation District right-of-way, followed by Interstate 8.
East	The subject property is bordered to the east by powerline right-of-way, followed by agriculture orchards.
South	The subject property is bordered to the south by Kilkenny Road, followed by agricultural land.
West	The subject property is bordered to the west by Kilkenny Road and Interstate 8.

5.4.2 Surrounding Properties

Surrounding properties generally include rural agricultural land and commercial shops, including autobody shops. No gasoline service stations, dry cleaners, or heavy industrial facilities are in the immediate vicinity (within 500 feet) of the subject property.

6.0 FINDINGS, OPINIONS, AND CONCLUSIONS

Potential Phase I ESA findings can include RECs, CRECs, HRECs, and DMCs pursuant to the ASTM E 1527-21 standard. The definition for these terms is provided below.

- RECs are defined as (1) the presence of hazardous substances or petroleum in, on or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on or at the subject property due to a likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on or at the subject property under conditions that pose a material threat of a future release to the environment.
- CRECs are defined as a REC affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with *hazardous substances* or *petroleum products* allowed to remain in place subject to implementation of controls (e.g., activity and use limitations or other property use limitations).
- HRECs are defined as a previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities, without subjecting the property to any controls (e.g., land use limitations, or other property use limitations).
- DMCs are defined as conditions related to a release that generally do not present a threat to human health or the *environment* and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be DMCs are not RECs nor CRECs.

TRC has performed a Phase I ESA in conformance with the scope and limitations of ASTM E 1527-21 at the subject property. Deviations from this standard are described in Sections 1.3 and 8.0 of this report.

6.1 Findings

The following sections summarize the findings from this assessment.

6.1.1 RECs

No RECs were identified in connection with the subject property.

6.1.2 CRECs

No CRECs were identified in connection with the subject property.

6.1.3 HRECs

No HRECs were identified in connection with the subject property.

6.1.4 De Minimis Conditions

No DMCs were identified in connection with the subject property.

6.2 Data Gaps

TRC has made an appropriate inquiry into the commonly known and reasonably ascertainable resources concerning the historic ownership and use of the Site back to the first development per 40 CFR Part 312.24 (*Reviews of Historical Sources of Information*). In addition, an EL and AUL search were not conducted as part of this assessment. Based TRC's historical and regulatory research it is TRC's opinion that an EL and/or AUL is unlikely to have been placed on the subject property. Therefore, the lack of an EL and AUL search is not considered a significant limitation to the results of this assessment. No other data gaps were identified during this assessment.

7.0 LIMITING CONDITIONS AND DEVIATIONS

7.1.1 Accuracy and Completeness

The ASTM E 1527-21 standard recognizes inherent limitations for Phase I ESAs that apply to this report, including:

- Uncertainty Not Eliminated – No Phase I ESA can wholly eliminate uncertainty regarding the potential for RECs in connection with a property. Data gaps identified during this Phase I ESA are listed in Section 6.2.
- Not Exhaustive – A Phase I ESA is not an exhaustive investigation.
- Past Uses of the Property – A review of standard historical sources at intervals less than five years is not required.

The Client is advised that the Phase I ESA conducted at the subject property is a limited inquiry into a property's environmental status, cannot wholly eliminate uncertainty, and is not an exhaustive assessment to discover every potential source of environmental liability at the subject property. Therefore, TRC does not make a statement i) of warranty or guarantee, express or implied for any specific use; ii) that the subject property is free of RECs or environmental impairment; iii) that the subject property is "clean;" or iv) that impairments, if any, are limited to those that were discovered while TRC was performing the Phase I ESA. This limiting statement is not meant to compromise the findings of this report; rather, it is meant as a statement of limitations within the ASTM standard and intended scope of this assessment. Specific limiting conditions identified during the site reconnaissance are described in Section 5.1. Subsurface conditions may differ from the conditions implied by surface observations and can be evaluated more thoroughly through intrusive techniques that are beyond the scope of this assessment. Information in this report is not intended to be used as a construction document and should not be used for demolition, renovation, or other construction purposes.

This report presents TRC's site reconnaissance observations, findings, and conclusions as they existed at the time of the site reconnaissance. TRC makes no representation or warranty that the past or current operations at the property are or have been complying with applicable federal, state, and local laws, regulations, and codes. TRC makes no guarantees as to the accuracy or completeness of information obtained from others during this Phase I ESA report. It is possible that information exists beyond the scope of this assessment, or that information was not provided to TRC. Additional information subsequently provided, discovered, or produced may alter findings or conclusions made in this Phase I ESA report. TRC is under no obligation to update this report to reflect such subsequent information. The findings presented in this report are based upon reasonably ascertainable information and observed Site conditions at the time of the assessment.

This report does not warrant against future operations or conditions, nor does it warrant against operations or conditions present of a type or at a location not assessed. Regardless of the findings stated in this report, TRC is not responsible for consequences or conditions arising from facts that were not fully disclosed to TRC during the assessment.

An independent data research company provided the government agency database referenced in this report. Information regarding surrounding area properties was requested for approximate minimum search distances and was assumed to be correct and complete unless obviously contradicted by TRC's observations or other credible referenced sources reviewed during the assessment.

TRC is not a professional title insurance or land surveyor firm and makes no guarantee, explicit or implied, that any land title records acquired or reviewed, or any physical descriptions or depictions of the property in this report, represent a comprehensive definition or precise delineation of property ownership or boundaries.

7.1.2 Warranties and Representations

This report does not warrant against: (1) operations or conditions which were not evident from visual observations or historical information provided; (2) conditions which could only be determined by physical sampling or other intrusive investigation techniques; (3) locations other than the client-provided addresses and/or legal parcel description; or (4) information regarding off-site location(s) (with possible impact to the subject property) not published in publicly available records.

7.1.3 Significant Assumptions

During this Phase I ESA, TRC relied on database information; interviews with subject property representatives, regulatory officials, and other individuals having knowledge of subject property operations; and information provided by the User as requested in our authorized Scope of Work. TRC has assumed that the information provided is true and accurate. Reliance on electronic database search reports is subject to the limitations set forth in those reports. TRC did not independently verify the information provided. TRC found no reason to question the validity of the information received unless explicitly noted elsewhere in this report. If other information is discovered and/or if previous reports exist that were not provided to TRC, our conclusions may not be valid.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal RCRA generators

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 02/17/2025 has revealed that there is 1

EXECUTIVE SUMMARY

RCRA-SQG site within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
CLARK PEST CONTROL I EPA ID:: CAD981678352	5131 ELLSWORTH RD	WNW 1/8 - 1/4 (0.196 mi.)	1	9

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 01/21/2025 has revealed that there is 1 ENVIROSTOR site within approximately 1 mile of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
NORTH VILLAGE ELEMEN Facility Id: 48020003 Status: No Action Required	VACA VALLEY PARKWAY/	WNW 1/2 - 1 (0.730 mi.)	9	56

ADDITIONAL ENVIRONMENTAL RECORDS

Local Lists of Hazardous waste / Contaminated Sites

CERS HAZ WASTE: List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, and RCRA LQ HW Generator programs.

A review of the CERS HAZ WASTE list, as provided by EDR, and dated 01/12/2025 has revealed that there are 2 CERS HAZ WASTE sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 02/17/2025 has revealed that there are 5 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

E MANIFEST: EPA established a national system for tracking hazardous waste shipments electronically. This system, known as e-Manifest, will modernize the nation's cradle-to-grave hazardous waste tracking process while saving valuable time, resources, and dollars for industry and states.

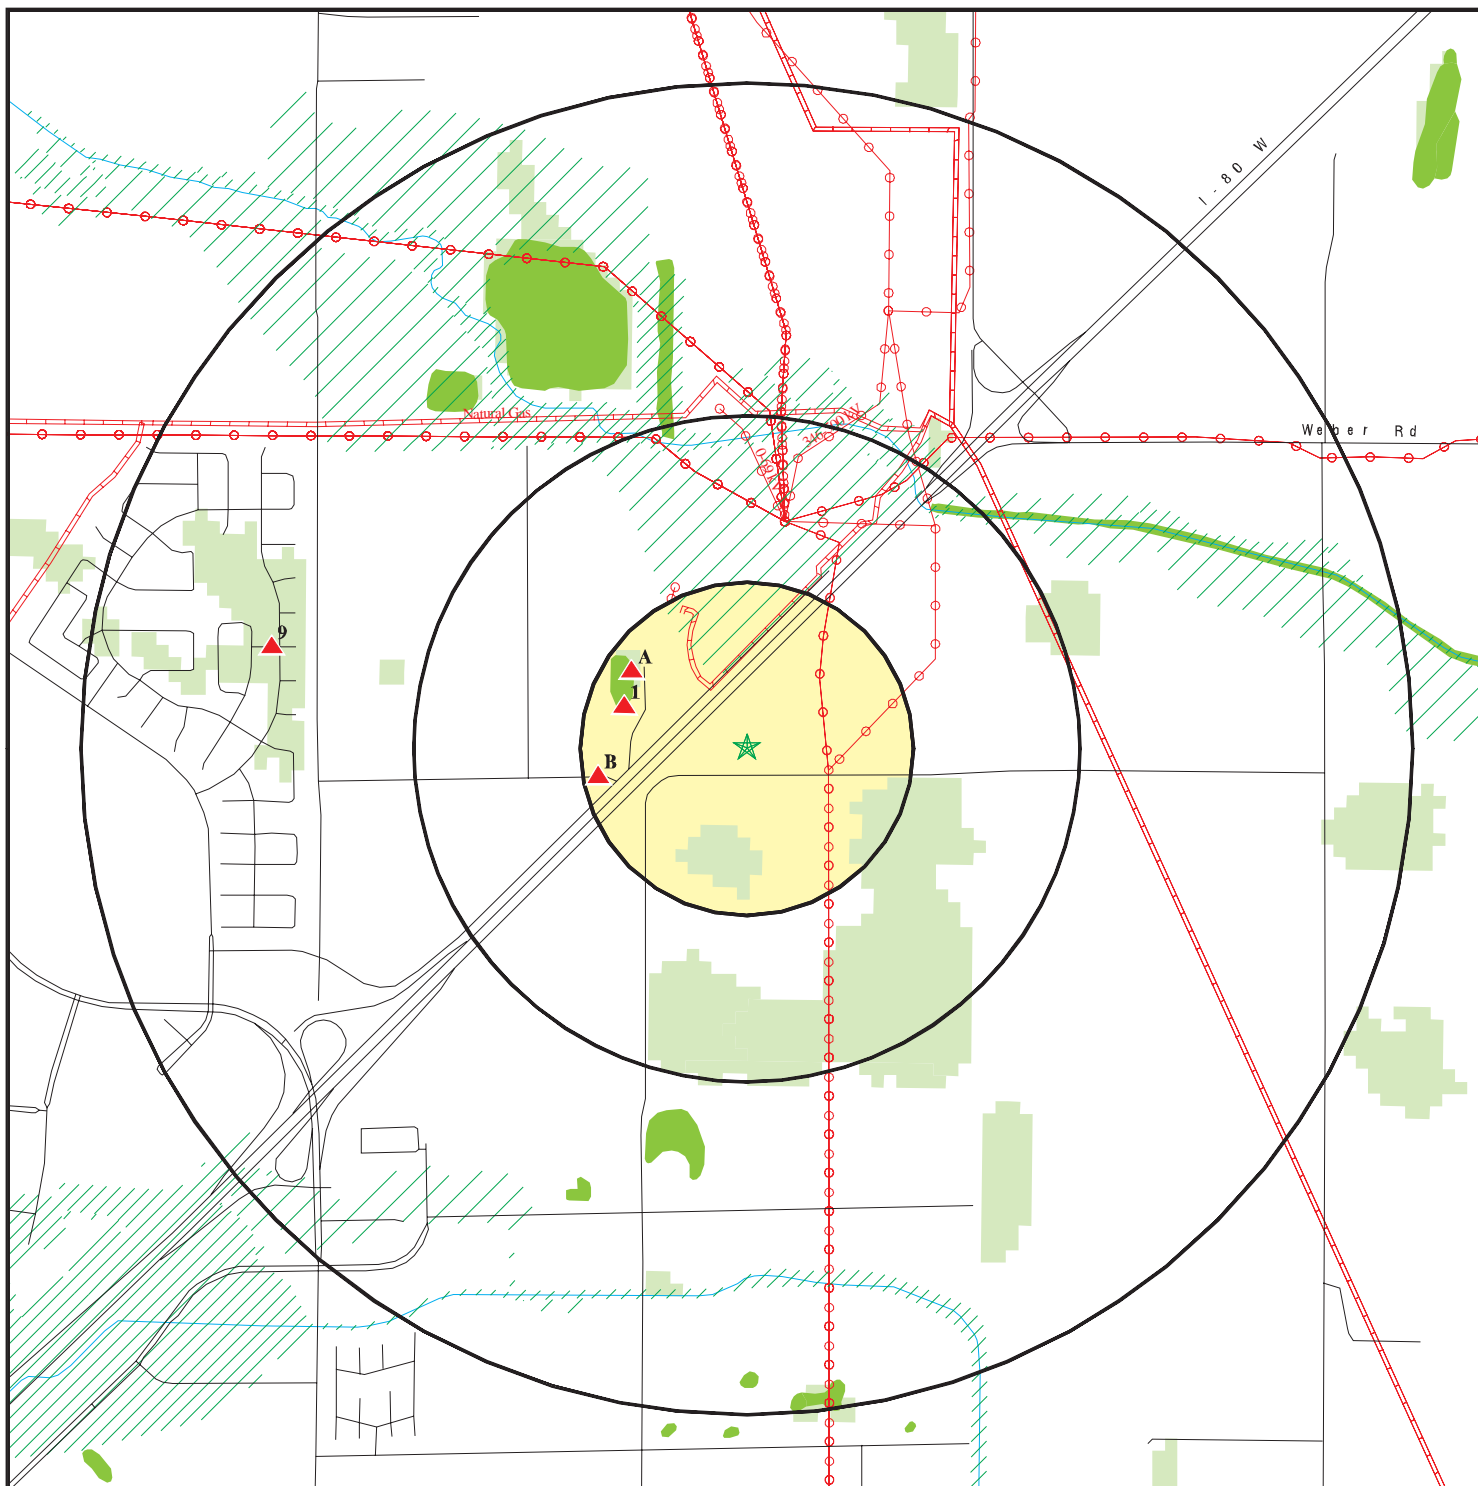

A review of the E MANIFEST list, as provided by EDR, and dated 02/17/2025 has revealed that there is 1 E MANIFEST site within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

There were no unmapped sites in this report.

OVERVIEW MAP - 7997513.2S

- ★ Target Property
- ▲ Sites at elevations higher than or equal to the target property
- ◆ Sites at elevations lower than the target property
- ▲ Manufactured Gas Plants
- National Priority List Sites
- Dept. Defense Sites

- Indian Reservations BIA
- Power transmission lines
- ⚡ Pipelines
- ▨ Special Flood Hazard Area (1%)
- ▨ 0.2% Annual Chance Flood Hazard
- National Wetland Inventory
- State Wetlands
- Areas of Concern

This report includes Interactive Map Layers to display and/or hide map information. The legend includes only those icons for the default map view.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Registry ID: 110055799676

[Click Here for FRS Facility Detail Report:](#)

Environmental Interest/Information System:

The California Environmental Reporting System (CERS) is a statewide web-based user and information exchange system to support over 140,000 regulated businesses and over 130 local agencies in electronically collecting and reporting significant hazardous materials, hazardous waste and compliance and enforcement data as mandated by California law. Under oversight by Cal/EPA, certified local governing agencies (Unified Program Agencies - UPAs) consolidate, coordinate and provide consistent regulatory activities for six state and federal environmental programs.

CERS ID: 10836508
CERS Description: Hazardous Waste Generator

Violations:

Site ID: 563827
Site Name: Commercial Auto Repair
Violation Date: 06-14-2023
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.

Violation Notes: Returned to compliance on 06/14/2023. LABEL ALL HAZ WASTE DRUMS, CONTAINERS, AND ROLL-AROUNDS WITH THE FOLLOWING INFO: "HAZARDOUS WASTE", OWNER NAME AND ADDRESS, CONTENTS, HAZ CATEGORY, PHYSICAL STATE, AND ACCUMULATION DATE. FOR ROLL-AROUNDS USE THE TERM "EMPTIED DAILY" INSTEAD OF ALWAYS CHANGING THE DATE. FOR METAL FILTERS TO BE RECYCLED FOR METAL VALUE, LABEL WITH THE FOLLOWING: "DRAINED USED OIL AND FUEL FILTERS" AND DATE. Corrected on site with inspector
Violation Division: Solano County Environmental Health
Violation Program: HW
Violation Source: CERS,

Site ID: 563827
Site Name: Commercial Auto Repair
Violation Date: 06-15-2023
Citation: HSC 6.95 25505(a)(4) - California Health and Safety Code, Chapter 6.95, Section(s) 25505(a)(4)

Violation Description: Failure to provide initial and annual training to all employees in safety procedures in the event of a release or threatened release of a hazardous material or failure to document and maintain training records for a minimum of three years.

Violation Notes: Site did not have training records. Recommendation: complete training at least once a year and utilize a sign in sheet that documents training, then hold onto the training records for 3 years.

Violation Division: Solano County Environmental Health
Violation Program: HMRRP
Violation Source: CERS,

Site ID: 563827
Site Name: Commercial Auto Repair
Violation Date: 06-14-2023
Citation: HSC 6.95 25507 - California Health and Safety Code, Chapter 6.95, Section(s) 25507

Violation Description: Failure to adequately establish and implement a business plan when storing/handling a hazardous material at or above reportable quantities.

Violation Notes: Business plan not established for site with reportable quantities of hazardous materials. Site has 55 gallons of waste antifreeze, 4 x 55 gallon drums of gasoline/diesel mixture, and used oil. Recommendation: for the used oil, your waste hauler might be able to confirm the size of the waste oil container and you can input that size into the inventory on CERS.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 03/27/2025	Source: EPA
Date Data Arrived at EDR: 04/01/2025	Telephone: N/A
Date Made Active in Reports: 04/24/2025	Last EDR Contact: 05/01/2025
Number of Days to Update: 23	Next Scheduled EDR Contact: 07/07/2025
	Data Release Frequency: Quarterly

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 03/27/2025	Source: EPA
Date Data Arrived at EDR: 04/01/2025	Telephone: N/A
Date Made Active in Reports: 04/24/2025	Last EDR Contact: 05/01/2025
Number of Days to Update: 23	Next Scheduled EDR Contact: 07/07/2025
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA Watch List

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

	Data Release Frequency: Varies

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS ECHO FIRE TRAIN: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facility's name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PT 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration's document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

CHROME PLATING: Chrome Plating Facilities Listing

This listing represents chrome plating facilities the California State Water Resources Control Board staff identified as possibly being a source of Per- and polyfluoroalkyl substance (PFAS) contamination. Sites and locations were identified by staff with the Division of Water Quality in the California State Water Board. Data was collected from the CA Air Resources Board 2013 and 2018 - Cr VI emission survey, CA Emission Inventory, CA HAZ Waste discharge database and by reviewing storm water permits. Former chrome plating sites are also included that are open site investigation or remediation cases with the Regional Water Quality Control Boards and the Department of Toxic Substances Control.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

GEOCHECK[®] - PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

VACAVILLE-PH1ESA-REPORT-0525
5498 KILKENNY RD
VACAVILLE, CA 95687

TARGET PROPERTY COORDINATES

Latitude (North):	38.395831 - 38° 23' 44.99"
Longitude (West):	121.921857 - 121° 55' 18.69"
Universal Transverse Mercator:	Zone 10
UTM X (Meters):	594150.7
UTM Y (Meters):	4250078.5
Elevation:	86 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	50006299 ALLENDALE, CA
Version Date:	2022

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General ESE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
ALLENDALE	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: San Ysidro

Soil Surface Texture: sandy loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Moderately well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	14 inches	sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 4 Min: 1.4	Max: 8.4 Min: 7.4
2	14 inches	27 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 4 Min: 1.4	Max: 8.4 Min: 7.4
3	27 inches	53 inches	sandy clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 4 Min: 1.4	Max: 8.4 Min: 7.4
4	53 inches	68 inches	stratified sandy loam to clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 4 Min: 1.4	Max: 8.4 Min: 7.4

2	14 inches	27 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 4 Min: 1.4	Max: 8.4 Min: 7.4
3	27 inches	53 inches	sandy clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 4 Min: 1.4	Max: 8.4 Min: 7.4
4	53 inches	68 inches	stratified sandy loam to clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 4 Min: 1.4	Max: 8.4 Min: 7.4

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Map ID: 3

Soil Component Name: Clear Lake

Soil Surface Texture: clay

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Poorly drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 138 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	44 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 1.4 Min: 0.42	Max: 8.4 Min: 7.4
2	44 inches	59 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 1.4 Min: 0.42	Max: 8.4 Min: 7.4

Soil Map ID: 4

Soil Component Name: Water

Soil Surface Texture: clay

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class:

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

Soil Map ID: 5

Soil Component Name: Yolo

Soil Surface Texture: loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	27 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 1.4 Min: 0.42	Max: 8.4 Min: 6.6
2	27 inches	44 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 1.4 Min: 0.42	Max: 8.4 Min: 6.6
3	44 inches	59 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 1.4 Min: 0.42	Max: 8.4 Min: 6.6

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

Source: Department of Fish and Wildlife

Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program

State Water Resources Control Board

Telephone: 916-341-5577

The GAMA Program is California's comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Health Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

California Drinking Water Quality Database

Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

Geothermal Wells Listing

Department of Conservation

Telephone: 916-445-9686

Geothermal well means a well constructed to extract or return water to the ground after it has been used for heating or cooling purposes. Geothermal wells in California (except for wells on federal leases which are administered by the Bureau of Land Management) are permitted, drilled, operated, and permanently sealed and closed (plugged and abandoned) under requirements and procedures administered by the Geothermal Section of the Department of Conservation's Geologic Energy Management Division (CalGEM, formerly DOGGR).

California Oil and Gas Well Locations

Source: Dept of Conservation, Geologic Energy Management Division

Telephone: 916-323-1779

Oil and Gas well locations in the state.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

California Earthquake Fault Lines

Source: California Division of Mines and Geology

The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon

Source: Department of Public Health

Telephone: 916-210-8558

Radon Database for California

Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

OTHER

Airport Landing Facilities: Private and public use landing facilities

Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater

Source: Department of Commerce, National Oceanic and Atmospheric Administration

California Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines, prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by TRC were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- Library of Congress
- University Publications of America
- EDR Private Collection

The Sanborn Library LLC Since 1866™

Limited Permission To Make Copies

TRC (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available business directory data at approximately five year intervals.

RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

TRC Staff and Environmental Professional
Qualifications/Resumes

Jim Fickerson
Associate Director

Highlights of Mr. Fickerson's Expertise:

- **Project and Program Management:** From single site commercial property to multi-site portfolios, to complex-industrial sites with project values exceeding \$5M, Mr. Fickerson has provided single-point of contact service to a wide variety of commercial and industrial clients across numerous business sectors.
- **Guidance:** Mr. Fickerson has significant experience providing strategic senior level M&A guidance in support of thousands of projects across the globe.
- **Liability Analysis:** Mr. Fickerson has prepared hundreds of red flag reports and other financial analysis that quantify the EHS risks posed by mergers and acquisitions.

Jim Fickerson has over 25 years of experience directing large-scale, multidisciplinary environmental, health and safety (EHS) and environmental, social, governance (ESG) management programs for financial, commercial and industrial clients globally. Mr. Fickerson is particularly experienced managing multi-site due diligence programs under considerable logistical and scheduling constraints on a global scale. Known for his strong communication, cost control, and organizational skills, Mr. Fickerson frequently collaborates with TRC's team of subject matter experts and the clients outside legal counsel to develop cost-effective solutions to meet his client's needs. He works closely with project teams to ensure that the work is conducted safely, schedules are met, budgets are adhered to, and deliverables are of a high quality.

In addition to his leadership role, Mr. Fickerson is the account manager for several financial and commercial clients including one of the world's largest e-commerce companies. In this capacity, Mr. Fickerson manages all aspects of the client's EHS and ESG risk management, including due diligence, regulatory compliance, agency negotiations, portfolio acquisition strategy, and liability management.

CREDENTIALS

Education

- Bachelor of Science (Environmental Studies) San Jose State University

Technical Specialties:

- Program Management
- EHS Due Diligence
- ESG Due Diligence
- Project Management
- EHS Compliance
- Liability Analysis
- Risk Management

EXPERIENCE

Professional Summary:

- 25 years' experience managing commercial and industrial due diligence projects globally.
- Experience includes assessment, investigation, remediation, planning, permitting, and compliance.
- Management of large complex projects with multiple locations, projects teams of over 100 technical specialists, and budgets exceeding \$5M.

Areas of Expertise:

- Due Diligence
- Liability Management
- Regulatory Compliance
- Risk Management

PROJECT EXPERIENCE

Confidential Multinational Technology Company. Since 2023 Mr. Fickerson has been providing global environmentally due diligence services to support the clients planned \$20B+ satellite telecommunication program. The services have ranged from environmental screenings, hazardous materials surveys, Phase I ESAs, ecological surveys, and environmental permitting.

Confidential Private Equity Client, Project Minor. TRC was retained to conduct Phase I ESAs of over 650 commercial properties located throughout the United States to support the client's potential \$2B acquisition of a major retailer. The portfolio consisted over 300 freestanding retail locations; over 300 retail locations located within strip malls, and over 20 commercial offices, fulfillment centers, and warehouse/distribution centers.

Confidential Private Equity Client, Project Lightspeed. Mr. Fickerson was the project manager and lead EHS due diligence advisor to confidential private equity company in support of its approximately \$7B acquisition of a major US-based tire retailer and automotive service provider. The portfolio consisted over 550 retail stores, automotive service centers, tire retread facilities, transfer yards, and a distribution center. The majority of TRC's due diligence was conducted under a compressed two-week schedule. TRC worked closely with the clients outside legal counsel and other due diligence partners during the transaction to identify over \$3M in potential EHS liability.

The Carlyle Group, Project Irving. Mr. Fickerson was the project manager and key due diligence advisor to The Carlyle Group in support of its \$3B acquisition of iStar Inc.'s net lease business. The transaction was in support of Carlyle's Real Estate Credit Fund. iStar's business footprint included 247 properties located throughout the United States, Canada, and Puerto Rico that consisted of nine office, 17 industrial, and 221 entertainment properties. Together this portfolio contained over 20 million square feet of rentable space and occupied nearly 2,500 acres. TRC was retained by Carlyle to conduct Phase I ESAs, qualitative evaluations of asbestos, lead-based-paint, mold, radon, and lead in drinking water; estimate potential environmental liability across the portfolio; and develop post-acquisition mitigation strategies to reduce risk. The majority of TRC's due diligence was conducted under a significantly compressed one-month transaction schedule that occurred over the holiday season. TRC collaborated with Kirkland & Ellis, Carlyle's legal advisor, and Carlyle's lending partners during the transaction.

TPG Inc., Project Potentia. Mr. Fickerson was the project manager and lead EHS advisor to TPG Inc. in support of its \$2.5B acquisition of Altus Power Inc, a provider of 1K MW of solar power generation across 25 states. TRC conducted desktop-based due diligence of the Company's 450 solar projects and its operations.

Reliance Industries, EDD Assessment, Refining & Marketing Assets of Citgo Petroleum Corporation. Mr. Fickerson led a team of over dozen senior technical experts specializing in remediation, environmental compliance, process engineering, and health and safety to evaluate the EHS liabilities associated with the potential \$10BB acquisition of Citgo Petroleum Corporations refining and terminal assets. At the conclusion of the project the project team identified between \$550MM and \$1BB in potential EHS liability associated with the refineries and between \$4.5MM and \$12.5MM in potential liability associated with the terminals. Mr. Fickerson and his team worked closely with the client, its financial advisors, and outside legal counsel to minimize data gaps and negotiate a favorable purchase price.

Public Storage, EDD Services, United States. 2000 to 2020. For 20 years Mr. Fickerson was the client account and program manager responsible for providing EDD services and strategic guidance to support this Real Estate Investment Trust's (REIT) acquisition program. Under Mr. Fickerson's leadership, his team played an integral role in the expedient growth of this client into the industry leader in the self-storage market. Over the years, Mr. Fickerson managed thousands of Phase I ESAs, asbestos surveys, subsurface assessments, risk assessments, remediation, and regulatory closure projects of commercial and heavy industrial property located throughout the United States. Revenues generated over this timeframe exceeded \$20MM.

Confidential Insurance Company, International Agricultural Acquisition, Australia, Brazil, Chile, Peru, and United States. Mr. Fickerson led a team of two dozen technical experts specializing in EDD, remediation, and environmental compliance to evaluate the risks associated with the \$10BB acquisition of over 500,000 acres of agricultural land located across the globe. Mr. Fickerson and his team worked closely with the client, its financial advisors, and outside legal counsel to identify several million dollars of environmental liability that was factored into the purchase and sale agreement.

Confidential Client, Construction Monitoring & Compliance, Wind Farm, Kern County, California. Mr. Fickerson was the project manager responsible for the cultural resource monitoring in support of the construction of the 162 MW North Sky River wind farm in a remote and geographically diverse portion of western Kern County. This contentious and politically sensitive \$6MM project involved a diverse team of over 50 professional archeologists, environmental scientists, engineers, and over two dozen Native American monitors who oversaw the construction of over 200 miles of roads and nearly 100 wind turbine pads on an approximately 13,000-acre mountainous site. In addition to construction monitoring, the project involved significant data recovery, agency and Native American consultation, laboratory analyses, the curation of nearly 9,000 artifacts, and the compilation of two voluminous reports to document this eight-month long, highly complex construction monitoring project.

Hydrogen Energy California, EDD Support, Kern County, California. Mr. Fickerson was the project manager responsible for a Phase II ESA subsurface assessment of this 542-acre proposed alternative energy plant site. This Phase II ESA was conducted to evaluate over 14 RECs including several USTs, a former fertilizer plant, dozens of 55-gallon drums of unknown chemicals, unknown underground structures, and over 40 years of heavy agricultural use. The results of the Phase II ESA were documented in comprehensive technical report that was submitted to the DTSC and the CEC.

Nufarm Americas, Acquisition Support Services, Seven Chemical Plants, United States, Brazil, Argentina, Mexico, and Slovenia. Mr. Fickerson was the project manager responsible for the EDD of seven complex and large chemical/pesticide manufacturing plants. The EDD program involved conducting Phase I ESAs, environmental compliance assessments, and liability cost estimates for each site under significant time constraints and data challenges. In addition, one of the plants in Argentina was under considerable regulatory scrutiny because several NGOs had accused the facility of contributing to the deaths of hundreds of residents in the local community. To address this complex and nuanced issue, Mr. Fickerson assembled a diverse team of global experts to conduct an ESG study to better understand the exposure this facility presented. At the conclusion of the project, the project team estimated that the acquisition would require our client to taken on approximately \$150MM in environmental liability, not including the legal exposure presented by the one Argentina facility. The results of our study were presented to the client's board of directors to help guide their decision-making process.

Sempra Generation, Phase I ESA, Maui, Hawaii. Mr. Fickerson was the project manager and lead environmental assessor responsible for a Phase I ESA of a proposed Auwahi Wind Energy wind farm on the Ulupalakua Ranch. This large site consisted of over 5,200 acres of rugged ranch land on the windward side of Haleakalā. The assessment involved a site and area reconnaissance; a review of various historical resources; an analysis of a regulatory database report, review of local and state regulatory agency files, researching the physical characteristics of the site, and preparation of a comprehensive report.

Nature Conservancy, EDD Support, Tecopa, California. Mr. Fickerson was the project manager responsible for managing the DD of this former worker camp and precious metals mine in Tecopa, California. RECs identified at the site were further evaluated by the implementation of a comprehensive subsurface trenching program. Total metals including cyanide, mercury, lead, and copper were identified in soil at concentrations that exceed hazardous waste criteria. Potential remedial scenarios were evaluated, a preliminary risk assessment was performed, and discussions with the client's outside legal counsel were conducted. The project team determined that the elevated metals concentrations could be managed in place, thus avoiding costly (more than \$1M) remediation and allowing a conservation easement to be placed in perpetuity on this ecologically sensitive site.

Appendix E
Environmental Professional Statement

**DEFINITION OF ENVIRONMENTAL PROFESSIONAL AND RELEVANT EXPERIENCE
THERETO PURSUANT TO 40 CFR 312**

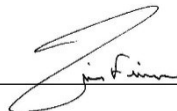

1. A person who possesses sufficient specific education, training, and experience necessary to exercise professional judgment to develop opinions and conclusions regarding conditions indicative of releases or threatened releases (see §312.1[c]) on, at, in, or to a property, sufficient to meet the objectives and performance factors in §312.20(e) and (f).
2. Such a person must: (i) hold a current Professional Engineer's or Professional Geologist's license or registration from a state, tribe, or U.S. territory (or the Commonwealth of Puerto Rico) and have the equivalent of 3 years of full-time relevant experience; or (ii) be licensed or certified by the federal government, a state, tribe, or U.S. territory (or the Commonwealth of Puerto Rico) to perform environmental inquiries as defined in §312.21 and have the equivalent of 3 years of full-time relevant experience; or (iii) have a Baccalaureate or higher degree from an accredited institution of higher education in a discipline of engineering or science and the equivalent of 5 years of full-time relevant experience; or (iv) have the equivalent of 10 years of full-time relevant experience.
3. An environmental professional should remain current in his or her field through participation in continuing education or other activities.
4. The definition of environmental professional provided above does not preempt state professional licensing or registration requirements such as those for a professional geologist, engineer, or site remediation professional. Before commencing work, a person should determine the applicability of state professional licensing or registration laws to the activities to be undertaken as part of the inquiry identified in §312.21(b).
5. A person who does not qualify as an environmental professional under the foregoing definition may assist in the conduct of all appropriate inquiries in accordance with this part if such person is under the supervision or responsible charge of a person meeting the definition of an environmental professional provided above when conducting such activities.

Relevant experience, as used in the definition of environmental professional in this section, means: participation in the performance of all appropriate inquiries investigations, environmental site assessments, or other site investigations that may include environmental analyses, investigations, and remediation which involve the understanding of surface and subsurface environmental conditions and the processes used to evaluate these conditions and for which professional judgment was used to develop opinions regarding conditions indicative of releases or threatened releases (see §312.1[c]) to the subject property. TRC personnel resume(s) are included in **Appendix D**.

I declare that, to the best of my professional knowledge and belief, I meet the definition of environmental professional as defined in §312.10 of 40 CFR 312.

I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.
